**“MUTUAL RELATIONSHIPS BETWEEN GENERATIONS AND GENDERS”  
SECOND WAVE**

*The survey will provide generalized opinions and evaluations of all surveyed persons. That is why it is not necessary to write the name of the surveyed person in the questionnaire.*

Dear Madame,

Dear Sir,

The research team of the Coordinating Research Council for Social Development and Social Euro-integration at the Bulgarian Academy of Sciences is organizing the carrying out of a survey on the topic “Mutual Relationships between Generations and Genders”. The survey is being realized jointly with the National Statistical Institute and with the Max-Planck Institute for Demographic Investigations in Rostock, Germany. The fieldwork is being carried out by the interviewer network of the Institute of Sociology at BAS.

We would like to remind you that we met and talked with you three years ago at the time of the First Wave of the survey. This is the Second Wave now being conducted.

The questionnaire must be filled in by the interviewer. You will talk with him and he will write your answers in the questionnaire.

We thank you in advance for the time you will give for carrying out the interview.

Sofia  
2007

The research team

**INSTRUCTION FOR THE INTERVIEWER:** Write down the date (day and month) and hour at which the interview begins.

**001. THE INTERVIEW BEGINS** on ..... at .....  
(date) (hour and min..)

**INSTRUCTION FOR THE INTERVIEWER:** Read out the following text.

This survey is a continuation of the survey “Relationships between Generations and Genders” in which you participated three years ago (in 2004). It is part of an international programme coordinated by the UN Economic Commission for Europe. An interesting feature of our research work is that we are trying to trace the lives of people over a longer period of time.

The aim of this survey is to find out more about daily life, its conditions and the opinions of people and of the family. We wish to gather information about the factors that have an impact on the formation of families, the intentions to bear children and preparation for old age (for life at an advanced age). We would also like to collect information about the lives of generations – the young, the middle-aged, and the elderly. This survey will show how the lives of people and the conditions in the family have changed over time, which in turn will enable understanding the obstacles to family life and the connections between generations, as well as help to develop management policies in the future.

Each individual answer is very important for us, because each person who has been invited and has taken part in the survey represents a specific group of our society. That is why, although they have been selected at random, participants in this survey represent all the inhabitants of the country proportionately. This is why it is especially important to ask the question of the same people who took part in the previous survey.

We will keep the information you give us in strict confidence and will use it only for research purposes and in its generalized form for all surveyed persons.

It would be well if the interview were done without other people being present.

**INSTRUCTION FOR THE INTERVIEWER:** If nevertheless there are other people in the room, write down who else is present besides the respondent at the start of the interview. Specify the relationship of that person to the respondent (a relative, close relation, neighbour, friend) and his/her gender.

**002. OTHER PERSONS PRESENT AT THE START OF THE INTERVIEW.**
