## Generations and Gender Survey Hungary Wave 1, Wave 2 & Wave 3 (GGS Hungary Wave 1, Wave 2 & Wave 3)

*"Életünk Fordulópontjai" panelkutatás - "Turning points of the Life-Course" Panel Survey*

Overview	
<b>Identification</b>	GGS.W1.W2.W3.16
<b>Abstract</b>	
<p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion".</p> <p>The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> <li>- Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets.</li> <li>- A broad age range. It includes respondents between the ages of 18 and 80.</li> <li>- A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals.</li> <li>- A large sample size. It has an average of 9,000 respondents per country at Wave 1.</li> <li>- A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior.</li> <li>- Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.</li> </ul>	
<b>Kind of Data</b>	Survey data
<b>Unit of Analysis</b>	Individuals

Scope & Coverage	
<b>Keywords</b>	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender relations, Intergenerational exchanges, Informal and formal care, Well-being and health, Grandparenthood, Economic activity, Retirement
<b>Time Period(s)</b>	2004-2013
<b>Countries</b>	Hungary
<b>Geographic Coverage</b>	
Wave 1, Wave 2 & Wave 3 The territory of Hungary	
<b>Universe</b>	
<p>WAVE 1 Non-institutionalized Hungarian citizens living in Hungary, born between 1926-01-01 and 1983-12-31 (aged 21-78).</p> <p>WAVE 2 Non-institutionalized respondents who took part in wave 2 (aged 25-82).</p> <p>WAVE 3 Non-institutionalized respondents who took part in wave 3 (aged 29-86).</p>

<b>Sampling</b>
<p><b><u>Sampling Procedure</u></b></p> <p><b>WAVE 1 SAMPLING PROCEDURE</b></p> <p>1. Sampling frame</p> <p>1.1 Type of frame: GGS Wave 1 corresponds to the 2nd wave of the "Turning Points of the Life Course" national survey. Sampling took place in 2001, before wave 1 of the national survey. All information on sampling refers to wave 1 of the national survey in 2001!!!</p> <p>The sampling frame of Wave 1 of the national survey used the Hungarian population register of the National Election Office (name list).</p> <p>1.2 Frame coverage: The frame contains all Hungarian citizens.</p> <p>1.3 Frame size: 7454196</p> <p>1.4 Level of units available: Individuals</p> <p>2. Sampling method</p> <p>2.1 Sampling method type: A multistage, stratified sampling was used for Wave 1 of the national survey. Settlements were ordered according to their number of inhabitants and divided into deciles, with about the same number of residents in each decile. Individuals living in settlements in the 6-10th population deciles (larger settlements) were randomly sampled (SRS). Multistage sampling was used for individuals living in smaller settlements.</p> <p>2.2 Sampling stage definition</p> <ul style="list-style-type: none"> <li>- PSU: Settlements (if in 1-5th deciles - see 2.1.)</li> <li>- SSU: Individuals (if in 1-5th settlement deciles - see 2.1.)</li> <li>- TSU: -</li> </ul> <p>2.3 Sampling stage size</p> <ul style="list-style-type: none"> <li>- PSU: 3036 (370 were selected)</li> <li>- SSU: 5007817</li> <li>- TSU: -</li> </ul> <p>2.4 Unit selection: Random number generator</p> <p>2.5 Final stage unit selection: SRS</p> <p>2.6 Within household unit selection: not applicable</p> <p>2.7 Stratification: Explicit stratification was used based on age group (18-29 and 30-75), settlement size (10 deciles) and region (NUTS 2 level, 7 regions).</p> <p>2.8 Sample size:</p> <ul style="list-style-type: none"> <li>- Starting size sample: 25510 (in 2001, in wave 1 of the national survey)</li> <li>- Aimed total size at Wave 1: 15200 (in 2001, in wave 1 of the national survey)</li> <li>- Aimed total size at Wave 3: 8200 (for GGS wave 3, which is actually wave 4 of the national survey)</li> </ul> <p>2.9 Estimated Non-response</p> <ul style="list-style-type: none"> <li>- Initial non-response: 40%</li> </ul>

- Yearly attrition: 6,5%
- Non response measures: Respondents aged below 30 and living in larger settlements were oversampled because they had been found to be more likely to drop out of a panel.
- Within household non-responses measures: not applicable.

#### WAVE 2 SAMPLING PROCEDURE

Not applicable (no sampling took place, respondents were sampled before W1).

Estimated yearly attrition: 6,5%.

#### WAVE 3 SAMPLING PROCEDURE

Not applicable (no sampling took place, respondents were sampled before W1).

Estimated yearly attrition: 6,5%.

### **Response Rate**

#### WAVE 1

NOTE: Below numbers refer to GGS wave 1, which was actually wave 2 of the Hungarian national survey. The number of complete interviews was 16363 in 2001 (wave 1 of the national survey).

Frequency of final disposition codes:

I = Complete interview: 13 540

P = Partial interview: no information

NE = Not eligible: 848 (including respondents who died since wave 1 of the national survey in 2001)

NC = Non-contact: 864

R = Refusal: 1041 (including other non-response type iii, i.e. interview was not feasible due to some disability or illness)

O = Other non-response: 70

UC = Unknown eligibility, contacted: -

UN = Unknown eligibility, non-contact: -

eC = Estimated proportion of contacted cases of unknown eligibility that are eligible: -

eN = Estimated proportion of non-contacted cases of unknown eligibility that are eligible: -

#### WAVE 2

Frequency of final disposition codes:

I = Complete interview: 10 461

P = Partial interview: no information

NE = Not eligible: 825

NC = Non-contact: 205

R = Refusal: 1312

O = Other non-response: 557

UC = Unknown eligibility, contacted: -

UN = Unknown eligibility, non-contact: -

eC = Estimated proportion of contacted cases of unknown eligibility that are eligible: -

eN = Estimated proportion of non-contacted cases of unknown eligibility that are eligible: -

#### WAVE 3

Frequency of final disposition codes:

I = Complete interview: 8 103

P = Partial interview: no information

NE = Not eligible: 723

NC = Non-contact: 558

R = Refusal: 1038

O = Other non-response: 219

UC = Unknown eligibility, contacted: -

UN = Unknown eligibility, non-contact: -

eC = Estimated proportion of contacted cases of unknown eligibility that are eligible: -

eN = Estimated proportion of non-contacted cases of unknown eligibility that are eligible: -

**WAVE 2**

In total 83.2% of the interview were successful (i.e. 10,641 interviews).

**Weighting**

Yes, cross-sectional weight for wave 1 and longitudinal weights for waves 2 and 3 that take the probability of attrition into account.

**WAVE 1 and WAVE 2 WEIGHT VARIABLES**

They are standardized weights based on country-specific population weights.

**Data Collection**

<b>Data Collection Dates</b>	Wave 1: start 2004-11-01 Wave 1: end 2005-01-15 Wave 1: start 2005-05-01 Wave 1: end 2005-05-31 Wave 2: start 2008-11-01 Wave 2: end 2009-02-15 Wave 3: start 2012-11-17 Wave 3: end 2013-02-28 Wave 3: start 2013-03-01 Wave 3: end 2013-03-31
<b>Data Collection Mode</b>	Wave 1 Method: Face-to-Face (personal interview) Technique: Paper and pencil (PAPI)  Wave 2 Method: Face-to-face (personal interview), with a short self-administered on-site paper-and-pencil block on contraceptive use and family planning Technique: Paper and pencil (PAPI)  Wave 3 Method: Face-to-face (personal interview), with optional self-administered online blocks Technique: CAPI, with optional CAWI blocks

**Data Collection Notes****WAVE 1 DATA COLLECTION****1. Interviewers**

1.1 Total number of interviewers: 500

1.2 Number of interviewers in the field: Interviewers had a certain number of interviews to carry out during a set amount of time. They worked individually so it is not possible to specify how many of them were in the fields at the same time.

1.3 Network organization: One field coordinator in each of the 19 regional agencies of HCSO (one for each county and one for the capital)

1.4 Working arrangement of interviewers: contracted - other

1.5 Payment of interviewers: Per interview, reimbursement for travel expenses, extra payment if they found respondents who moved and if only 1-3 respondents lived in the same settlement.

**2. Interviewer training:**

2.1 General interviewing: The interviewers had worked in other data collections of the Hungarian Central Statistical Office and they were already trained in general interviewing techniques.

2.2 Survey specific: Yes, the training was carried out in two phases: first, training for field coordinators; second, they trained the interviewers (the researchers of HDRI participated in all of these trainings). Both theoretical and practical guidelines were provided. A detailed guidebook was developed for the interviewers.

2.3 Length: One day for field coordinators and also one day for interviewers.

2.4 Control of performance: Yes, there were different forms of control: telephone contact with interviewers during the fieldwork; centralized control of the first two questionnaires for each interviewer (the research group of HDRI checked the

quality of their work and provided feedback); manual controlling of all questionnaires (some critical points and consistency); sending short a questionnaire to all respondents after the fieldwork about the interview experience.

2.5 Interviewer survey: No, but they were free to give feedback at any point.

### 3. Contact protocols

3.1 Advance letter: Yes, an advance letter was sent to sample members to ask them to participate in the survey before the interviewer's visit. The letter described the main topics of the survey, the time period of the interviews, the estimated duration of interview and information on data protection.

3.2 Cold contacts: Not applicable (for Wave 1 of the national survey, they were contacted face-to-face).

3.3 Scheduling / scattering: Yes, interviewers were asked to scatter contacts attempts over different days of the week and different parts of the day.

3.4 Contact history: Yes, for each contact attempt, the interviewer had to report the date, the time and the outcome in a grid.

3.5 Min number of contacts: Yes: 3

3.6 Max number of contacts: No

### 4. Questionnaire localization

4.1 Validation: HDRI researchers translated the questionnaire (each researcher of the team was responsible for one section), then discussed its linguistic and cultural validity. The questionnaire was tested in a small pilot and focus groups.

4.2 Pre-test: The questionnaire was pretested with a small pilot (using a convenience sample) and focus group discussions.

4.3 Length of interview: On average 110 minutes

## WAVE 2 DATA COLLECTION

### 1. Interviewers

1.1 Total number of interviewers: 510

1.2 Number of interviewers in the field: Interviewers had a certain number of interviews to carry out during a set amount of time. They worked individually so it is not possible to specify how many of them were in the fields at the same time.

1.3 Network organization: One field coordinator in each of the 19 regional agencies of HCSO (one for each county and one for the capital)

1.4 Working arrangement of interviewers: contracted - other

1.5 Payment of interviewers: Per interview, reimbursement for travel expenses, extra payment if they found respondents who moved and if only 1-3 respondents lived in the same settlement.

### 2. Interviewer training:

2.1 General interviewing: The interviewers had worked in other data collections of the Hungarian Central Statistical Office and they were already trained in general interviewing techniques.

2.2 Survey specific: Yes, the training was carried out in two phases: first, training for field coordinators; second, they trained the interviewers (the researchers of HDRI participated in all of these trainings). Both theoretical and practical guidelines were provided. A detailed guidebook was developed for the interviewers.

2.3 Length: One day for field coordinators and also one day for interviewers.

2.4 Control of performance: Yes, there were different forms of control: telephone contact with interviewers during the fieldwork; centralized control of the first two questionnaires for each interviewer (the research group of HDRI checked the quality of their work and provided feedback); manual controlling of all questionnaires (some critical points and consistency).

2.5 Interviewer survey: No, but they were free to give feedback at any point.

### 3. Contact protocols

3.1 Advance letter: Yes, an advance letter was sent to sample members to ask them to participate in the survey before the interviewer's visit. The letter reminded respondents of the main topics of the survey, the time period of the interviews, the estimated duration of interview and information on data protection.

3.2 Cold contacts: Not applicable

3.3 Scheduling / scattering: Yes, interviewers were asked to scatter contacts attempts over different days of the week and different parts of the day.

3.4 Contact history: Yes, for each contact attempt, the interviewer had to report the date, the time and the outcome in a grid.

3.5 Min number of contacts: Yes: 3

3.6 Max number of contacts: No

#### 4. Questionnaire localization

4.1 Validation: HDRI researchers translated the questionnaire (each researcher of the team was responsible for one section), then discussed its linguistic and cultural validity. The questionnaire was tested in a small pilot and focus groups.

4.2 Pre-test: The questionnaire was pretested with a small pilot (using a convenience sample) and focus group discussions.

4.3 Length of interview: n.a.

### WAVE 3 DATA COLLECTION

#### 1. Interviewers

1.1 Total number of interviewers: 325

1.2 Number of interviewers in the field: Interviewers had a certain number of interviews to carry out during a set amount of time. They worked individually so it is not possible to specify how many of them were in the fields at the same time.

1.3 Network organization: One field coordinator in each of the 19 regional agencies of HCSO (one for each county and one for the capital)

1.4 Working arrangement of interviewers: contracted - other

1.5 Payment of interviewers: Per interview, reimbursement for travel expenses, extra payment if they found respondents who moved and if only 1-3 respondents lived in the same settlement.

#### 2. Interviewer training:

2.1 General interviewing: The interviewers had worked in other data collections of the Hungarian Central Statistical Office and they were already trained in general interviewing techniques.

2.2 Survey specific: Yes, the training was carried out in two phases: first, training for field coordinators; second, they trained the interviewers (the researchers of HDRI participated in all of these trainings). Both theoretical and practical guidelines were provided. A detailed guidebook was developed for the interviewers.

2.3 Length: One day for field coordinators and also one day for interviewers.

2.4 Control of performance: Yes, there were different forms of control: telephone contact with interviewers during the fieldwork; centralized control of the first two questionnaires for each interviewer (the research group of HDRI checked the quality of their work and provided feedback); manual controlling of all questionnaires (some critical points and consistency). The CAPI software also performed lots of automatic checks.

2.5 Interviewer survey: No, but they were free to give feedback at any point.

#### 3. Contact protocols

3.1 Advance letter: Yes, two advance letter was sent to sample members to ask them to participate in the survey before the interviewer's visit. The first letter included a leaflet with some interesting results, a feedback option, and information that the survey would continue. The second letter reminded respondents of the main topics of the survey, the time period of the interviews, the estimated duration of interview, the possibility to answer some of the question on the web, and information on data protection.

3.2 Cold contacts: Not applicable

3.3 Scheduling / scattering: Yes, interviewers were asked to scatter contacts attempts over different days of the week and different parts of the day.

3.4 Contact history: Yes, for each contact attempt, the interviewer had to report the date, the time and the outcome in a grid.

3.5 Min number of contacts: Yes: 3

3.6 Max number of contacts: No

#### 4. Questionnaire localization

4.1 Validation: HDRI researchers translated the questionnaire (each researcher of the team was responsible for one section), then discussed its linguistic and cultural validity. The questionnaire was tested in a small pilot and focus groups.

4.2 Pre-test: The questionnaire was pretested with a small pilot (using a convenience sample) and focus group discussions.

4.3 Length of interview: n.a.

### **Questionnaires**

Structured questionnaire in Hungarian.

### **Data Collector(s)**

Hungarian Central Statistical Office (HCSO)  
Hungarian Demographic Research Institute (HDRI)

### **Supervision**

**WAVE 1 ACTIONS**

1. Dealing with nonresponse
  - 1.1 Screening: No
  - 1.2 Refusal conversion: No special methods besides usual interviewer techniques
  - 1.3 Incentives: Yes, small gifts (a coffee cup and some coffee)
2. Tracking of sampled units
  - 2.1 Respondent contact information: Yes, contact details of the respondent were collected: name, address and phone number.
  - 2.2 Other contact information: Yes, contact details of one or more proxies (such as a parent, a friend) were collected or updated: name, address, phone number.
  - 2.3 Cards: A thank you letter was sent after the fieldwork, together with a "change-of-address-notification" card that respondents could send back free of charge if their contact details changed (they could report a change in their contact details through an online form). A colorful brochure with some interesting results of the previous wave was also sent.
  - 2.4 Additional surveys: No
  - 2.5 Administrative records: Before each wave, contact details were retrieved from the Hungarian population register of the National Election Office to update our data base.

**WAVE 2 ACTIONS**

1. Dealing with nonresponse
  - 1.1 Screening: No
  - 1.2 Refusal conversion: No special methods besides usual interviewer techniques
  - 1.3 Incentives: Yes, a small gift (a bar of chocolate)
2. Tracking of sampled units
  - 2.1 Respondent contact information: Yes, contact details of the respondent were collected: name, address and phone number.
  - 2.2 Other contact information: Yes, contact details of one or more proxies (such as a parent, a friend) were collected or updated: name, address, phone number.
  - 2.3 Cards: A thank you letter was sent after the fieldwork, together with a "change-of-address-notification" card that respondents could send back free of charge if their contact details changed (they could report a change in their contact details through an online form). A colorful brochure with some interesting results of the previous wave was also sent.
  - 2.4 Additional surveys: No
  - 2.5 Administrative records: Before each wave, contact details were retrieved from the Hungarian population register of the National Election Office to update our data base.

**WAVE 3 ACTIONS**

1. Dealing with nonresponse
  - 1.1 Screening: No
  - 1.2 Refusal conversion: No special methods besides usual interviewer techniques
  - 1.3 Incentives: Yes, a small gift (foldable tote bag). Respondents who completed the CAWI were eligible to win a pen drive
2. Tracking of sampled units
  - 2.1 Respondent contact information: Yes, contact details of the respondent were collected: name, address and phone number.
  - 2.2 Other contact information: Yes, contact details of one or more proxies (such as a parent, a friend) were collected or updated: name, address, phone number.
  - 2.3 Cards: A thank you letter was sent after the fieldwork, together with a "change-of-address-notification" card that respondents could send back free of charge if their contact details changed (they could report a change in their contact details through an online form). A colorful brochure with some interesting results of the previous wave was also sent.
  - 2.4 Additional surveys: No
  - 2.5 Administrative records: Before each wave, contact details were retrieved from the Hungarian population register of the National Election Office to update our data base.

# Files Description

Dataset contains 3 file(s)

<b>GGG_Wave1_Hungary_V.4.3.</b>	
<b># Cases</b>	13540
<b># Variable(s)</b>	899
<b>File Structure</b>	Type: relational Key(s): arid (R identification number)
<p><b><u>File Content</u></b> GGG Wave 1</p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p>	
<p><b><u>Version</u></b> Harmonized dataset, GGS Wave1, version 4.3.</p> <p>IMPROVEMENTS INTRODUCED WITH V.4.3. - a109\_2 (now available for SWE)
- a149 (now available for SWE)
- a309 (now available for SWE)
- aregion (now available for SWE)
- a620\_ (corrected error for DEU & CZE)
- a402 (corrected error for POL)
- a149 (corrected error routing error in NOR)
- a344 (corrected error routing error in NOR)
- a256\_ (corrected error for POL & GEO)

#### IMPROVEMENTS INTRODUCED WITH V.4.2. (February 2014):

The update from v4.1 to v4.2 does not include corrections of existing variables.

The update only includes additional variables which are derived from the pre-existing datasets

- Variables derived from grid variables and variables which concern the respondents and his/her partner: numdissol numdivorce nummarriage numpartners livingwithpartner childprevp femage maleage femeduc maleeduc fertintnt numbiol numres numnonres numstep numallchild ageyoungest ageoldest numrespleave numotherparentleave coreschild coresparen coresgrandp coressibl.

- Variables derived from month and year variable:

a808Dur a822Dur a907Dur a911Dur a914Dur; a303cAgeP a315AgeP a316cAgeP a374cAgeP a608AgeP a610AgeP a617bAgeP a621AgeP a914AgeP a941AgeP; a107AgeR a121AgeR a150AgeR a239aAgeR a239bAgeR a240AgeR a301AgeR a302bAgeR; a311AgeR a314bAgeR a314dAgeR a371AgeR a372bAgeR a603AgeR a608AgeR a610AgeR a613AgeR a614AgeR a619AgeR a621AgeR a816AgeR a822AgeR a871AgeR a5116AgeR a5117bAgeR; a302bTdiff a314bTdiff a314dTdiff a372bTdiff.

- Variables derived from hours and minutes variables: a324\_hour a520\_hour a540\_hour.

- Variables derived from frequency and unit variables:

a205mnth,a241mnth,a325mnth,a355mnth,a359mnth,a363mnth,a367mnth,a521mnth,a541mnth,a1008mnth,a1102mnth; a203c\_?w a204c\_?w.

- Occupation variables recoded into ISCO-88 1 digit: a828\_1dig a832\_1dig a861\_1dig a917\_1dig a921\_1dig a933\_1dig a5112\_1dig a5114\_1dig.

#### IMPROVEMENTS INTRODUCED WITH V.4.1. (April 2012):

- Variables corrected: amarstat, anpartner, ankids, a5115, a622 (routing now corrected, with consequences for valid responses on subsequent variables), a626, a874(routing erroneous)

- Variables now available: a203cu\_\*, a204cu\_\*

- User Missing value now labeled: a384, a720, a828, a866\*, a867\_1601, a938\*, a939\*

#### IMPROVEMENTS INTRODUCED WITH V.4.0 (March 2012):

- New constructed variables: asex, aage, abyear, aeduc, aactstat, aparstat, amarstat, anpartner, ankids, ahhsiz, ahhtype

- New consolidated variables on respondents' current activity: a870, a871m, a871y, a873, a874, a875

- New consolidated variables on respondents' partners current activity: a940, a945

- Variables corrected: a383 (age of current partner now rounded), a602 (corrected, with consequences on response rate to subsequent questions), a612, a622, a624, a625, a626, a627\*, a628\*, a629\*

#### IMPROVEMENTS INTRODUCED WITH V.3.0 (October 2010):

- New consolidated variables: a370, a383, a384

- Variables renamed: a203c\_1u...`i'u and a204c\_1u...`i'u renamed into respectively a204c\_1u...`i'u and a204cu\_1...`i'

- Variables for which country-specific values are recoded into GGS values: a148, a308, a379, a5113, a5115 (now these variables have ISCED categories).

- Other changes in variable values: a1003 and a1004 were previously coded as first, second, third... mentioned, now they are coded per item as a yes/no question.

- Variables that are not country-specific anymore: a408\_`i'

FIRST DATASET RELEASED: V. 1.8. (March 2010).

#### **Processing Checks**

WAVE 1 DATA HARMONISATION

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

#### 1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

#### 2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("\_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3\_# or bhg3\_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

#### 3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

#### 4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

#### 5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

#### 6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

#### **Missing Data**

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

### **GGG\_Wave2\_Hungary\_V.1.3.**

<b># Cases</b>	10641
<b># Variable(s)</b>	1186
<b>File Structure</b>	Type: relational Key(s): arid (R identification number (W2))

**File Content**

## GGG Wave 2

VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.

Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.

The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.

Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.

Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.

A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119\_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".

**Version**

Harmonized dataset, GGS Wave2, version 1.3.

**IMPROVEMENTS INTRODUCED WITH GGS\_Wave2\_V.1.3 (August 2016)**

Correction of the following variables that were previously erroneous: b343\_\*, bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage.

**IMPROVEMENTS INTRODUCED WITH GGS\_Wave2\_V.1.2 (April 2015)**

The update from v1.1 to v1.2 does not include corrections of existing variables. The update only includes additional variables which are derived from the pre-existing datasets.

- Variables derived from grid variables and variables which concern the respondents and his/her partner: bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage, bnumpartnerships, bnumpartnerships, bnrespartafterw1, blivingwithpartner, bchildprevp, bnchildprevp, bfemage, bmaleage, bfemeduc, , bmaleeduc, bfertint, bnumbiol, bnumnonres, bnumres, bnumstep, bnumallchild, bageoldest, bageyoungest, bcoreschild, bcoresgrandp, bcoresparen, bcoressibl, bhhtype.

- Variables derived from month and year variable: b121AgeR, b150AgeR, bn152AgeR, b239aAgeR, b239bAgeR, b240AgeR, bn304Agb303cAgeP, b311AgeR, b315AgeP, b316cAgeP, b371AgeR, b372bAgeR, b372bTdiff, b374cAgeP, b5116AgeR, b5117bAgeR, b603AgeR, b608AgeP, b608AgeR, b610AgeP, b610AgeR, b621AgeP, b621AgeR, b871AgeR, b907Dur, b911Dur, b914AgeP, b914Dur, b941AgeP.

- Variables derived from hours and minutes variables: b324hour, b520hour, b540hour, b221hour\_x.

- Variables derived from frequency and unit variables: b203c\_xw, b204c\_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth.

- Occupation variables recoded into ISCO-88 1 digit: b828\_1dig, b832\_1dig, b861\_1dig, b917\_1dig, b921\_1dig, b933\_1dig.

- Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnumworkstatuses, bnumstudentstatuses, bnumemplstatuses, bnumselfemplstatuses, bnumhelpfamstatuses, bnumunemplstatuses, bnumretiredstatuses, bnummilitarystatuses, bnumhomestatuses, bnummatleavestatuses, bnumparleavestatuses, bnumdisabilitystatuses, bnumotherstatuses, bnum1401, bnum1501, bnum1801, bnum1301, bnumparttime, bnumfulltime, bnumboth, bnumparttime\_1801, bnumparttime\_1802, bnumpartfulltime\_1803, bnumfulltime\_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses,

bndurselfemplstatuses, bndurhelpfamstatuses, bndurunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses, bndurhomestatuses, bndurmatleavestatuses, bndurparleavestatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876\_xAgeR, bn877\_xAgeR, bn878xAgeR, bn879\_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

IMPROVEMENTS INTRODUCED WITH V.1.2. in Nesstar GGS micro data files (April 2015):

Publication of variables that were previously deleted before dataset release in Nesstar. The following variables are concerned: grid variables, month and year variables, hours and minutes variables, frequency and unit variables, and occupation variables.

FIRST DATASET RELEASED: V.1.1. (November 2013).

#### **Processing Checks**

WAVE 2 DATA HARMONISATION: see "Extent of Processing Checks" "WAVE 1 DATA HARMONISATION".

#### **Missing Data**

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

#### **Notes**

WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

### **GGG\_Wave3\_Hungary\_V.1.0**

<b># Cases</b>	8103
<b># Variable(s)</b>	1514
<b>File Structure</b>	Type: relational Key(s): arid (R identification number)

#### **File Content**

GGG Wave 3

Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Activity and Education History, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.

The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave, and "c" for wave 3). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.

Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.

Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.

A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119\_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".

### **Producer**

The file is produced centrally by the Netherlands Interdisciplinary Demographic Institute (NIDI, The Netherlands), in collaboration with the Survey Department of the "Institut national d'études démographiques" (INED, France).

### **Version**

Harmonized dataset, GGS Wave3, version 1.

### **Processing Checks**

#### **DATA HARMONISATION**

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

#### 1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

#### 2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("\_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3\_# or bhg3\_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

#### 3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

#### 4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

#### 5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

#### 6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.

- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

### **Missing Data**

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

### **Notes**

WAVE 3 DATASETS - Main differences compared to WAVE 2 dataset

Wave 3 datasets include an additional variables in the section "2. Children" subsection "grandchildren".

WAVE 3 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 and Wave 3 questionnaire are named identically. Wave 3 variable names start with the letter "c" whereas Wave 2 variable names start with the letter "b" and Wave 1 variables with letter "a". Variables that have not been implemented in the previous waves but were collected in Wave 3 begin with "cn".

In Wave 3 datasets published in Nesstar, the variable "crid - R identification number" has been renamed into "arid" (same variable name than Wave 1 & 2). This allows the user to merge Wave 1, Wave 2 and Wave 3 datasets in Nesstar.

In Wave 3 datasets published in Nesstar, variable labels have the indication "(W3)". This allows the user to distinguish Wave 3 variables from Wave 1 and Wave 2 variables, on the basis of the variable labels.

### # amonth: Mnth of interview

**Information** [Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=\*/97/98/99]

**Statistics [NW/ W]** [Valid=13540 /-] [Invalid=0 /-]

**Definition** Q 001

**Pre-question** Interviewer Instruction: Write in the time and date when the interview starts.

**Literal question** Interview started at...on...

**Interviewer's instructions** Interviewer Instruction: Read the following text.  
This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know.

**Definition** Consolidated variables.

**Notes** Copied from var. a148 (Q 120 core questionnaire).

Value	Label	Cases	Percentage
0	iscsd 0 - pre-primary education	40	0.3%
1	iscsd 1 - primary level	755	5.6%
2	iscsd 2 - lower secondary level	2576	19.0%
3	iscsd 3 - upper secondary level	3723	27.5%
4	iscsd 4 - post secondary non-tertiary	4264	31.5%
5	iscsd 5 - first stage of tertiary	2182	16.1%
6	iscsd 6 - second stage of tertiary	0	
96	unknown	0	
97	does not know	0	
98	refusal	0	
99	no response/not applicable	0	

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

### # amarstat: Marital Status Respondent

**Information** [Type= discrete] [Format=numeric] [Range= 0-2147483625] [Missing=\*/6]

**Statistics [NW/ W]** [Valid=12950 /-] [Invalid=590 /-]

**Definition** Consolidated variable.

**Notes** Generated using the following variables:  
 - a333, a310, for "never married".  
 - a335a\_\*, a302a, a314a, a314c, a310, for "married" (at least once),  
 - a343\_\* for "widowed",  
 - a349a\_\* for "divorced" (If variables a349\_\* are missing, variables a343\_\* are used instead, assuming breaks-up equal to divorce).

Value	Label	Cases	Percentage
1	never married	2542	19.6%
2	married	7829	60.5%
3	divorced	1198	9.3%
4	widowed	1381	10.7%
6	unknown	590	

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

### # ankids: Number of children Respondent

**Information** [Type= discrete] [Format=numeric] [Range= 0-14] [Missing=\*/96]

**Statistics [NW/ W]** [Valid=13540 /-] [Invalid=0 /-]

**Definition** Consolidated variable.

**Notes** Generated using consolidated variables a256\_\*.

### # femage: If partnered: age of female

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 14-85] [Missing=*]
<b>Statistics [NW/ W]</b>	[Valid=4973 /-] [Invalid=8567 /-]
<b>Definition</b>	Derived variable
<b>Universe</b>	If R has a partner
<b>Notes</b>	This variable indicates the age of the female in the relationship if the respondent says that they are currently in a relationship. If the respondent is female then the respondents age is used (aage.)

## File : GGS\_Wave1\_Hungary\_V.4.3.

### # femage: If partnered: age of female

If the respondent is male and in a relationship with a female then their age is derived depending on the nature of the relationship. For a resident partner the age was copied from the Household grid (ahg5\_); for a non resident partner the age was calculated as: year of interview MINUS question 311 (variable a315y).  
 Rs with non-resident partners are coded with "999 - not applicable/no response", when variable a315y is not available in the dataset.  
 Note that this variable does not have a value for same-sex partnerships.

### # femeduc: If partnered: level of education of female

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-2147483624] [Missing=*/97/98/99]
<b>Statistics [NW/ W]</b>	[Valid=4973 /-] [Invalid=8567 /-]
<b>Definition</b>	Derived variable
<b>Universe</b>	If R has a partner
<b>Notes</b>	<p>This variable indicates the education level of the female in the relationship if the respondent says that they are currently in a relationship. If the respondent is female then the respondents education level is used (aeduc.)</p> <p>If the respondent is male and in a relationship with a female then their partners education level is derived depending on the nature of the relationship. For a resident partner the education level was copied from question 120 (variable a148) or question 304 (variable a308); for a non resident partner the education was copied from question 120 (variable a148) or question 313 (variable a321).</p> <p>Rs with non-resident partners are coded with "99 - not applicable/no response", when variable a321 is not available in the dataset.</p> <p>Note that this variable does not have a value for same-sex partnerships.</p>

Value	Label	Cases	Percentage
0	iscsd 0 - pre-primary education	17	0.3%
1	iscsd 1 - primary level	229	4.6%
2	iscsd 2 - lower secondary level	1033	20.8%
3	iscsd 3 - upper secondary level	1031	20.7%

<b># a301AgeR: R's age at start of living with current partner</b>			
<b>Information</b>		[Type= discrete] [Format=numeric] [Range= 1-74] [Missing=*/997/998/999]	
<b>Statistics [NW/ W]</b>		[Valid=7751 /-] [Invalid=5789 /-]	
<b>Definition</b>		Derived variable from Q 301 core questionnaire	
<b>Universe</b>		If R lives together with a partner	
<b>Literal question</b>		In what month and year did you and he/she first start living together?	
<b>Notes</b>		R's time of birth was deducted from HH grid. If information on the month of birth / month when started living with current partner was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

### # a871AgeR: R's age at start of current activity status

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-73] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=4110 /-] [Invalid=9430 /-]
<b>Definition</b>	Generated from consolidated variables a871m and a871y.
<b>Literal question</b>	In what month and year did you start this leave? In what month and year did you become unemployed? Since what month and year are you a student, studying at school, or in vocational training? In what month and year did you retire? Since what month and year are you a homemaker? In what month and year did you start this job or business?
<b>Notes</b>	R's time of birth was deducted from HH grid. If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"  This variable is not available for Belgium.

# a1008: Average net income of all hh members during last 12 mnths	
<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/99999997/99999998/99999999]
<b>Statistics [NW/ W]</b>	[Valid=7108 /-] [Invalid=6432 /-]
<b>Definition</b>	Q 1008 core questionnaire
<b>Literal question</b>	If you add up the income from all sources received during the last 12 months, what is your household's total net income from all members including yourself? Please state the net income, which means after deductions for taxes and social security.
<b>Post-question</b>	Write in. If R gave the answer per month, probe: Does this sum describe the average income of your household over the last 12 months? [If not] Please tell me the average value over the last 12 months.

**# a1008mnth: Average monthly net income of all HH members (last 12 months)**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-10225] [Missing=*/99999997/99999998/99999999]
<b>Statistics [NW/ W]</b>	[Valid=7108 /-] [Invalid=6432 /-]
<b>Definition</b>	Derived variable from Q 1008 core questionnaire
<b>Literal question</b>	If you add up the income from all sources received during the last 12 months, what is your household's total net income from all members including yourself? Please state the net income, which means after deductions for taxes and social security.
<b>Post-question</b>	Write in. If R gave the answer per month, probe:

**# a1008mnth: Average monthly net income of all HH members (last 12 months)**

Does this sum describe the average income of your household over the last 12 months? [If not] Please tell me the average value over the last 12 months.

**Notes** Frequencies per year were converted to frequency per month. Values have been rounded to 1/10; values exceeding 1 have been rounded to the nearest integer.

Definition Q 001

Pre-question Interviewer Instruction: Write in the time and date when the interview starts.

Literal question Interview started at...on...

Interviewer's instructions Interviewer Instruction: Read the following text.

This survey is a continuation of the Generations and Gender Survey in which you participated three years ago. It is part of an international programme co-ordinated by the UN Economic Commission for Europe. An interesting feature of our research is that it tries to follow the lives of people over a long period of time.

The aim of this research is to learn more about the everyday life, circumstances, and opinions of people and families. We want to gather information about the factors that influence the formation of new families, childbearing and preparation for old age. We also want to gather information about the lives of the young, middle-aged and old generations. This survey will show how people's life and family circumstances have changed over time, which will improve understanding of impediments of family life and relations of generations and help to develop policies for the future.

Each person's answer is very important to us, because each person who was visited and questioned represents a particular group of our society. Therefore, although they were randomly selected, the participants of this survey proportionally represent all of the inhabitants of this country. That is why it is important to question the same people again this time.

We will hold the information you give us in the strictest confidence, and use it only for statistical processing. If possible, it would be better if we could have this interview without others being present.

0	iscsd 0 - pre-primary education	27	0.3%
1	iscsd 1 - primary level	527	5.0%
2	iscsd 2 - lower secondary level	2005	18.9%
3	iscsd 3 - upper secondary level	5496	51.7%
4	iscsd 4 - post secondary non-tertiary	288	2.7%
5	iscsd 5 - first stage of tertiary	2248	21.1%
6	iscsd 6 - second stage of tertiary	44	0.4%
1101	secondary education level (all kinds)	0	
1401	still pupil	0	
1402	still in training	0	
1403	other education	0	
1501	0 - isced97	0	
1502	1-2 - isced97	0	
1503	3A - isced97	0	
1504	3B - isced97	0	
1505	3C - isced97	0	
1506	5A-6 - isced97	0	
1507	5B - isced97	0	
1701	iscsd 5A-6	0	
1702	iscsd 5A	0	
1703	iscsd 5A-5B	0	
96	unknown	6	

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

### # bactstat: Activity Status Respondent (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-2601] [Missing=*/96]		
<b>Statistics [NW/ W]</b>	[Valid=10614 /-] [Invalid=27 /-]		
<b>Definition</b>	Consolidated variable.  Country-specific additional values: - DEU: "1401-maternity/parental leave", "1402-employed or self-employed". - FRA: "1501-in apprenticeship or paid training", "1502-employed or self-employed". - GEO: "1301-on maternity leave, parental leave or child-care leave". - POL: "2601-maternity leave".		
<b>Notes</b>	Copied from variable b801. Labels Wave 2 != Wave 1		
Value	Label	Cases	Percentage
1	student, in school, in vocational training	32	0.3%
2	employed	4645	43.8%
3	self-employed	579	5.5%
4	helping family member in a family business or farm	8	0.1%
5	unemployed	483	4.6%
6	retired	3220	30.3%
7	in military or social service	0	
8	homemaker	108	1.0%
9	maternity leave	187	1.8%

## File : GGS\_Wave2\_Hungary\_V.1.3.

### # bactstat: Activity Status Respondent (W2)

Value	Label	Cases	Percentage
10	parental leave, care leave	203	1.9%
11	ill or disabled for a long time or permanently	939	8.8%
12	other status	210	2.0%
1301	on maternity leave, parental leave or child-care leave	0	
1401	maternity/parental leave	0	
1402	employed or self-employed	0	
1501	in apprenticeship or paid training	0	
1502	employed or self-employed	0	
2601	maternity leave	0	
96	unknown	27	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # bparstat: Current Partner Status (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-3] [Missing=*/6]
<b>Statistics [NW/ W]</b>	[Valid=10641 /-] [Invalid=0 /-]
<b>Definition</b>	Consolidated variable.
<b>Notes</b>	Copied from consolidated variable b370.

Value	Label	Cases	Percentage
1	co-resident partner	7081	66.5%
2	non-resident partner	437	4.1%
3	no partner	3123	29.3%
6	unknown	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # bmarstat: Marital status respondent (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-1501] [Missing=*/6]
<b>Statistics [NW/ W]</b>	[Valid=10290 /-] [Invalid=351 /-]
<b>Definition</b>	Consolidated variable. FRA, one additional value "1501-In Divorce Process".
<b>Notes</b>	Generated using the following variables: - amarstat (code 1), for "never married". - b335a_*, bn301, bn302, bn303, for "married" - b343_*, bn301, bn305, for "widowed", - b349a_*, bn301, bn305, for "divorced".

Value	Label	Cases	Percentage
1	Never Married	1622	15.8%
2	Married	6299	61.2%
3	Divorced	1033	10.0%
4	Widowed	1336	13.0%
1501	In Divorce Process	0	
6	unknown	351	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # bnpartner: Number of co-resident partners (incl. current one) Respondent (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-19] [Missing=*/96]
--------------------	--

## File : GGS\_Wave2\_Hungary\_V.1.3.

### # bnpartner: Number of co-resident partners (incl. current one) Respondent (W2)

Statistics [NW/ W] [Valid=10641 /-] [Invalid=0 /-]

Definition Consolidated variable.

Notes Generated using variables b343\_\*, a370 and bn305.

Value	Label	Cases	Percentage
0		906	8.5%
1		7508	70.6%
2		1733	16.3%

**# bndurstudentstatuses: Total duration (in month) of Rs working statuses as student, in school, in vocat (W2)**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-768] [Missing=* /997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=3907 /-] [Invalid=6734 /-] [Mean=48.804 /-] [StdDev=36.559 /-]
<b>Definition</b>	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
<b>Literal question</b>	When did this period of [activity] start? When did this period of [activity] end?
<b>Notes</b>	Total duration (in month) of Rs working statuses as student, in school, in vocational training since age 16 (code 1 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

**# bndurselfemplstatures: Total duration (in month) of Rs working statuses as self employed since age 16 (W2)**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-744] [Missing=* /997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=1002 /-] [Invalid=9639 /-] [Mean=109.145 /-] [StdDev=78.256 /-]
<b>Definition</b>	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
<b>Literal question</b>	When did this period of [activity] start? When did this period of [activity] end?
<b>Notes</b>	Total duration (in month) of Rs working statuses as self employed since age 16 (code 3 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.
