|-----------------------|-------------|
| Identification | GGSW1.W2.21 |
|-----------------------|-------------|

Abstract

The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.

In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion".

The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:

- Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets.
- A broad age range. It includes respondents between the ages of 18 and 80.
- A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals.
- A large sample size. It has an average of 9,000 respondents per country at Wave 1.
- A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior.
- Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.

Scope & Coverage

| | |
|-----------------|--|
| Keywords | Fertility, Partnership, Transition to adulthood, Work-family balance, Gender relations, Intergenerational exchanges, Informal and formal care, Well-being and health, Grandparenthood, Economic activity, Retirement |
|-----------------|--|

| | |
|-----------------------|-----------|
| Time Period(s) | 2008-2013 |
|-----------------------|-----------|

| | |
|------------------|---------|
| Countries | Austria |
|------------------|---------|

Geographic Coverage

Whole territory of Austria.

Universe

WAVE 1

Sufficiently German speaking men and women aged 18-45 on July 1st 2008 living in private households in Austria.

WAVE 2

Sufficiently German speaking men and women aged 18-49 (Wave 1 respondents + refreshers) on September 1st 2012 living in private households in Austria.

Concerning panel respondents: panel survival: 78%; age range 22-49

Sampling

Sampling Procedure

WAVE 1 SAMPLING PROCEDURE

1. Sampling frame

1.1 Type of frame: A real random sample of individuals (1) within the targeted age ranges (2) living in private households, drawn from the central national population register (Zentraler Melderegister; MR).

1.2 Frame coverage: As the sample was drawn from the central register, we should have full coverage. Some people who had moved in-between date of sampling (July 2008) and survey (September 2008-February 2009) were harder to identify; additional procedures had to be engaged (passing the updated contact information to another interviewer, who is responsible for this region) but even some of them could be found and interviewed. Nobody should be excluded a-priori.

1.3 Frame size: 9,006.

1.4 Level of units available: Individuals.

2. Sampling method

2.1 Sampling method type: SRS (Simple Random Sampling).

2.2 Sampling stage definition

- PSU: Individuals aged 18-45.

- SSU: NA.

- TSU: NA.

2.3 Sampling stage size

- PSU: 9,006.
- SSU: NA.
- TSU: NA.

2.4 Unit selection: Random number generator.

2.5 Final stage unit selection: SRS (Simple Random Sampling).

2.6 Within Household unit selection: Random selection is based on registered individuals (see above). Selection did not depend on any household characteristics.

2.7 Stratification: Explicit - by design we draw 60% women and 40% men (3000 : 2000 in net sample).

2.8 Sample size:

- Starting size sample: Gross sample size: 9,006; Net sample size: 5,000 (not all addresses within the gross sample needed to be contacted).

- Aimed total size at Wave 1: 5,000 (Age range: 18-45).

- Aimed total size at Wave 3: 4,050 cases with full panel information expected.

2.9 Estimated Non-response

- Initial non-response: 36%.

- Yearly attrition: We expect about 12% attrition in the second wave, and 8% at the third wave. At the end of the interview, wave 1, 96% agreed to be interviewed again.

- Non response measures: Oversampling

- Within household non-responses measures: None.

WAVE 2 SAMPLING PROCEDURE

1. Sampling frame

1.1 Type of frame: (1) panel sample: each Wave 1 respondent still living in Austria was recontacted, 78% panel survival; (2) refresher sample: young adults aged 18-22 (not targeted in Wave 1) taken in (3) refreshers of age cohorts that showed low panel survival.

ATTENTION: Just panel respondents are included in the harmonised datafile. The full file (panel + refreshers) can be obtained on request from ggp@oif.ac.at.

SO, FOR USERS OF THE HARMONISED FILE, THE RELEVANT INFORMATION ON SAMPLE SIZE IS SHOWN IN (1) BELOW !

1.2 Frame coverage: (2) and (3) based of central national population register (Zentraler Melderegister, ZMR)

1.3 Frame size: (1) 5000, (2) 1372, (3) 128.

1.4 Level of units available: Individuals.

2. Sampling method

2.1 Sampling method type: (2) and (3) SRS (Simple Random Sampling); (1) drawn by SRS for wave 1.

2.2 Sampling stage definition

- PSU: Panel Sample

- SSU: Individuals 18-22 (refresher sample)

- TSU: Individuals (females; higher age cohorts)

2.3 Sampling stage size

- PSU: 6720

2.4 Unit selection: (2 & 3) Random number generator.

2.5 Final stage unit selection: SRS (Simple Random Sampling).

2.6 Within Household unit selection: Random selection is based on registered individuals (see above). Selection did not depend on any household characteristics.

2.7 Stratification: Explicit - by design we draw 60% women and 40% men in wave 1. sample (2) also 60% women 40% men.

2.8 Sample size:

- Starting size sample:

- Aimed total size at Wave 1: 5000

- Aimed total size at Wave 3: 3400

2.9 Estimated Non-response

- Initial non-response: 42%

- Yearly attrition: Attrition had become higher as expected. We nearly had 22% panel mortality. This was partly due to the fact that the interval between the panel waves had widened up to 4 years!

- Non response measures: Incentives, additional sampling for cohorts with higher panel mortality

- Within household non-responses measures: None.

Response Rate**WAVE 1**

Response rate - Final disposition codes:

I = complete interview: 5,000

P = partial interview: 132

NE = non-eligible : 769

NC = non-contact : 867

R = refusal: 1943

O = other non-response: 295

UC = unknown eligibility, contacted

UC = unknown eligibility, non-contact: 867

Note: As we know that all persons randomly selected (by sex & age) from the population register in the gross sample are/ should be eligible, our missing-codes do not differentiate between these two UC ("unknown eligibility").

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: NA

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: NA

Overall response rate: 60.7%.

WAVE 2

FOR USERS OF THE HARMONISED FILE (including only panel respondents), THE RELEVANT INFORMATION ON FINAL DISPOSITION CODES IS SHOWN IN (1) BELOW!

I = complete interview: (1) 3912 (2) 763 (3) 54

P = partial interview: no stastics on this group; summarized together with R (refusals)

NE = non-eligible : 0

NC = non-contact : (1) 57 (2) 84 (3) 0

R = refusal: (1) 707 (2) 387 (3) 56

O = other non-response: (1) 0 (2) 8 (3) 0

UC = unknown eligibility, contacted: 0

UC = unknown eligibility, non-contact: (1) 324 (2) 21 (3) 1

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: 0

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: 0

ATTRITION BETWEEN WAVE 1 AND WAVE 2

The Austrian GGS panel has a relatively low dropout (22%) and is affected by a small bias towards family-oriented persons as well as less-educated respondents and persons with migration backgrounds, but the data can be used without concern about selectivity.

Isabella Buber-Ennsner, Attrition in the Austrian Generations and Gender Survey: Is there a bias by fertility-relevant aspects?, Demographic Research (31), 2014, 459-496.

Weighting**WAVE 1**

Yes, asymptotic weightig procedures:

- step1: age[1] * sex; labour market participation * sex * age[5]

- step2: Land of origin; form of (co)habitation

- step3: Parity of women.

Two weighting variables:

1) Weight: Standardized weight based on the country specific population weight (recommended for use) .

2) Population Weight: Country specific population weight.

WAVE 2

Yes, asymptotic weightig procedures:

step1: age[1] * sex; labour market participation * sex * age[5]

step2: Land of origin; form of (co)habitation

step3: Parity of women.

| Data Collection | |
|--|--|
| Data Collection Dates | WAVE 1: start 2008-09-15 WAVE 1: end 2009-02-15 WAVE 2: start 2012-09-22 WAVE 2: end 2013-05-27 |
| Data Collection Mode | Method: Face-to-Face (personal interview) Technique: Computer-Assisted (CAPI) |
| Data Collection Notes | |
| <p>WAVE 1 DATA COLLECTION</p> <p>1. Interviewers</p> <p>1.1 Total number of interviewers: 153</p> <p>1.2 Number of interviewers in the field: No exact information about that. Basically, we worked with the same staff for the whole period. In November 2008 about 30 interviewers were taken in additionally.</p> <p>1.3 Network organization: Centralized.</p> <p>1.4 Working arrangement of interviewers: Contracted, no students, experienced professionals.</p> <p>1.5 Payment of interviewers: Per interview.</p> <p>2. Interviewer training</p> <p>2.1 General interviewing: We had spent a whole day on GGS-training; main points of agenda [1] programme presentation (GGP, what for ~2 hrs); [2] presentation of instrument (CAPI-demo; ~3 hrs); [3] special small group training and interview simulation for the most sensitive parts of the interview ~ up to 4 hrs.</p> <p>2.2 Survey specific: See above.</p> <p>2.3 Length: See above.</p> <p>2.4 Control of performance: Control of performance: Path following routine within CAPI; automated tests within CAPI; 5% were checked by recontacting; just 1 interview was discovered as faked. Another interviewer had interviewed the identically named father instead of the son.</p> <p>2.5 Interviewer survey: Yes, see above.</p> <p>3. Contact protocols</p> <p>3.1 Advance letter: Yes; two letters, one by STAT-office, the other by the Federal Minister of family affairs.</p> <p>3.2 Cold contacts: (1) Letters, (2) Telephone to arrange date and time of the interview, (3) Face-to-face-interview.</p> <p>3.3 Scheduling / scattering: Arrangement of date & time was within responsibility of the interviewer.</p> <p>3.4 Contact history: Yes, within the data production file.</p> <p>3.5 Min number of contacts: No.</p> <p>3.6 Max number of contacts: Not prescribed, just recommended (5-8 times, depending on household composition, sex & age of respondent, region).</p> <p>4. Questionnaire localization</p> <p>4.1 Validation: No.</p> <p>4.2 Pre-test: Yes. Some country-specific answers were added in the questionnaire. As to the pilot, Germany conducted the survey in December 2005, the surveys are quite identical, so the Germans "executed our pilot". Intensive checks and simulations were made regarding the CAPI-programme, about 30 test-interviews were conducted, but not a pilot study in it's formal sense.</p> <p>4.3 Length of interview: 64 minutes (average mean); 60 minutes (median). Respondents were "paid" with a supermarket-cheque (€15,-). We developed a small questionnaire with specific questions for the partner and recommended that the partner should fill in this written questionnaire in another room, if possible. We had special trainings on the sensitive questions.</p> <p>WAVE 2 DATA COLLECTION</p> <p>1. Interviewers</p> <p>1.1 Total number of interviewers: 146</p> <p>1.2 Number of interviewers in the field: All interviewers were in for the whole field phase.</p> <p>1.3 Network organization: Centralized.</p> <p>1.4 Working arrangement of interviewers: Contracted, no students, experienced professionals.</p> | |

1.5 Payment of interviewers: Per interview.

2. Interviewer training

2.1 General interviewing: We had a whole training day, where we (1) presented the GGS2 programme (most interviewer also were in GGS1)[2:30 h] (2) presented the CAPI-demo [1:30], (3) had small workings groups for CAPI-based simulation of most sensitive parts of the questionnaire [3:30] and (4) had specialized training units for F2F interviewing the most sensible parts [up to 2h]

2.2 Survey specific: See above

2.3 Length: See above

2.4 Control of performance: Path following routine within CAPI; automated tests within CAPI; 5% were checked by recontacting; no interview was discovered as faked. Ex post we had to eliminate 6 cases, where obviously another person had been interviewed in wave 1.

2.5 Interviewer survey: Yes, see above.

3. Contact protocols

3.1 Advance letter: Letter by STAT

3.2 Cold contacts: (1) Letters, (2) Telephone to arrange date and time of the interview, (3) Face-to-face-interview.

3.3 Scheduling / scattering: NA

3.4 Contact history: Yes, within the data production file.

3.5 Min number of contacts: No.

3.6 Max number of contacts: Not prescribed, just recommended (5-8 times, depending on household composition, sex & age of respondent, region).

4. Questionnaire localization

4.1 Validation: No.

4.2 Pre-test: We had several test interviews to some dozens of real persons. In addition, we held test interviews (role play) between the 147 interviewers, especially in the sections of the questionnaire that were rather complicated.

4.3 Length of interview: Length of interview: 65 minutes (average mean); 64 minutes (median). Respondents were "paid" with a supermarket-cheque (€20,-). We developed a small questionnaire with specific questions for the partner and recommended that the partner should fill in this written questionnaire in another room, if possible. We had special trainings on the sensitive questions.

Questionnaires

Structured questionnaire in German. It was used the German version as translated for German GGS, with some modifications due to language differences between the two countries.

Data Collector(s)

Statistics Austria (STAT)

Supervision

WAVE 1

1. Dealing with nonresponse

1.1 Screening: Yes, by the first questions the information imputed from the central register was checked.

1.2 Refusal conversion: Basically, the respondents showed a high grade of cooperativeness. For some items the non-response rate is significantly higher, but that's a respondent's decision we have to accept.

1.3 Incentives: Yes (supermarket cheque of €15,-).

2. Tracking of sampled units

2.1 Respondent contact information: Yes, some contact details of the respondent were collected.

2.2 Other contact information: No.

2.3 Cards: A "thank-you-letter" was sent to all the respondents. As Austria has a very good and recent centralized registration system (Zentraler Melderegister), we are in the position to follow the respondent within Austria. Just for verifying, we also send christmas greeting cards etc. to get aware of some emigrants etc. (the central register will give us the addresses of all respondents that have moved within Austria. So, we still cannot catch the emigrated, but we are keeping track of the within-Austria-migration).

2.4 Additional surveys: None.

2.5 Administrative records: Yes, again part of production file; Respondent-ID <= Status change.

WAVE 2**1. Dealing with nonresponse**

1.1 Screening: Yes, by the first couple of questions the information imputed from the central register and/or wave 1 was checked.

1.2 Refusal conversion: Basically, the respondents showed a high grade of cooperativeness. For some items the non-response rate is significantly higher, but that's a respondent's decision we have to accept.

1.3 Incentives: Yes (supermarket cheque of €20,-).

2. Tracking of sampled units

2.1 Respondent contact information: Yes, some contact details of the respondent were collected. As we can follow the respondents within Austria by the Austrian central register, we should find them again. In fact we just had a handful of blanks from wave 1 - one had died, two were institutionalized (prison, rehab) and some have emigrated.

2.2 Other contact information: No.

2.3 Cards: A "thank-you-letter" was sent to all the respondents. As Austria has a very good and recent centralized registration system (Zentraler Melderegister), we are in the position to follow the respondent within Austria. Just for verifying, we also send christmas greeting cards etc. to get aware of some emigrants etc. (the central register will give us the addresses of all respondents that have moved within Austria. So, we still cannot catch the emigrated, but we are keeping track of the within-Austria-migration).

2.4 Additional surveys: No.

2.5 Administrative records: Yes, see above.

Data Processing & Appraisal**Data Editing****WAVE 1**

We had some automated consistency checks during the CAPI-interview. After completion the ex-post consistency checks were activated, like some family relations, starting + ending dates, etc.

WAVE 2

Data was compared to wave 1 so as to detect and correct inconsistencies. This was done for reported number of children and information on partners. In case of inconsistencies, wave 2 data was replaced with wave 1 data. In few cases, data should be corrected in wave 1 datafile instead. Discrepancies on partnership histories and employment histories were not corrected.

In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p> | |
| <p><u>Version</u> Harmonized dataset, GGS Wave1, version 4.3.</p> <p>IMPROVEMENTS INTRODUCED WITH V.4.3. (August 2016): Variables corrected with Version 4.3.</p> <ul style="list-style-type: none"> - fertintent (no more ambiguous labelling) - a1101 (corrected error in coding) - aweight (now available also for NLD CZE SWE POL) - aregion (now available also for HUN) - aplace (now available also for HUN) - a5112 (corrected routing error for ROU) - a5113 (corrected routing error for ROU) - a5114 (corrected routing error for ROU) - a5115 (corrected routing error i for ROU) - a211b_ (corrected error for POL & GEO) - ankids (corrected error for POL & GEO) - a1008mnth (corrected error for NGR & BEL) - a108 (now available for SWE) - a109_1 (now available for SWE) | |

events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

File Content

GGG Wave 2

VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.

Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Activity and Education

History, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.

The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.

Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.

Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.

A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".

Version

Harmonized dataset, GGS Wave2, version 1.3.

IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.3 (August 2016)

Correction of the following variables that were previously erroneous: b343_*, bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage.

FIRST DATASET RELEASED: V.1.2. (April 2015).

Processing Checks

WAVE 2 DATA HARMONISATION: see "Extent of Processing Checks" "WAVE 1 DATA HARMONISATION".

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

Notes

WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

Variables List

Dataset contains 2704 variable(s)

Definition Q 001

Pre-question Interviewer Instruction: Write in the time and date when the interview starts.

Literal question Interview started at...on...

Interviewer's instructions Interviewer Instruction: Read the following text.
This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know.

asex: Sex Respondent

| | |
|---------------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 1-2147483625] [Missing=*/6] |
| Statistics [NW/ W] | [Valid=5000 /-] [Invalid=0 /-] |
| Definition | Consolidated variable. |
| Notes | Copied from the Household grid (variable ahg4_1). |

| Value | Label | Cases | Percentage |
|-------|---------|-------|------------|
| 1 | male | 1999 | 40.0% |
| 2 | female | 3001 | 60.0% |
| 6 | unknown | 0 | |

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

ahhtype: Household type Respondent

| | |
|--------------------|--|
| Information | [Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/96] |
|--------------------|--|

File : GGS_Wave1_Austria_V.4.3.

ahhtype: Household type Respondent

Statistics [NW/ W] [Valid=5000 /-] [Invalid=0 /-]

Definition Consolidated variable.

Notes
Generated from household grid (variables ahg3_*).
Respondents' households were classified into groups according to the criteria explicated below.
1 "living alone":
If the HH grid contains only R (hsize=1).
2 "single parent":
If HH grid contains R, at least one child (codes 2-6), and no parent.
3 "living with parents":
If HH grid contains R, at least one parent (codes 7, 8), and no child.
4 "single parent living with parents":
If HH grid contains R, at least one child and one parent, but no partner.
5 "couple with no children":
If HH grid contains R, his/her partner (code 1); no child, nor parent.
6 "couple with children"
If HH grid contains R, his/her partner, at least one child, and no parent.
7 "couple with parents"
If HH grid contains R, his/her partner, at least one parent, and no child.
8 "couple with parents and children"
If HH grid contains R, his/her partner, at least one parent and one child.
9 "other types"
HH types different from 1-8, that may include codes 9-17 on ahg3_* (e.g., Rs living with no relatives).

| Value | Label | Cases | Percentage |
|-------|-----------------------------------|-------|------------|
| 1 | living alone | 644 | 12.9% |
| 2 | single parent | 256 | 5.1% |
| 3 | living with parents | 885 | 17.7% |
| 4 | single parent living with parents | 18 | 0.4% |
| 5 | couple with no children | 754 | 15.1% |
| 6 | couple with children | 2232 | 44.6% |
| 7 | couple with parents | 34 | 0.7% |
| 8 | couple with parents and children | 56 | 1.1% |
| 9 | other types | 121 | 2.4% |
| 96 | unknown | 0 | |

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

ahhsiz: Household size including Respondent

Information [Type= discrete] [Format=numeric] [Range= 1-13] [Missing=* /96]

Statistics [NW/ W] [Valid=5000 /-] [Invalid=0 /-]

Definition Consolidated variable.

Notes
Generated from household grid (variables ahg1_*).

| Value | Label | Cases | Percentage |
|-------|-------|-------|------------|
| 1 | | 644 | 12.9% |
| 2 | | 1014 | 20.3% |

maleeduc: If partnered: level of education of male

| | |
|---------------------------|--|
| Information | [Type= discrete] [Format=numeric] [Range= 0-2147483624] [Missing=*/97/98/99] |
| Statistics [NW/ W] | [Valid=1491 /-] [Invalid=3509 /-] |
| Definition | Derived variable |
| Universe | If R has a partner |
| Notes | <p>This variable indicates the education level of the male in the relationship if the respondent says that they are currently in a relationship. If the respondent is male then the respondents education level is used (aeduc.)</p> <p>If the respondent is female and in a relationship with a male then their partners education level is derived depending on the nature of the relationship. For a resident partner the education level was copied from question 120 (variable a148) or question 304 (variable a308); for a non resident partner the education was copied from question 120 (variable a148) or question 313 (variable a321).</p> <p>Rs with non-resident partners are coded with "99 - not applicable/no response", when variable a321 is not available in the dataset.</p> <p>Note that this variable does not have a value for same-sex partnerships.</p> |

| Value | Label | Cases | Percentage |
|-------|--------------------------------------|-------|------------|
| 0 | iscd 0 - pre-primary education | 0 | |
| 1 | iscd 1 - primary level | 4 | 0.3% |
| 2 | iscd 2 - lower secondary level | 426 | 28.6% |
| 3 | iscd 3 - upper secondary level | 690 | 46.3% |
| 4 | iscd 4 - post secondary non-tertiary | 129 | 8.7% |
| 5 | iscd 5 - first stage of tertiary | 223 | 15.0% |
| 6 | iscd 6 - second stage of tertiary | 19 | 1.3% |
| 97 | does not know | 0 | |

File : GGS_Wave1_Austria_V.4.3.

maleeduc: If partnered: level of education of male

| Value | Label | Cases | Percentage |
|---------|----------------------------|-------|------------|
| 98 | refusal | 0 | |
| 99 | no response/not applicable | 0 | |
| Sysmiss | | 3509 | |

fertintent: if partnered: fertility intentions of the couple

| | |
|---------------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 1-4] [Missing=*] |
| Statistics [NW/ W] | [Valid=3506 /-] [Invalid=1494 /-] |
| Definition | Derived variable |
| Literal question | Do you yourself want to have a/another baby now? Couples do not always have the same feelings about the number or timing of children. Does your partner/spouse want to have a/another baby now? |
| Notes | The four codes were obtained from questions 611 and 615 in the obvious way (variables a611 and a615). Note that this variable does not have a value if either Respondent or Respondent's partner answered "Not sure" (code 3). |

| Value | Label | Cases | Percentage |
|---------|---|-------|------------|
| 1 | Both intend to have a child | 369 | 10.5% |
| 2 | Partner wants to have a child, respondent doesn't | 161 | 4.6% |
| 3 | Respondent wants to have a child, partner doesn't | 143 | 4.1% |
| 4 | Both don't intend to have a child | 2833 | 80.8% |
| Sysmiss | | 1494 | |

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

numbiol: Total number of biological children

| | |
|---------------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 0-12] [Missing=*] |
| Statistics [NW/ W] | [Valid=5000 /-] [Invalid=0 /-] |
| Definition | Derived variable |
| Literal question | The number of biological children of the respondent (with the current or with former partner). |
| Notes | For resident children, copied from the Household grid (code 2 or 3 on variable ahg3_*); for non-resident children, copied from question a213 (code 1 on variable a213_*). Note that this variable refers to biological children of the respondent, coresident and non-resident, with the current partner or with an other partner. |

| Value | Label | Cases | Percentage |
|-------|-------|-------|------------|
| 0 | | 2280 | 45.6% |
| 1 | | 943 | 18.9% |
| 2 | | 1240 | 24.8% |
| 3 | | 413 | 8.3% |
| 4 | | 97 | 1.9% |

a107AgeR: R's age of starting to live in country of interview

| | |
|-------------------------|--|
| Literal question | In what month and year did you first start living permanently in [country]? |
| Notes | R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the country of interview was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December" Data is not available for Estonia. |

| Universe | If R lives together with a partner | | |

| # a301AgeR: R's age at start of living with current partner | | | |
|--|----------------------------|---|-------------------|
| Literal question | | In what month and year did you and he/she first start living together? | |
| Notes | | R's time of birth was deducted from HH grid. If information on the month of birth / month when started living with current partner was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December" | |

a310: Have relationship to somebody without cohabitation

| | |
|---------------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/7/8/9] |
| Statistics [NW/ W] | [Valid=1920 /-] [Invalid=3080 /-] |
| Definition | Q 306 core questionnaire |
| Universe | If R does NOT have a co-resident partner |
| Literal question | Are you currently having an intimate (couple) relationship with someone you're not living with? This may also be your spouse if he/she does not live together with you. Our survey does not only cover heterosexual relationships, but also same-sex relationships. If you have a partner of the same sex, please answer the following questions as well. |

| Value | Label | Cases | Percentage |
|---------|----------------------------|-------|------------|
| 1 | yes | 816 | 42.5% |
| 2 | no | 1104 | 57.5% |
| 7 | does not know | 0 | |
| 8 | refusal | 0 | |

| # a316cAgeP: Partner's age at start of permanent residence | |
|--|--|
| Information | [Type= discrete] [Format=numeric] [Range= 10-34] [Missing=*/997/998/999] |
| Statistics [NW/ W] | [Valid=25 /-] [Invalid=4975 /-] |
| Definition | Derived variable from Q 312.c core questionnaire |
| Universe | If code 2 on Q 312.a |
| Literal question | In what month and year did he/she first start living permanently in [COUNTRY]? |
| Notes | Non Resident Partner's time of birth was deducted from the answer to Q 311. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December" |

| # a331_a: Who think you should start living together: Most of your friends | | | |
|--|---|--------------|-------------------|
| Information | [Type= discrete] [Format=numeric] [Range= 1-2147483624] [Missing=*/7/8/9] | | |
| Statistics [NW/ W] | [Valid=1739 /-] [Invalid=3261 /-] | | |
| Definition | Q 323.a core questionnaire | | |
| Universe | If R is currently NOT living with a partner | | |
| Pre-question | Although you may feel that the decision to start living together with a partner is yours (and your partner's), it is likely that others have opinions about what you should do. I'm going to read out some statements about what other people might think about you starting to live with a/your partner during the next three years. Please tell me to what extent you agree or disagree with these statements, choosing your answer from this card. Card 323: Agreement Scale | | |
| Literal question | Most of your friends think that you should start living together with a/your partner | | |
| Value | Label | Cases | Percentage |
| 1 | strongly agree | 103 | 5.9% |
| 2 | agree | 360 | 20.7% |
| 3 | neither agree nor disagree | 690 | 39.7% |
| 4 | disagree | 344 | 19.8% |
| 5 | strongly disagree | 242 | 13.9% |
| 7 | does not know | 0 | |
| 8 | refusal | 0 | |
| 9 | no response/not applicable | 185 | |

a374cAgeP: Partner's age of obtaining permanent residence

| | |
|---------------------------|---|
| Information | [Type= discrete] [Format=numeric] [Range= 0-54] [Missing=*997/998/999] |
| Statistics [NW/ W] | [Valid=476 /-] [Invalid=4524 /-] |
| Definition | Consolidated variable from variables a303AgeP and a316cAgeP (derived variables from Q 304.c and Q 312.c core questionnaire). |
| Universe | If R's partner not born in [country] |
| Literal question | In what month and year did he/she first start living permanently in [COUNTRY]? |
| Notes | Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 311. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December" |

| # a619AgeR: R's age at start of infertility treatment | | | |
| Information | [Type= discrete] [Format=numeric] [Range= 20-45] [Missing=*/997/998/999] | | |
| Statistics [NW/ W] | [Valid=39 /-] [Invalid=4961 /-] | | |
| Definition | Derived variable from Q 619 core questionnaire | | |
| Universe | If answer to Q 618 is NOT 0 "nothing" | | |
| Literal question | In what month and year did you first start doing something to help you (your partner/spouse) get pregnant this time? | | |
| Notes | R's time of birth was deducted from HH grid. If information on the month of birth / month at start of infertility treatment, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December" | | |
| Value | Label | Cases | Percentage |
| 24 | | 2 | 5.1% |
| 25 | | 3 | 7.7% |
| 26 | | 3 | 7.7% |
| 27 | | 3 | 7.7% |
| 28 | | 3 | 7.7% |
| 29 | | 2 | 5.1% |
| 30 | | 2 | 5.1% |
| 31 | | 2 | 5.1% |
| 32 | | 1 | 2.6% |
| 33 | | 4 | 10.3% |
| 34 | | 1 | 2.6% |
| 36 | | 1 | 2.6% |
| 37 | | 1 | 2.6% |
| 38 | | 2 | 5.1% |
| 39 | | 4 | 10.3% |
| 40 | | 4 | 10.3% |
| 42 | | 1 | 2.6% |
| 997 | does not know | 0 | |
| 998 | refusal | 0 | |
| 999 | no response/not applicable | 8 | |
| Sysmiss | | 4953 | |
