| <p><b>Abstract</b></p> <p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion". The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> <li>- Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets.</li> <li>- A broad age range. It includes respondents between the ages of 18 and 80.</li> <li>- A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals.</li> <li>- A large sample size. It has an average of 9,000 respondents per country at Wave 1.</li> <li>- A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior.</li> <li>- Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.</li> </ul> |              |
| <b>Kind of Data</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Survey data  |
| <b>Unit of Analysis</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Individuals  |

| Scope & Coverage                                                                                                                                                                                                                             |                                                                                                                                                                                                                      |

## Sampling

### Sampling Procedure

#### WAVE 1 SAMPLING PROCEDURE

##### 1. Sampling frame

1.1 Type of frame: So-called ADM-Master sample (as at December 2002), which divides Germany on the basis of GIS in 53,000 sample-points.

1.2 Frame coverage:

1.3 Frame size:

1.4 Level of units available:

##### 2. Sampling method

2.1 Sampling method type: Random route survey according to the ADM design: 1) all municipalities of the survey territory are divided into layers by regional criteria (Laender, administrative districts, municipality types (population size)) - those sample points are sub-divided proportionately to the number of households in the layers (cells); with the aid of a geographical information system (GIS) streets are roughly sub-divided into 53,000 areas; The sample points defined by these means are exclusively at the disposal of the ADM member institutes in the form of the so-called ADM sample networks; total of 1,475 sample points were selected in this first step; 2) household addresses needed for the sample were collected by random selection; interviewers deployed are set a starting address which can be defined per sample point and using a precisely-defined route; 3) the interviewers were obliged to contact one target household and to carry out an interview if a respondent from the defined population had his/her first place of residence there; if several persons lived in the household belonging to the population, the interviewer identified the respondents who were to be asked on a strictly random basis aid of a systematic selection key (Kish selection grid).

##### 2.2 Sampling stage definition

- PSU: Sample points.

- SSU: Addresses per point.

- TSU: NA

##### 2.3 Sampling stage size

- PSU: 1,475 sample-points.

- SSU: 14 addresses per point (=gross estimate 20,650).

- TSU: NA

##### 2.4 Unit selection: NA

##### 2.5 Final stage unit selection: NA

2.6 Within Household unit selection: The interviewers were obliged to contact one target household and to carry out an interview if a respondent from the defined population had his/her first place of residence there; if several persons lived in the household belonging to the population, the interviewer identified the respondents who were to be asked on a strictly random basis aid of a systematic selection key (Kish selection grid).

##### 2.7 Stratification: NA

##### 2.8 Sample size: NA

- Starting size sample: 18,123.

- Aimed total size at Wave 1: 10,017.

- Aimed total size at Wave 3:

##### 2.9 Estimated Non-response

- Initial non-response: 8,079.

- Yearly attrition: Wave 1 to wave 2 around 2/3 (67%).

- Non response measures: None.

- Within household non-responses measures: NA

WAVE 2 SAMPLING PROCEDURE: same population than Wave 1 who had agreed to be re-contacted, i.e. n=6,409 respondents.

### **Response Rate**

#### **WAVE 1**

Response rate - Final disposition codes:

I = complete interview: 10,017

P = partial interview: NA

NE = non-eligible : 2,527 (1,320 "No person in the target group", 1,207 "other sample-neutral failures") + 27 (Carried out interviews)

NC = non-contact : 1,948

R = refusal: 5,134

O = other non-response: 997

UC = unknown eligibility, contacted: NA

UC = unknown eligibility, non-contact: NA

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: NA

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: NA

#### **WAVE 2**

Response rate - Final disposition codes:

I = complete interview: 3,285 (of which 58 interviews had to be removed due to wrong respondent surveyed. Hence, the number of complete interviews is: 3227)

P = partial interview: NA

NE = non-eligible: 72

NC = non-contact: 716

R = refusal: 1,091 (unwillingness to participate) + 457 (lack of time)=1548

O = other non-response: 201 (respondents ill) + 17 (language problems) + 212 (other non-response)=430

UC = unknown eligibility, contacted: NA

UC = unknown eligibility, non-contact: NA

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: NA

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: NA

### **Weighting**

#### **WAVE 1 WEIGHTING**

Yes, two weighting variables, household and personal weight. Procedure: 1) household sample was weighted, both by Federal Länder and municipality size classes (BIK) and by household size. This level corrects deviations from the original sample approach proportionate to the household; 2) overall sample was now adjusted to the target structures of the characteristics Federal Land, age groups, sex and education known from the official statistics (Mikrozensus 2003); 3) In a final weighting level, the additional qualitative improvements achieved by the person weighting in the sample were projected back to the household sample, so that evaluations of household characteristics now also show the same degree of representation as person-weighted ones.

#### **WAVE 2 WEIGHTING**

The sample that had been achieved in the second wave was adjusted to the same target structures than Wave 1. The information provided by those who were resurveyed on Federal Länder, age groups, sex and education from the first survey wave were used as a basis for this weighting. The official data basis for the characteristics Federal Länder, age groups and sex was formed by the population extrapolation of the Federal Statistical Office (2003). The information from the Microcensus 2003 was also once more used as a set of reference statistics for the margin weighting according to East/West, age groups and education.

| <b>Data Collection Notes</b><br><b>WAVE 1 DATA COLLECTION</b><br>1. Interviewers<br>1.1 Total number of interviewers: 528.<br>1.2 Number of interviewers in the field: NA<br>1.3 Network organization: Centralized network with 6 regions being coordinated from TNS infratest. Loca field coordinators were responsible for the fieldwork conducted within the region.<br>1.4 Working arrangement of interviewers: Part time.<br>1.5 Payment of interviewers: Paid per interview (succesful contact).<br><br>2. Interviewer training:<br>2.1 General interviewing: Not for this project but in general with training materials distributed by central network and training conducted locally by field coordinators.<br>2.2 Survey specific: Yes, by sending written interviewer instruction before fieldwork started.<br>2.3 Length: 1 hour.<br>2.4 Control of performance: For randomly selected 10% of the interviews postcards with some questions about fieldwork (e.g. length of interview) were sent to the respondent. In case of questionable interviews the whole work (100%) of the interviewer was controlled.<br>2.5 Interviewer survey: No.<br><br>3. Contact protocols<br>3.1 Advance letter: No.<br>3.2 Cold contacts: Face-to-face.<br>3.3 Scheduling / scattering: Yes, interviewers were entitled to scatter contact attempts by making sure that more than 50% of contact attempts were in the afternoon of week-days or on week-ends.<br>3.4 Contact history: No.<br>3.5 Min number of contacts: 4.<br>3.6 Max number of contacts: No.<br><br>4. Questionnaire localization<br>4.1 Validation: No.<br>4.2 Pre-test: One pre-test carried out using CAPI version of the questionnaire in winter 2004/05 (115 respondents). Country-specific response catagories were used for questions on e.g., education and occupation. 6 additional country-specific questions were added as compare to the harmonised questionnaire. These questins concern family policy measures, fertility intentions and abortion.<br>4.3 Length of interview: Average length of interview: 57 minutes, with wide range (minimum 27 minutes, maximum 164 minutes) according to the composition of the household and the biography of the respondent.<br><br><b>WAVE 2 DATA COLLECTION</b><br>1. Interviewers<br>1.1 Total number of interviewers: 404.<br>1.2 Number of interviewers in the field: DK<br>1.3 Network organization: Centralized network coordinated from TNS infratest.<br>1.4 Working arrangement of interviewers: Interviewers deployment followed the principle that the same interviewers were deployed again for the follow-up questionnaire wherever this was possible and meaningful. All in all, the same interviewer as in 2005 was only deployed with somewhat more than half the respondents.<br><br>2. Interviewer training: DK<br><br>3. Contact protocols<br>3.1 Advance letter: Yes - shortly before starting the fieldwork in 2008<br>3.2 Cold contacts: NO. |                                                                                  |

3.3 Scheduling / scattering: DK  
 3.4 Contact history: DK  
 3.5 Min number of contacts: DK  
 2.6 Max number of contacts: DK

#### 4. Questionnaire localization

4.1 Validation: No.  
 4.2 Pre-test: CAPI questionnaire was tested in the pilot which was carried out in July 2008 on 31 respondents.  
 4.3 Length of interview: Average length of interview: 59 minutes , with wide range (minimum 32 minutes, maximum 107 minutes) according to the composition of the household and the biography of the respondent.

#### **Questionnaires**

Structured questionnaire in German.

#### **Supervision**

##### WAVE 1 ACTIONS

1. Dealing with nonresponse  
 1.1 Screening: No.  
 1.2 Refusal conversion: No specific training for this project, only general training  
 1.3 Incentives: Yes, lottery ticket amounting to 10 €.

##### 2. Tracking of sampled units

2.1 Respondent contact information: Yes, addresses (no email-addresses) of the respondent were collected. The addresses are only known by TNS-Infratest.  
 2.2 Other contact information: DK  
 2.3 Cards: A "thank-you-letter" and birthday- and holiday cards were sent to all the respondents (planned frequency of contacts with the respondents between the two waves: 3). Furthermore, a brochure with results of Wave 1 was sent.  
 2.4 Additional surveys: No  
 2.5 Administrative records: NA

##### WAVE 2 ACTIONS

1. Dealing with nonresponse  
 1.1 Screening: Yes. The sending of letters between the two waves provided a chance to check for potentially changing addresses on a yearly basis. In addition to annual contacts, enquiries were also made to the residents' registration offices with regard to those individuals where our letters were returned by the post office and where the ensuing postal enquiries did not provide a valid address.  
 1.2 Refusal conversion: DK  
 1.3 Incentives: In order to achieve as high a response rate as possible, the respondents who had given an interview received as an incentive a ticket for the ARD television lottery by post following their participation.

##### 2. Tracking of sampled units

2.1 Respondent contact information: Yes, addresses (no email-addresses) of the respondent were collected. The addresses are only known by TNS-Infratest.  
 2.2 Other contact information: DK  
 2.3 Cards: Regular panel maintenance was carried out in the interim period by TNS Infratest. A "thank-you-letter" and birthday- and holiday cards were sent to all the respondents willing to be re-contacted. Also the so called GGP-Journal in the first 2 years (end of 2005 and 2006) was sent. Two letters announcement of the beginning of the next wave at the end of 2007 and in 2008.  
 2.4 Additional surveys: No  
 2.5 Administrative records: Yes (Einwohnermeldeamt)  
 A field-work time of three months from mid-September 2008 to mid-December 2008 had originally been planned. Because only n=3,018 interviews that had been carried out by the end of December and because of a relatively promising share among those who were not reached, TNS Infratest Sozialforschung decided to invest in additional, unplanned post-processing. A total of n=3,285 questionnaires had been carried out by the end of March 2009.

## Data Processing & Appraisal

### Data Editing

#### WAVE 2 CLEANING OPERATIONS

The main cleaning operations were:

a) Editing of raw data and pre-harmonization: Renaming all variables names, (Re-)Translating all labels from German to English, Recoding variables if structure differed from the harmonization standard, Checking and coding of user missing values and system missing values, Checking of consistency of filters, Coding of basic information on education into ISCED-97 and occupation into ISCO-88.

b) Checks for inconsistent results and logical consistency: checking the internal plausibility (e.g. household roster, dates), plausibility between survey waves (e.g. sex and year of birth)

If possible corrections have been conducted. Otherwise cases or responses had been removed or documented.

| <p><b><u>File Content</u></b><br/>GGG Wave 1</p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p> |                                                            |

- a344 (corrected error routing error in NOR)
- a256\_ (corrected error for POL & GEO)

#### IMPROVEMENTS INTRODUCED WITH V.4.2. (February 2014):

The update from v4.1 to v4.2 does not include corrections of existing variables.

The update only includes additional variables which are derived from the pre-existing datasets

- Variables derived from grid variables and variables which concern the respondents and his/her partner: numdissol numdivorce nummarriage numpartners livingwithpartner childprevp femage maleage femeduc maleeduc fertintent numbiol numres numnonres numstep numallchild ageyoungest ageoldest numrespleave numotherparentleave coreschild corespren coresgrandp coressibl.

- Variables derived from month and year variable:

a808Dur a822Dur a907Dur a911Dur a914Dur; a303cAgeP a315AgeP a316cAgeP a374cAgeP a608AgeP a610AgeP a617bAgeP a621AgeP a914AgeP a941AgeP; a107AgeR a121AgeR a150AgeR a239aAgeR a239bAgeR a240AgeR a301AgeR a302bAgeR; a311AgeR a314bAgeR a314dAgeR a371AgeR a372bAgeR a603AgeR a608AgeR a610AgeR a613AgeR a614AgeR a619AgeR a621AgeR a816AgeR a822AgeR a871AgeR a5116AgeR a5117bAgeR; a302bTdiff a314bTdiff a314dTdiff a372bTdiff.

- Variables derived from hours and minutes variables: a324\_hour a520\_hour a540\_hour.

- Variables derived from frequency and unit variables:

a205mnth,a241mnth,a325mnth,a355mnth,a359mnth,a363mnth,a367mnth,a521mnth,a541mnth,a1008mnth,a1102mnth; a203c\_?w a204c\_?w.

- Occupation variables recoded into ISCO-88 1 digit: a828\_1dig a832\_1dig a861\_1dig a917\_1dig a921\_1dig a933\_1dig a5112\_1dig a5114\_1dig.

#### IMPROVEMENTS INTRODUCED WITH V.4.1. (April 2012):

- Variables corrected: a106b a108 a109\_1 a109\_2 a110 a111 a218 a219 a303b a304 a305 a306 a316b a317 a318 a319 a374b a375 a376 a377 a513b a514 a515 a533b a534 a535 a540 a521u a541u a5106a\_b a5106a\_s a5107.

- Value labels defined: a204cu\_5 a204cu\_6.

#### IMPROVEMENTS INTRODUCED WITH V.4.0 (March 2012):

- New constructed variables: asex aage abyear aeduc aactstat aparstat amarstat anpartner ankids ahhsz ahhstype.

- New consolidated variables on respondents' current activity: a870 a871m a871y a873 a874 a875.

- New consolidated variables on respondents' partners current activity: a940 a941m a941y a943 a945.

- Variables previously unavailable, now available: a108 a304

- Variables corrected: a602 (with consequences on the response rate of subsequent variables), a622, a623, a624, a625, a626, a627\*, a628\*, a629\*.

- Changes in the variable/value labels: aregion (previously 5 digit country specific list; now four digit country specific list), atype (previously country specific list range 1400,1409; now country specific list range 1401,1410).

#### IMPROVEMENTS INTRODUCED WITH V.3.0 (August 2010):

- New consolidated variables: a370 a383 a384.

- Changes in the variable/value labels: a203b\_\* (wrong labels in version v2.2., now corrected), a1003 and a1004 (coded as first, second, third... mentioned in version V2.2., now coded coded per item as a yes/no question).

- Variables renamed: a203c\_1u...`i'u and a204c\_1u...`i'u renamed respectively as a203cu\_1...`i' and a204cu\_1...`i'.

#### FIRST DATASET RELEASED: V. 2.2. (March 2010).

#### **Processing Checks**

##### WAVE 1 DATA HARMONISATION

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards.

Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

#### 1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

#### 2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("\_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3\_# or bhg3\_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

#### 3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

#### 4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

#### 5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

#### 6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.

- month and year variables,

- hours and minutes variables,

- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

#### **Missing Data**

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")

- 7, 97, 997, etc. = Don't know

- 8, 98, 998, etc. = Refusal

- 9, 99, 999, etc. = Not-applicable/no response

#### **File Content**

## GGG Wave 2

VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.

Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.

The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.

Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.

Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.

A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119\_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".

**Version**

Harmonized dataset, GGS Wave2, version 1.3.

**IMPROVEMENTS INTRODUCED WITH GGS\_Wave2\_V.1.3 (August 2016)**

Correction of the following variables that were previously erroneous: b343\_\*, bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage.

**IMPROVEMENTS INTRODUCED WITH GGS\_Wave2\_V.1.2 (April 2015)**

The update from v1.1 to v1.2 does not include corrections of existing variables. The update only includes additional variables which are derived from the pre-existing datasets.

- Variables derived from grid variables and variables which concern the respondents and his/her partner: bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage, bnumpartnerships, bnumpartnerships, bnrespartafterw1, blivingwithpartner, bchildprevp, bnchildprevp, bfemage, bmaleage, bfemeduc, , bmaleeduc, bfertintent, bnumbiol, bnumnonres, bnumres, bnumstep, bnumallchild, bageoldest, bageyoungest, bcoreschild, bcoresgrandp, bcoresparen, bcoresibl, bhhtype.
- Variables derived from month and year variable: b121AgeR, b150AgeR, bn152AgeR, b239aAgeR, b239bAgeR, b240AgeR, bn304Ageb303cAgeP, b311AgeR, b315AgeP, b316cAgeP, b371AgeR, b372bAgeR, b372bTdiff, b374cAgeP, b5116AgeR, b5117bAgeR, b603AgeR, b608AgeP, b608AgeR, b610AgeP, b610AgeR, b621AgeP, b621AgeR, b871AgeR, b907Dur, b911Dur, b914AgeP, b914Dur, b941AgeP.
- Variables derived from hours and minutes variables: b324hour, b520hour, b540hour, b221hour\_x.
- Variables derived from frequency and unit variables: b203c\_xw, b204c\_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth.
- Occupation variables recoded into ISCO-88 1 digit: b828\_1dig, b832\_1dig, b861\_1dig, b917\_1dig, b921\_1dig, b933\_1dig.
- Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnumworkstatuses, bnumstudentstatuses, bnumemplstatuses, bnumselfemplstatuses, bnumhelpfamstatuses, bnumunemplstatuses, bnumretiredstatuses, bnummilitarystatuses, bnumhomestatuses, bnummatleavestatuses, bnumparleavestatuses, bnumdisabilitystatuses, bnumotherstatuses, bnum1401, bnum1501, bnum1801, bnum1301, bnumparttime, bnumfulltime, bnumboth, bnumparttime\_1801, bnumparttime\_1802, bnumpartfulltime\_1803, bnumfulltime\_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses, bndurselfemplstatuses, bndurhelpfamstatuses, bndurunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses,

bndurhomestatuses, bndurmatleavestatuses, bndurparleavestatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876\_xAgeR, bn877\_xAgeR, bn878xAgeR, bn879\_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

IMPROVEMENTS INTRODUCED WITH V.1.2. in Nesstar GGS micro data files (April 2015):

Publication of variables that were previously deleted before dataset release in Nesstar. The following variables are concerned: grid variables, month and year variables, hours and minutes variables, frequency and unit variables, and occupation variables.

IMPROVEMENTS INTRODUCED WITH V.1.1. (March 2013):

- Variables corrected: b510 b530 b626.
- Changes in the variable/value labels: b703b (value 5 previously without label; now value 5 recoded into missing, no valid answer), b906b (previously without labels, now with labels).
- Variables dropped because not part of the GGS Core Questionnaire: b257\* and b258\*.

IMPROVEMENTS INTRODUCED WITH V.1.1. in the derived variables calculated for Nesstar GGS micro data files (March 2013):

- Variables corrected: b203c\_\*w and b204c\_\*w (previously frequencies greater than 7 were put equal to system missing, now they are put as equal to seven).
- Variables previously dropped and now available: bint\_st and bint\_pr.

FIRST DATASET RELEASED: V. 1.0. (November 2012).

### **Processing Checks**

WAVE 2 DATA HARMONISATION: see "Extent of Processing Checks" "WAVE 1 DATA HARMONISATION".

### **Missing Data**

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

### **Notes**

WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

# Variables List

Dataset contains 2511 variable(s)

| <b>Interviewer's instructions</b> | Interviewer Instruction: Read the following text.<br>This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know. |

| <b>Interviewer's instructions</b> | Interviewer Instruction: Read the following text.<br>This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know. |

### # ahhtype: Household type Respondent

If HH grid contains R, at least one parent (codes 7, 8), and no child.  
 4 "single parent living with parents":  
 If HH grid contains R, at least one child and one parent, but no partner.  
 5 "couple with no children":  
 If HH grid contains R, his/her partner (code 1); no child, nor parent.  
 6 "couple with children"  
 If HH grid contains R, his/her partner, at least one child, and no parent.  
 7 "couple with parents"  
 If HH grid contains R, his/her partner, at least one parent, and no child.  
 8 "couple with parents and children"  
 If HH grid contains R, his/her partner, at least one parent and one child.  
 9 "other types"  
 HH types different from 1-8, that may include codes 9-17 on ahg3\_\* (e.g., Rs living with no relatives).

| Value | Label                             | Cases | Percentage |

### # numdissol: Total number of partnerships dissolutions

|                   |                                                                                                                                                                                |
|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Definition</b> | Derived variable                                                                                                                                                               |
| <b>Notes</b>      | The number of non-empty slots in the "Partnership history" grid (a343_*); core questionnaire, section 3, page 22.<br>Note that this variable only refers to resident partners. |

| Value | Label | Cases | Percentage |
|-------|-------|-------|------------|
| 0     |       | 8252  | 82.4%      |
| 1     |       | 1397  | 13.9%      |
| 2     |       | 294   | 2.9%       |
| 3     |       | 58    | 0.6%       |
| 4     |       | 13    | 0.1%       |
| 5     |       | 2     | 0.0%       |
| 6     |       | 1     | 0.0%       |

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # numdivorce: Total number of partnerships ending in divorce

|                           |                                                                                                                                                                                                                                                                            |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Information</b>        | [Type= discrete] [Format=numeric] [Range= 0-3] [Missing=*]                                                                                                                                                                                                                 |
| <b>Statistics [NW/ W]</b> | [Valid=10017 /-] [Invalid=0 /-]                                                                                                                                                                                                                                            |
| <b>Definition</b>         | Derived variable                                                                                                                                                                                                                                                           |
| <b>Notes</b>              | The number of previous partners with whom Respondent was married AND broke up (code 1 on question 327 (a335a) and code 1 on question 330 (a343), "Partnership history" grid).<br><br>Not available for Australia as partnership history grid differs in Australian survey. |

| Value | Label | Cases | Percentage |
|-------|-------|-------|------------|
| 0     |       | 8906  | 88.9%      |
| 1     |       | 1003  | 10.0%      |
| 2     |       | 101   | 1.0%       |
| 3     |       | 7     | 0.1%       |

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # nummarriage: Total number of marriages

|                           |                                                                                                                                                                                                                                                    |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Information</b>        | [Type= discrete] [Format=numeric] [Range= 0-3] [Missing=*]                                                                                                                                                                                         |
| <b>Statistics [NW/ W]</b> | [Valid=10017 /-] [Invalid=0 /-]                                                                                                                                                                                                                    |
| <b>Definition</b>         | Derived variable                                                                                                                                                                                                                                   |
| <b>Notes</b>              | The number of previous partners with whom Respondent was married (code 1 on question 327 "Partnership history" grid) PLUS the current marriage if one exists (code 1 on question 302 / variable a302a OR code 1 on question 310 / variable a314a). |

| Value | Label | Cases | Percentage |
|-------|-------|-------|------------|
| 0     |       | 3360  | 33.5%      |
| 1     |       | 6194  | 61.8%      |
| 2     |       | 429   | 4.3%       |
| 3     |       | 32    | 0.3%       |
| 4     |       | 2     | 0.0%       |

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # numpartnerships: Total number of partnerships

|                           |                                                            |
|---------------------------|------------------------------------------------------------|
| <b>Information</b>        | [Type= discrete] [Format=numeric] [Range= 0-4] [Missing=*] |
| <b>Statistics [NW/ W]</b> | [Valid=10017 /-] [Invalid=0 /-]                            |

| <b>Notes</b>              | <p>This variable indicates the age of the female in the relationship if the respondent says that they are currently in a relationship. If the respondent is female then the respondents age is used (aage.)</p> <p>If the respondent is male and in a relationship with a female then their age is derived depending on the nature of the relationship. For a resident partner the age was copied from the Household grid (ahg5_ ; for a non resident partner the age was calculated as: year of interview MINUS question 311 (variable a315y).<br/>Rs with non-resident partners are coded with "999 - not applicable/no response", when variable a315y is not available in the dataset.<br/>Note that this variable does not have a value for same-sex partnerships.</p> |

| <b>Notes</b>              | <p>This variable indicates the age of the male in the relationship if the respondent says that they are currently in a relationship. If the respondent is male then the respondents age is used (aage.)</p> <p>If the respondent is female and in a relationship with a male then their age is derived depending on the nature of the relationship. For a resident partner the age was copied from the Household grid (ahg5_); for a non resident partner the age was calculated as: year of interview MINUS question 311 (variable a315y).</p> <p>Rs with non-resident partners are coded with "999 - not applicable/no response", when variable a315y is not available in the dataset.</p> <p>Note that this variable does not have a value for same-sex partnerships.</p> |

| <b>Notes</b>              | <p>This variable indicates the education level of the female in the relationship if the respondent says that they are currently in a relationship. If the respondent is female then the respondents education level is used (aeduc.)</p> <p>If the respondent is male and in a relationship with a female then their partners education level is derived depending on the nature of the relationship. For a resident partner the education level was copied from question 120 (variable a148) or question 304 (variable a308); for a non resident partner the education was copied from question 120 (variable a148) or question 313 (variable a321).</p> <p>Rs with non-resident partners are coded with "99 - not applicable/no response", when variable a321 is not available in the dataset.</p> <p>Note that this variable does not have a value for same-sex partnerships.</p> |

| <b>Universe</b>           | If R has a partner                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>Notes</b>              | <p>This variable indicates the education level of the male in the relationship if the respondent says that they are currently in a relationship. If the respondent is male then the respondents education level is used (aeduc.)</p> <p>If the respondent is female and in a relationship with a male then their partners education level is derived depending on the nature of the relationship. For a resident partner the education level was copied from question 120 (variable a148) or question 304 (variable a308); for a non resident partner the education was copied from question 120 (variable a148) or question 313 (variable a321).</p> <p>Rs with non-resident partners are coded with "99 - not applicable/no response", when variable a321 is not available in the dataset.</p> <p>Note that this variable does not have a value for same-sex partnerships.</p> |

### # ageyoungest: Age of youngest child

Statistics [NW/ W] [Valid=6712 /-] [Invalid=3305 /-]

Definition Derived variable

Notes For resident children, the age was copied from the Household grid (variable ahg5\_\*); for non-resident children, the age was derived from variable a216a\_1...a216a\_13 (question a216a Core Questionnaire).  
Note that this variable refers to biological and adopted children of the respondent.

Data not available for Estonia as the exact age of those children under 14 is not recorded.

| <b>Definition</b>         | Derived variable                                                                                                                                                                           |
| <b>Notes</b>              | "Yes" if Respondent's or Respondent's partner's child is present in the Household grid (codes 2 through 6, and country specific values 2402 and 1702, on variable ahg3_*); "No" otherwise. |

| Value | Label | Cases | Percentage |
|-------|-------|-------|------------|
| 1     | Yes   | 3811  | 38.0%      |
| 2     | No    | 6206  | 62.0%      |

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # coresparen: Respondent has coresident parent

|                           |                                                                                                                                                  |
|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Information</b>        | [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]                                                                                       |
| <b>Statistics [NW/ W]</b> | [Valid=10017 /-] [Invalid=0 /-]                                                                                                                  |
| <b>Definition</b>         | Derived variable                                                                                                                                 |
| <b>Notes</b>              | "Yes" if Respondent's or Respondent's partner's parent is present in the Household grid (codes 7 through 10 on variable ahg3_*); "No" otherwise. |

| Value | Label | Cases | Percentage |
|-------|-------|-------|------------|
| 1     | Yes   | 564   | 5.6%       |
| 2     | No    | 9453  | 94.4%      |

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # coresgrandp: Respondent has coresident grandparent or great-grandparent

|                           |                                                                                                                                                                 |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Information</b>        | [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]                                                                                                      |
| <b>Statistics [NW/ W]</b> | [Valid=10017 /-] [Invalid=0 /-]                                                                                                                                 |
| <b>Definition</b>         | Derived variable                                                                                                                                                |
| <b>Notes</b>              | "Yes" if Respondent's or Respondent's partner's grandparent or great-grandparent is present in the Household grid (code 12 on variable ahg3_*); "No" otherwise. |

| Value | Label | Cases | Percentage |
|-------|-------|-------|------------|
| 1     | Yes   | 34    | 0.3%       |
| 2     | No    | 9983  | 99.7%      |

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # coressibl: Respondent has coresident sibling

|                           |                                                                                                                                        |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| <b>Information</b>        | [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]                                                                             |
| <b>Statistics [NW/ W]</b> | [Valid=10017 /-] [Invalid=0 /-]                                                                                                        |
| <b>Definition</b>         | Derived variable                                                                                                                       |
| <b>Notes</b>              | "Yes" if Respondent's or Respondent's partner's sibling is present in the Household (codes 13, 14 on variable ahg3_*); "No" otherwise. |

## File : GGS\_Wave1\_Germany\_V.4.3.

### # coressibl: Respondent has coresident sibling

| Value | Label | Cases | Percentage |
|-------|-------|-------|------------|
| 1     | Yes   | 269   | 2.7%       |
| 2     | No    | 9748  | 97.3%      |

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

### # livingwithpartner: Partner living in household of respondent

|                           |                                                                                 |
|---------------------------|---------------------------------------------------------------------------------|
