# # a372bTdiff: Time elapsed (years) between start of relationship and marriage (consolidated)

## Notes

This variable measures a different thing for

- Rs with co-resident partners: Time elapsed (years) between start of living together and marriage
- and Rs with non-resident partner: Time elapsed (years) between start of relationship and marriage

The time of starting to live together was deducted from the answers to Q 301 and Q307. If information on the month at start living together / month of marriage was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". If respondents got married before living together then the observation is excluded

Universe	If R's partner not born in [country]		
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?		
Notes	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 311. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

Statistics [NW/ W]	[Valid=3659 /-] [Invalid=6420 /-] [Mean=48.931 /-] [StdDev=14.318 /-]		
Definition	Generated from consolidated variables a871m and a871y.		
Literal question	In what month and year did you start this leave? In what month and year did you become unemployed? Since what month and year are you a student, studying at school, or in vocational training? In what month and year did you retire? Since what month and year are you a homemaker? In what month and year did you start this job or business?		
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"  This variable is not available for Belgium.

Statistics [NW/ W]	[Valid=381 /-] [Invalid=9698 /-] [Mean=28.948 /-] [StdDev=9.457 /-]		
Definition	Generated from consolidated variables a941m and a941y.		
Universe	If R has a partner.		
Literal question	In what month and year did your partner/spouse start this leave? In what month and year did he/she become unemployed? Since what month and year is your partner/spouse a student, in school, or in vocational training? In what month and year did your partner/spouse retire? Since what month and year is your partner/spouse a homemaker?		
Notes	Partner's time of birth was deducted from HH grid (co-resident partner) or Q 311 (non resident partner). If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". In Belgium if the partner is still in education (a941y==2301) then the variable was coded as system missing.
