Generations and Gender Survey Bulgaria Wave 1 & Wave 2 (GGS Bulgaria Wave 1 & Wave 2)

Overview	
Identification	GGS.W1.W2.11
<u>Abstract</u>	<p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion".</p> <p>The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> - Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets. - A broad age range. It includes respondents between the ages of 18 and 80. - A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals. - A large sample size. It has an average of 9,000 respondents per country at Wave 1. - A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior. - Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.
Kind of Data	Survey data
Unit of Analysis	Individuals

Scope & Coverage	
Keywords	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender relations, Intergenerational exchanges, Informal and formal care, Well-being and health, Grandparenthood, Economic activity, Retirement
<u>Time Period(s)</u>	2004-2007
<u>Countries</u>	Bulgaria

Producers & Sponsors	
Primary Investigator(s)	Bulgarian Academy of Sciences
Funding Agency/ies	Max Plank Insritute for Demographic Research United Nations Population Fund (UNFPA) Ministry of Labor and Social Policy
Other Acknowledgment(s)	National Statistic Institute Max Planck Institute for Demographic Research United Nations Population Fund (UNFPA) Ministry of Labor and Social Policy

Sampling

Sampling Procedure

WAVE 1 SAMPLING PROCEDURE

The sample included Bulgarian, Turkish and Roma populations. The 2001 Census was designated as the sampling frame. The target realized sample was estimated at $n = 9,500$ responde. Two stage sampling approach was designed to sample 836 PSUs and 11 individuals per PSU in the second stage. Prior to commencing the selection procedure the sampling frame was sorted according to region, urban and rural areas, municipalities and settlements. Probability proportional to size (PPS) was used to select the PSUs. Random sampling procedure was used for the selection of the individuals from the designated PSUs. The additional sample of $n = 4,100$ individuals was selected to compensate for the nonresponse. The additional sampling was based on the response rates by region and settlement type.

In October 2004 the sampling frame was updated. 863 primary statistical units selected for the sample were updated for any changes in dwellings, households and individuals in these units during the period between the census (March 2001) and the start of the survey (November 2004). Updating revealed impediments, such as restricted access to the buildings, no answer or locked houses. Measures were developed to overcome those difficulties by seeking additional information from neighbours, the house managers or even mayors in more rural areas.

WAVE 2 SAMPLING PROCEDURE

Wave 2 covers the same population that was sampled in 2004, for the first Wave of GGS. The realized sample includes $n = 9,364$ individuals.

Response Rate

WAVE 1

I = Complete interview: 12858

WAVE 2

I = Complete interview: 9344

The average response rate for the country is 72.7%. The lowest realization of the sample was registered in the capital of Sofia (59.34%) where the mobility of the population is highest. 27.3% of people from the original sample had not been contacted or interviewed.

In general, interviewers didn't manage to contact the same person who participated to the first wave, or people refused to be interviewed.

Weighting

WAVE 1 WEIGHT VARIABLE

Composed post-stratification weight that combines two weights: a) based on age, gender, region (full matrix) and b) based in age, sex, household size (margins).

WAVE 2 WEIGHT VARIABLE: metadata are forthcoming.

Data Collection

Data Collection Dates

Wave 1: start 2004-11-01

Wave 1: end 2005-01-01

Wave 2: start 2007-04

Wave 2: end 2007-06-30

Data Collection Mode

Method: Face-to-Face (personal interview)

Technique: Paper and pencil (PAPI)

Data Collection Notes

WAVE 1 DATA COLLECTION

- Validation: The questionnaire was re-translated from the national language back to English.
- Pre-test: The pilot study was conducted in June-August 2004 on 300 respondents with 150 in urban and 150 in rural areas.
- Questionnaire localization: Most of the respondents were favourably disposed towards the GGS and were very willing to participate in the Wave 1 as well as expressed the willingness to participate in future waves. Quite some respondents showed an interest in the study results and were thus looking forward to any media releases or other publications. Certain more

reluctant and unsure respondents verified the integrity of the study by checking upon its research orientation, and anonymity. Some main reasons for refusing the participation were: unwillingness to discuss personal life or to be interviewed at all, distrust in surveys, not interested in the topic, and lack of time. Some language barriers were also reported, mainly among the Turkish and Roma populations. Some contacted individuals expressed insufficient confidence in the social studies and hence refused the participation in the study. Some individuals (mostly uneducated and from the Roma community) condition their participation in the study with obtaining of financial assistance, or expected improvement of their life conditions.

WAVE 2 DATA COLLECTION

- Questionnaire localization: The first difficulty was the difficult access to respondents. Then, the main problems encountered are the under-standing of the questions by respondents belonging to non-Bulgarian ethnic groups (Roma and Turks), the volume of the questionnaire and the duration of the interview.

Questionnaires

Structured questionnaire available in Bulgarian.

Supervision

Panel maintenance activities: Special introductory letters have been sent to potential respondents informing them of the importance of the GGS in Bulgaria.

Data Processing & Appraisal

Data Editing

Data entry and system file preparation was done in collaboration with the Max Planck Institute for Demographic Research.

Other Processing

b5116AgeR, b5117bAgeR, b603AgeR, b608AgeP, b608AgeR, b610AgeP, b610AgeR, b621AgeP, b621AgeR, b871AgeR, b907Dur, b911Dur, b914AgeP, b914Dur, b941AgeP.

- Variables derived from hours and minutes variables: b324hour, b520hour, b540hour, b221hour_x.
- Variables derived from frequency and unit variables: b203c_xw, b204c_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth.
- Occupation variables recoded into ISCO-88 1 digit: b828_1dig, b832_1dig, b861_1dig, b917_1dig, b921_1dig, b933_1dig.
- Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnumworkstatuses, bnumstudentstatuses, bnumemplstatuses, bnumselfemplstatuses, bnumhelpfamstatuses, bnumunemplstatuses, bnumretiredstatuses, bnummilitarystatuses, bnumhomestatuses, bnummatleavestatuses, bnumparleavestatuses, bnumdisabilitystatuses, bnumotherstatuses, bnum1401, bnum1501, bnum1801, bnum1301, bnumparttime, bnumfulltime, bnumboth, bnumparttime_1801, bnumparttime_1802, bnumpartfulltime_1803, bnumfulltime_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses, bndurselfemplstatuses, bndurhelpfamstatuses, bndurunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses, bndurhomestatuses, bndurmatleavestatuses, bndurparleavestatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876_xAgeR, bn877_xAgeR, bn878xAgeR, bn879_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

IMPROVEMENTS INTRODUCED WITH V.1.2. in Nesstar GGS micro data files (April 2015):

Publication of variables that were previously deleted before dataset release in Nesstar. The following variables are concerned: grid variables, month and year variables, hours and minutes variables, frequency and unit variables, and occupation variables.

IMPROVEMENTS INTRODUCED WITH V.1.1. (March 2013):

- Variables corrected: bage, b119, b203*, b510, b530, b626
- Changes in the variable/value labels: bn140* (now with with value labels); b866*, b938*, b1014*, b1018*(corrected variable format); b1007_10, _11 (with variable labels).
- Variables dropped because not part of the GGS Core Questionnaire: bn1302 (renamed into bdwell), bn1303 (renamed into bfloor), bint_sth and bint_stm, bint_pr1 - 5.
- Variables now available: bint_st and bint_pr, bn884*

IMPROVEMENTS INTRODUCED WITH V.1.1. in the derived variables calculated for Nesstar GGS micro data files (March 2013):

- Variables corrected: b203c_*w and b204c_*w (previously frequencies greater than 7 were put equal to system missing, now they are put as equal to seven).
- Variables previously dropped and now available: bint_st and bint_pr.

FIRST DATASET RELEASED: V. 1.0. (November 2012).

Processing Checks

WAVE 2 DATA HARMONISATION: see "Extent of Processing Checks" "WAVE 1 DATA HARMONISATION".

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

Notes

WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

GGG_Wave1_Bulgaria_V.4.4.

# Cases	12858
# Variable(s)	1642
File Structure	Type: relational Key(s): arid (R identification number)

File Content

GGG Wave 1

VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.

Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.

The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.

Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.

Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.

A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".

Version

Harmonized dataset, GGS Wave1, version 4.4.

Improvements of GGS_Wave1_V.4.4

- The update from v4.3 to v4.4 includes corrections of existing variables.
- Belgium: Information previous partnership is updated. In previous versions, start of cohabitation was in fact start of relationship. This has been corrected.

For more information please read:

Marteau, Benjamin. Correction of Dates of Partnership Formation and Separation in the Consolidated Wave 1 of the Generations and Gender Survey (GGS) Belgium. (2021) 39 pages

- Update a5114_1dig for all countries but Sweden and Italy

variable	V4.3	V.4.4
a5114_1dig	Wrong value	Corrected (not for Sweden and Italy)
a334m_* - a352b_*	Wrong value	Corrected (only for Belgium)

IMPROVEMENTS INTRODUCED WITH V.4.3. (August 2016):

Variables corrected with Version 4.3.

- fertintent (no more ambiguous labelling)
- a1101 (corrected error in coding)
- aweight (now available also for NLD CZE SWE POL)
- aregion (now available also for HUN)
- aplace (now available also for HUN)
- a5112 (corrected routing error for ROU)
- a5113 (corrected routing error for ROU)
- a5114 (corrected routing error for ROU)
- a5115 (corrected routing error i for ROU)
- a211b_ (corrected error for POL & GEO)
- ankids (corrected error for POL & GEO)
- a1008mnth (corrected error for NGR & BEL)
- a108 (now available for SWE)
- a109_1 (now available for SWE)
- a109_2 (now available for SWE)
- a149 (now available for SWE)
- a309 (now available for SWE)
- aregion (now available for SWE)
- a620_ (corrected error for DEU & CZE)
- a402 (corrected error for POL)
- a149 (corrected error routing error in NOR)
- a344 (corrected error routing error in NOR)
- a256_ (corrected error for POL & GEO)

IMPROVEMENTS INTRODUCED WITH V.4.2. (February 2014):

The update from v4.1 to v4.2 does not include corrections of existing variables.

The update only includes additional variables which are derived from the pre-existing datasets

- Variables derived from grid variables and variables which concern the respondents and his/her partner: numdissol numdivorce nummarriage numpartners livingwithpartner childprevp femage maleage femeduc maleeduc fertintent numbiol numres numnonres numstep numallchild ageyoungest ageoldest numrespleave numotherparentleave corespchild corespren corespgrandp coressibl.

- Variables derived from month and year variable:

a808Dur a822Dur a907Dur a911Dur a914Dur; a303cAgeP a315AgeP a316cAgeP a374cAgeP a608AgeP a610AgeP a617bAgeP a621AgeP a914AgeP a941AgeP; a107AgeR a121AgeR a150AgeR a239aAgeR a239bAgeR a240AgeR a301AgeR a302bAgeR; a311AgeR a314bAgeR a314dAgeR a371AgeR a372bAgeR a603AgeR a608AgeR a610AgeR a613AgeR a614AgeR a619AgeR a621AgeR a816AgeR a822AgeR a871AgeR a5116AgeR a5117bAgeR; a302bTdiff a314bTdiff a314dTdiff a372bTdiff.

- Variables derived from hours and minutes variables: a324_hour a520_hour a540_hour.

- Variables derived from frequency and unit variables:

a205mnth,a241mnth,a325mnth,a355mnth,a359mnth,a363mnth,a367mnth,a521mnth,a541mnth,a1008mnth,a1102mnth; a203c_?w a204c_?w.

- Occupation variables recoded into ISCO-88 1 digit: a828_1dig a832_1dig a861_1dig a917_1dig a921_1dig a933_1dig a5112_1dig a5114_1dig.

IMPROVEMENTS INTRODUCED WITH V.4.1. (April 2012):

- Variables corrected: amarstat, ankids, a540.
- Value labels defined: a828, a832, a929*.

IMPROVEMENTS INTRODUCED WITH V.4.0 (March 2012):

- New constructed variables: asex age abyear aeduc aactstat aparstat amarstat anpartner ankids ahhsz ahhtype.
- New consolidated variables on respondents' current activity: a870, a871m, a871y, a873, a874, a875.
- New consolidated variables on respondents' partners current activity: a940, a941m, a941y, a943, a945.
- Variables previously unavailable, now available: aweight (composed post-stratification weight that combines two weights: a) based on age, gender, region (full matrix) and b) based in age, sex, household size (margins))
- Variables corrected: a601 and a602 (corrected, with consequences on the response rate of subsequent variables), a622, a623, a624, a625, a626, a627*, a628*, a629*, a631*, a1008, a1008u, a383 (now rounded)
- Changes in the variables labels: a203b_* ("day centre", "kindergarten" "other" were country specific values; now coded into GGS values ("day centre" to "day care centre", "kindergarten" to "nuresery", "other" to "other")

IMPROVEMENTS INTRODUCED WITH V.3.0 (August 2010):

- New consolidated variables: a370, a838, a384.
- Changes in the variable/value labels: for all variables now labels for value 7,8,9 are available; a148, a308 and a321(no correct country-specific value 1101, instead of 1201); a309 (now three values recoded into 3 cs values); a374b (introduced labels for value 1101); a374b (unused value labels dropped); a380, a514, a5113, a5115(now all values have labels); a1101 (value labels corrected).
- Variables renamed: a203c_1u...`i'u and a204c_1u...`i'u renamed respectively into a203cu_1...`i' and a204cu_1...`i'.
- Variables corrected: a106b, a111, a303b, a306, a374a, a513b, a515, a533b, a535(country-specific values in 4 digits instead of 5 as in the previous version); a1009 (now counry-specific values have 4 digits instead of 3) a129 and a368(all system missing in the previous version due to an erroneous routing flag, now this is fixed); a414 (wrong value 4 recoded into 7 - "R does not know")
- Variables with no country-specificities anymore: a112a (value 1101 recoded into 2); a1008 (two cs variables harmonized into one variable;

FIRST DATASET RELEASED: V. 1.8. (March 2010).**Processing Checks****WAVE 1 DATA HARMONISATION**

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more then one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

Variables List

Dataset contains 2999 variable(s)

Information	[Type= discrete] [Format=numeric] [Range= 1-2401] [Missing=*/97/98/99]
Statistics [NW/ W]	[Valid=9312 /-] [Invalid=32 /-]
Definition	Q 001
Pre-question	Interviewer Instruction: Write in the time and date when the interview starts.
Literal question	Interview started at...on...
Interviewer's instructions	<p>Interviewer Instruction: Read the following text.</p> <p>This survey is a continuation of the Generations and Gender Survey in which you participated three years ago. It is part of an international programme co-ordinated by the UN Economic Commission for Europe. An interesting feature of our research is that it tries to follow the lives of people over a long period of time.</p> <p>The aim of this research is to learn more about the everyday life, circumstances, and opinions of people and families. We want to gather information about the factors that influence the formation of new families, childbearing and preparation for old age. We also want to gather information about the lives of the young, middle-aged and old generations. This survey will show how people's life and family circumstances have changed over time, which will improve understanding of impediments of family life and relations of generations and help to develop policies for the future.</p> <p>Each person's answer is very important to us, because each person who was visited and questioned represents a particular group of our society. Therefore, although they were randomly selected, the participants of this survey proportionally represent all of the inhabitants of this country. That is why it is important to question the same people again this time.</p> <p>We will hold the information you give us in the strictest confidence, and use it only for statistical processing. If possible, it would be better if we could have this interview without others being present.</p>

# bndurselfemplstatuses: Total duration (in month) of Rs working statuses as self employed since age 16 (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-744] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=580 /-] [Invalid=8764 /-] [Mean=117.276 /-] [StdDev=101.436 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as self employed since age 16 (code 3 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

# bndurretiredstatuses: Total duration (in month) of Rs working statuses as retired since age 16 (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-660] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=2119 /-] [Invalid=7225 /-] [Mean=149.333 /-] [StdDev=84.987 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as retired since age 16 (code 6 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

# bndurmilitarystatuses: Total duration (in month) of Rs working statuses as in military or social servc (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-487] [Missing=* /997/998/999]		
Statistics [NW/ W]	[Valid=3044 /-] [Invalid=6300 /-] [Mean=23.45 /-] [StdDev=12.567 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as in military or social service since age 16 (code 7 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

bndurparleavestatuses: Total duration (in month) of Rs working statuses as in parental leave, care leave (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-588] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=2542 /-] [Invalid=6802 /-] [Mean=40.41 /-] [StdDev=26.474 /-]
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
Literal question	When did this period of [activity] start? When did this period of [activity] end?
Notes	Total duration (in month) of Rs working statuses as in parental leave, care leave since age 16 (code 10 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

# bndurilldisabledstatuses: Total duration (in month) of Rs working statuses as ill or disabled for a long t (W2)			
Literal question		When did this period of [activity] start? When did this period of [activity] end?	
Notes		Total duration (in month) of Rs working statuses as ill or disabled for a long time or permanently since age 16 (code 11 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=354 /-] [Invalid=8990 /-]		
Definition	Derived variable from Q 117.		
Universe	If R's address has changed between the waves		
Literal question	In what month and year did you start living in this [type of accommodation]?		
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the current dwelling was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

b315AgeP: Non resident partner's age at time of interview (W2)

Information	[Type= discrete] [Format=numeric] [Range= 10-9999] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=358 /-] [Invalid=8986 /-]
Definition	Derived variable from Q 330.
Universe	If R has a non-resident partner (code 1 on Q 325).
Literal question	In what month and year was your partner/spouse born?
Notes	Partner's time of birth was taken from b315y and b315m. If information on partner's month of birth / month was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# b374cAgeP: Partner's age of obtaining permanent residence (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=48 /-] [Invalid=9296 /-]		
Definition	Derived variable from consolidated variables b374cm and b374cy (variables obtained from Q 322c and 331c: variables b303cm, b316cm, b303cy, b316cy; if partner is the same then W1 the data is merged from W1, variables a303cm and a303cy).		
Universe	If R has a partner (co-resident or non-resident)		
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?		
Notes	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 330. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# b621AgeR: R's age at last use of anything to prevent pregnancy (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 11-9999] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=178 /-] [Invalid=9166 /-]		
Definition	Derived variable from Q 617		
Universe	If code 0 on Q 616		
Literal question	In what month and year did you last use or do anything to prevent pregnancy?		
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month at last use of anything to prevent pregnancy, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

Statistics [NW/ W]	[Valid=1110 /-] [Invalid=8234 /-]		
Definition	Q 924		
Universe	R is unemployed / student / retired / ill or permanently disabled / homemaker / in military or social service and had a job directly before this current status		
Pre-question	I would now like to ask a few questions about your previous job or business. If you were engaged in two or more jobs or businesses, I would like you to tell me only about the one in which you spent most of your working hours.		
Literal question	What was your last occupation? Please describe the principal activity you performed.		
Notes	Occupations were re-coded according to 1 digit ISCO codes

b871AgeR: R's age at start of current activity status (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=8882 /-] [Invalid=462 /-]
Definition	Derived variable generated from consolidated variables a871m and a871y (obtained from Q 930, variables b833m and b833y)
Literal question	In what month and year did you start this job or business?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

Pre-question	Now, we are going to talk about your work and studies since your 16th birthday. We are only interested in activities that lasted at least 3 months. Please choose from the activities on the card. If more than one activity applies to a certain period of time, for example, you were working and studying at the same time, please choose the activity in which you spent most time!		
Literal question	Which of the items on the card best describes what you were mainly doing at age 16?
