## Generations and Gender Survey Czech Republic Wave 1 & Wave 2 (Czech Republic Wave 1 & Wave 2)

### Overview

<b>Identification</b>	GGSW1.28
-----------------------	----------

#### Abstract

The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.

In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion".

The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:

- Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets.
- A broad age range. It includes respondents between the ages of 18 and 80.
- A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals.
- A large sample size. It has an average of 9,000 respondents per country at Wave 1.
- A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior.
- Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.

<b>Kind of Data</b>	Survey data
---------------------	-------------

<b>Unit of Analysis</b>	Individuals
-------------------------	-------------

### Scope & Coverage

<b>Keywords</b>	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender Relations, Intergenerational exchange, Informal and formal care, Well being and health, Grandparenthood, Economic activity, Retirement
-----------------	---

<b>Time Period(s)</b>	2005-2009
-----------------------	-----------

<b>Countries</b>	Czech Republic
------------------	----------------

#### Geographic Coverage

Whole territory of Czech Republic.

#### Universe

##### WAVE 1

Complete interviews: 10 006; 80% of respondents subscribed with repeat survey.

##### WAVE 2

Complete interviews: 10 071 (of whom 3195 had been interviewed at Wave 1); 72 % of all Wave-2-respondents subscribed with repeat survey.

<b>Other Acknowledgment(s)</b>	Czech Statistical Office SC&C Ltd. – Survey, Consulting & Care , data collection, panel maintenance

<b>Sampling</b>	
<p><b><u>Sampling Procedure</u></b>  <b>WAVE 1 SAMPLING PROCEDURE</b>            Sampling: probability.</p> <p><b>WAVE 2 SAMPLING PROCEDURE</b>            Database from Wave 1 + quota sampling.</p>	
<p><b><u>Response Rate</u></b>  <b>WAVE 1</b>            There were 10 006 completed interviews.            - Complete interview: 42%            - Refusal: 36%            - Not eligible: 14% (empty flats/not found, uncollectible households, unsuited quota)            - Non-contact: 7%            The response rate by region varied from a minimum of 35% to a maximum of 55%.</p> <p><b>WAVE 2</b>            There were 10 071 completed interviews, of whom 3195 had been interviewed at Wave 1.            A) The response rates below concern panel interviews (interviews for which agreement with participation in a panel was obtained).            - Complete interview: 47%            - Refusal: 38%            - Not eligible: 14% (empty flats/not found, not alive, has moved)            Among the same group of respondents, the response rate by region varied from a minimum of 26% to a maximum of 61%.            B) The response rates are calculated with reference to Wave 1 total sample.            - Complete interview: 32%            - Refusal: 51%            - Not eligible: 17% (empty flats/not found, not alive, has moved)</p>	
<p><b><u>Weighting</u></b>            A standardised weight variable is available for in Wave 2 dataset.</p>	

<b>Data Collection</b>	
<b>Data Collection Dates</b>	Wave 1: start 2005-02-04 Wave 1: end 2005-09-21 Wave 2: start 2008-01-31 Wave 2: end 2009-03
<b>Data Collection Mode</b>	WAVE 1 Method: Face-to-Face (personal interview) Technique: Paper and pencil (PAPI)  WAVE 2

	Method: Face-to-Face (personal interview) Technique: Computer-assisted personal interviewing (CAPI) + Computer-Assisted Self Interviewing (CASI)
<b>Data Collection Notes</b>	
WAVE 1 DATA COLLECTION	
1. Questionnaire localization	
- Pilot survey was conducted from 29/11.-20/12.2004, on 394 persons.	
- Length of interview: in mean interviews lasted 77 min; 24% of interviews lasted for 90+ min.; 32 % lasted less than 60 min.	
2. Contact protocols	
- Advance letter: information letter sent in advance to respondents	
- Cold contacts: Face-to-Face	
- Scheduling / scattering: Personal interviewer's visit - stating a date of an interview	
- Min number of contacts: 4. only after the 4th unsuccessful visit an interviewer was to find a substitute (identical in basic characteristics=sex, age, education, size of domicile)	
WAVE 2 DATA COLLECTION	
1. Questionnaire localization	
- Length of interview: in mean interviews lasted 77 min; 23% of interviews lasted for 90+ min.; 25 % lasted less than 60 min.	
2. Contact protocols	
- Advance letter: information letter sent in advance to respondents	
- Cold contacts: Face-to-Face	
- Scheduling / scattering: Personal interviewer's visit - stating a date of an interview	
- Min number of contacts: 4; only after the 4th unsuccessful visit an interviewer was to find a substitute (identical in basic characteristics=sex, age, education, size of domicile)	
<b>Questionnaires</b>	
Structured questionnaire in Czech.	
<b>Data Collector(s)</b>	SC&C Ltd. – Survey, Consulting & Care
<b>Supervision</b>	
WAVE 1 AND WAVE 2 ACTIONS	
- Tracking of sampled units	
In order to keep contact with respondents they received a special leaflet with an acknowledgement for their participation and with the main results from the survey. Additionally a thank you letter was sent together with information about basic results; a reminder was also sent at the New Year time; there were also telephone contacts with the CS&C agency. However there were limited financial resources and the fact of trying to keep in contact with respondents was somewhat depreciated due a general unfavourable attitudes towards surveys in the country.

- Variables derived from frequency and unit variables: b203c\_xw, b204c\_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth.

- Occupation variables recoded into ISCO-88 1 digit: b828\_1dig, b832\_1dig, b861\_1dig, b917\_1dig, b921\_1dig, b933\_1dig.

- Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnumworkstatuses, bnumstudentstatuses, bnumemplstatuses, bnumselfemplstatuses, bnumhelpfamstatuses, bnumunemplstatuses, bnumretiredstatuses, bnummilitarystatuses, bnumhomestatuses, bnummatleavestatuses, bnumparleavestatuses, bnumdisabilitystatuses, bnumotherstatuses, bnum1401, bnum1501, bnum1801, bnum1301, bnumparttime, bnumfulltime, bnumboth, bnumparttime\_1801, bnumparttime\_1802, bnumpartfulltime\_1803, bnumfulltime\_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses, bndurselfemplstatuses, bndurhelpfamstatuses, bndurunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses, bndurhomestatuses, bndurmatleavestatuses, bndurparleavestatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876\_xAgeR, bn877\_xAgeR, bn878xAgeR, bn879\_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

IMPROVEMENTS INTRODUCED WITH V.1.2. in Nesstar GGS micro data files (April 2015):

Publication of variables that were previously deleted before dataset release in Nesstar. The following variables are concerned: grid variables, month and year variables, hours and minutes variables, frequency and unit variables, and occupation variables.

FIRST DATASET RELEASED: V. 1.1. (July 2014).

### **Processing Checks**

WAVE 2 DATA HARMONISATION: see "Extent of Processing Checks" "WAVE 1 DATA HARMONISATION".

### **Missing Data**

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

### **Notes**

WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

**GGGS\_Wave1\_CzechRepublic\_V.4.4**

<b># Cases</b>	10006
<b># Variable(s)</b>	1508
<b>File Structure</b>	Type: relational Key(s): arid (R identification number)

**File Content**

VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.

Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.

The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.

Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.

Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.

A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119\_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".

**Version**

Harmonized dataset, GGS Wave1, version 4.4.

**Improvements of GGS\_Wave1\_V.4.4**

- The update from v4.3 to v4.4 includes corrections of existing variables.
  - Belgium: Information previous partnership is updated. In previous versions, start of cohabitation was in fact start of relationship. This has been corrected.
- For more information please read:

Marteau, Benjamin. Correction of Dates of Partnership Formation and Separation in the Consolidated Wave 1 of the Generations and Gender Survey (GGS) Belgium. (2021) 39 pages

- Update a5114\_1dig for all countries but Sweden and Italy

variable	V4.3	V.4.4
a5114_1dig	Wrong value	Corrected (not for Sweden and Italy)
a334m_* - a352b_*	Wrong value	Corrected (only for Belgium)

**IMPROVEMENTS INTRODUCED WITH V.4.3. (August 2016):**

Variables corrected with Version 4.3.

- fertintent (no more ambiguous labelling)
- a1101 (corrected error in coding)
- aweight (now available also for NLD CZE SWE POL)
- aregion (now available also for HUN)
- aplace (now available also for HUN)

- a5112 (corrected routing error for ROU)
- a5113 (corrected routing error for ROU)
- a5114 (corrected routing error for ROU)
- a5115 (corrected routing error i for ROU)
- a211b\_ (corrected error for POL & GEO)
- ankids (corrected error for POL & GEO)
- a1008mnth (corrected error for NGR & BEL)
- a108 (now available for SWE)
- a109\_1 (now available for SWE)
- a109\_2 (now available for SWE)
- a149 (now available for SWE)
- a309 (now available for SWE)
- aregion (now available for SWE)
- a620\_ (corrected error for DEU & CZE)
- a402 (corrected error for POL)
- a149 (corrected error routing error in NOR)
- a344 (corrected error routing error in NOR)
- a256\_ (corrected error for POL & GEO)

FIRST DATASET RELEASED: V. 4.2. (May 2014).

### **Processing Checks**

#### **WAVE 1 DATA HARMONISATION**

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

##### 1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

##### 2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("\_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3\_# or bhg3\_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

##### 3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

##### 4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

##### 5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to loose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

##### 6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.

- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

#### **Missing Data**

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

#### **Notes**

Before publication in Nesstar GGS micro data files are further processed so as to ease online data browsing and analysing.

We delete variables having all system missings.

# Variables List

Dataset contains 2879 variable(s)

### # arid: R identification number (W2)

**Information** [Type= discrete] [Format=numeric] [Range= 11-511201] [Missing=\*]

**Statistics [NW/ W]** [Valid=3149 /-] [Invalid=0 /-] [Mean=5239.505 /-] [StdDev=3166.988 /-]

### # bweight: Weight

**Information** [Type= continuous] [Format=numeric] [Range= 0.217456071260202-4.34531192932802] [Missing=\*/9999997/9999998/9999999]

**Statistics [NW/ W]** [Valid=3149 /-] [Invalid=0 /-] [Mean=1.005 /-] [StdDev=0.598 /-]

**Definition** Standardized weight based on the country specific population weight.

### # bmonth: Mnth of interview (W2)

**Information** [Type= discrete] [Format=numeric] [Range= 1-2401] [Missing=\*/97/98/99]

**Statistics [NW/ W]** [Valid=3149 /-] [Invalid=0 /-]

**Definition** Q 001

**Pre-question** Interviewer Instruction: Write in the time and date when the interview starts.

**Literal question** Interview started at...on...

**Interviewer's instructions** Interviewer Instruction: Read the following text.

This survey is a continuation of the Generations and Gender Survey in which you participated three years ago. It is part of an international programme co-ordinated by the UN Economic Commission for Europe. An interesting feature of our research is that it tries to follow the lives of people over a long period of time.

The aim of this research is to learn more about the everyday life, circumstances, and opinions of people and families. We want to gather information about the factors that influence the formation of new families, childbearing and preparation for old age. We also want to gather information about the lives of the young, middle-aged and old generations. This survey will show how people's life and family circumstances have changed over time, which will improve understanding of impediments of family life and relations of generations and help to develop policies for the future.

## File : GGS\_Wave2\_CzechRepublic\_V1.3.

### # bmonth: Mnth of interview (W2)

Each person's answer is very important to us, because each person who was visited and questioned represents a particular group of our society. Therefore, although they were randomly selected, the participants of this survey proportionally represent all of the inhabitants of this country. That is why it is important to question the same people again this time. We will hold the information you give us in the strictest confidence, and use it only for statistical processing. If possible, it would be better if we could have this interview without others being present.

### # bnumworkstatuses: The number of non-empty slots in the Activity and Education History grid (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-26] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=3149 /-] [Invalid=0 /-]
<b>Definition</b>	Derived variable from Q 801 (variables bn871_*).
<b>Pre-question</b>	Now, we are going to talk about your work and studies since your 16th birthday. We are only interested in activities that lasted at least 3 months. Please choose from the activities on the card. If more than one activity applies to a certain period of time, for example, you were working and studying at the same time, please choose the activity in which you spent most time! Card 104
<b>Literal question</b>	Which of the items on the card best describes what have you mainly been doing since age 16?
<b>Notes</b>	The number of non-empty slots in the Activity and Education History grid (Q 801, variable bn871_*).

Value	Label	Cases	Percentage
1		294	9.3%
2		971	30.8%
3		765	24.3%
4		458	14.5%

**# bndurselfemplstatuses: Total duration (in month) of Rs working statuses as self employed since age 16 (W2)**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-744] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=162 /-] [Invalid=2987 /-] [Mean=103.006 /-] [StdDev=97.844 /-]
<b>Definition</b>	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
<b>Literal question</b>	When did this period of [activity] start? When did this period of [activity] end?
<b>Notes</b>	Total duration (in month) of Rs working statuses as self employed since age 16 (code 3 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

<b># bndurstudwhilework: Total duration (in month) of Rs periods of studying while working (W2)</b>			
<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-528] [Missing=*/997/998/999]		
<b>Statistics [NW/ W]</b>	[Valid=3136 /-] [Invalid=13 /-]		
<b>Definition</b>	Derived variable from Q 810, Q 811, Q 812, and Q814 (variables bn880, bn881m_*, bn881y_*, bn882m_*, bn882y_*, bn884_*).		
<b>Universe</b>	If code 1 on Q 810 (variable bn880)		

**# bndurstudwhilework: Total duration (in month) of Rs periods of studying while working (W2)**

<b>Pre-question</b>	Now I would like to talk about these periods of studying, starting with the first one if there has been several periods.
<b>Literal question</b>	When did the first/next period start? When did it end?
<b>Notes</b>	Total duration (in month) of Rs periods of studying while working (code 1 on Q 810, variable bn880). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

**# b372bAgeR: R's age of marrying current spouse (W2)**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=1461 /-] [Invalid=1688 /-]
<b>Definition</b>	Derived variables from consolidated variables b372bm and b372by (variables obtained from Q 304 and 311: variables bn304m, b335bm_*, bn304y, b335by_*; if partner is the same then W1 the data is merged from W1, variables a302by and a302bm). It only refers to co-resident partner.
<b>Universe</b>	If R has a co-resident partner.
<b>Literal question</b>	In what month and year did you marry?
<b>Notes</b>	R's time of birth was deducted from HH grid. If information on the month of birth / month when married current spouse was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
<b># b374cAgeP: Partner's age of obtaining permanent residence</b>			
<b>Information</b>	[Type= continuous] [Format=numeric] [Range= 0-9999] [Missing=*997/998/999]		
<b>Statistics [NW/ W]</b>	[Valid=87 /-] [Invalid=3062 /-] [Mean=17.184 /-] [StdDev=12.238 /-]		
<b>Definition</b>	Derived variable from consolidated variables b374cm and b374cy (variables obtained from Q 322c and 331c: variables b303cm, b316cm, b303cy, b316cy; if partner is the same then W1 the data is merged from W1, variables a303cm and a303cy).		
<b>Universe</b>	If R has a partner (co-resident or non-resident)		
<b>Literal question</b>	In what month and year did he/she first start living permanently in [COUNTRY]?		
<b>Notes</b>	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 330. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".
