POL: n=901 respondents did not answer the question a602 about current pregnancy due to a different filter in the Polish Survey. We decided to keep their information on fertility intentions although we cannot exclude the possibility that some of these respondents are pregnant or have a pregnant partner. These respondents can be identified because they have a non response (.a in Stata and 9 in SPSS) on a602 and a valid response (1,2,3,4) on a622.

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-72] [Missing=* /997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=1607 /-] [Invalid=8399 /-] [Mean=49.107 /-] [StdDev=13.861 /-]
<b>Definition</b>	Generated from consolidated variables a941m and a941y.
<b>Universe</b>	If R has a partner.
<b>Literal question</b>	In what month and year did your partner/spouse start this leave? In what month and year did he/she become unemployed? Since what month and year is your partner/spouse a student, in school, or in vocational training? In what month and year did your partner/spouse retire? Since what month and year is your partner/spouse a homemaker?
<b>Notes</b>	Partner's time of birth was deducted from HH grid (co-resident partner) or Q 311 (non resident partner). If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". In Belgium if the partner is still in education (a941y==2301) then the variable was coded as system missing.
