# Generations and Gender Survey Georgia Wave 1 & Wave 2 (GGS Georgia Wave 1 & Wave 2)

## *Family Relations and Intergenerational Support*

### Overview

<b>Identification</b>	GGS.W1.W2.13
-----------------------	--------------

#### **Abstract**

The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.

In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion".

The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:

- Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets.
- A broad age range. It includes respondents between the ages of 18 and 80.
- A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals.
- A large sample size. It has an average of 9,000 respondents per country at Wave 1.
- A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior.
- Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.

<b>Kind of Data</b>	Survey data
---------------------	-------------

<b>Unit of Analysis</b>	Individuals
-------------------------	-------------

### Scope & Coverage

<b>Keywords</b>	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender relations, Intergenerational exchanges, Informal and formal care, Well-being and health, Grandparenthood, Economic activity, Retirement
-----------------	--

<b>Time Period(s)</b>	2006-2009
-----------------------	-----------

<b>Countries</b>	Georgia
------------------	---------

#### **Geographic Coverage**

##### WAVE 1

Whole territory of Georgia except of autonomy republic of Abkhazia and part of former South-Ossetia, territories that were not covered by population census of 2002.

##### WAVE 2

Same territory and population than Wave 1. However, 3 villages in Shida Kartli region with 75 respondents from Wave 1 are not covered anymore by the survey. As a result of the military conflicts in August 2008, they are not anymore under the jurisdiction of Georgian governments. Close collaboration of GCPR with Georgian governmental structure yielded to contact with 64% of them.

#### **Universe**

##### WAVE 1

Resident non-institutionalized population aged 18-79 around whole Georgia covered by population census of 2002.

**WAVE 2**

Persons who took part to WAVE 1 willing to participate again to the survey.

**Producers & Sponsors**

<b>Primary Investigator(s)</b>	Dr. Irina Badurashvili, Director of the Georgian Centre of Population Research (GCPR)
<b>Other Producer(s)</b>	Georgian Centre of Population Research (GCPR)
<b>Funding Agency/ies</b>	Institute national d'études démographiques (National institute of demographic studies) (INED) , 85% of fieldwork for Wave 1 - 20% of fieldwork for Wave 2 United Nations Population Fund in Georgia (UNFPA-Georgia) , 15% of fieldwork for Wave 1 - 80% of fieldwork for Wave 2
<b>Other Acknowledgment(s)</b>	GGP Project team in Georgia , GGP implemetation in Georgia , GCPR

**Sampling****Sampling Procedure****WAVE 1 SAMPLING PROCEDURE****1. Sampling frame**

1.1 Type of frame: Name lists constructed several months prior to the fieldwork on the basis of micro-census of population residing in PSU selected from the complete list of census units by population census of 2002. Georgian statistical office has prepared the electronic version of households' address information based on initial paper documentation of census 2002. Then interviewers have visited all the households (more than 31,000) and recorded the personal information (name, age and sex) on all household members. This information was computerized in GCPR and used at the second stage of sampling for sample of appropriate individuals from the list.

1.2 Frame coverage: Total target population residing on the whole territory of Georgia aside of autonomy republic of Abkhazia and part of former South Ossetia, territories where jurisdiction of Georgian authorities is not expanding in fact and that were not covered by Georgian population census of 2002.

1.3 Frame size: 16,852 population census units.

1.4 Level of units available: Individuals.

**2. Sampling method**

2.1 Sampling method type: Multistage- 2 stages' design of sampling, at the first stage: sampling of PSU, at the second stage: individuals for interview

**2.2 Sampling stage definition**

- PSU: is equal to population census unit by population census of 2002; those census units with less than 40 households were merged with neighbouring census unit and considered as one primary sampling unit.

- SSU: Potential respondent.

- TSU: NA.

**2.3 Sampling stage size**

- PSU: 400.

- SSU: 10,000 respondents in basic list and about 4,000 in the reserve list upon request

- TSU: NA.

**2.4 Unit selection: PPS-method.**

2.5 Final stage unit selection: SRS (Simple Random Sampling).

2.6 Within Household unit selection: NA.

2.7 Stratification: Explicit: stratification at the first stage of sampling (sampling of PSU) by type of settlements: city (30,000 inhabitants and more), town (less than 30,000 inhabitants), rural settlement.

**2.8 Sample size:**

- Starting size sample: 10,000.

- Aimed total size at Wave 1: 10,000.

- Aimed total size at Wave 3: None.

#### 2.9 Estimated Non-response

- Non response measures: Substitutes - selected ad-hoc: reserve list of potential respondents
- Within household non-responses measures: None - the household was marked as non-response.

#### WAVE 2 SAMPLING PROCEDURE

To conduct as many repeated interviews as possible of 10.000 respondents at GGS Wave 1.

#### **Response Rate**

##### WAVE 1

Response rate - Final disposition codes:

I = complete interview: 10,000

P = partial interview: 0 (There were 2 partial interviews, but with less than 67% of all in-scope questions answered)

NE = non-eligible : 16

NC = non-contact : 604

R = refusal: 363

O = other non-response: 802

UC = unknown eligibility, contacted: DK

UC = unknown eligibility, non-contact: DK

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: DK

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible DK

##### WAVE 2

Response rate - Final disposition codes:

- I = complete interview: 8,303

- P = partial interview: 6 (in capital city Tbilisi)

NE = non-eligible : DK

NC = non-contact : 21

R = refusal: 20

O = other non-response: DK

UC = unknown eligibility, contacted: DK

UC = unknown eligibility, non-contact: DK

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: DK

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible DK

- Response Rate: 83%. The lowest response rate was in the capital-city Tbilisi-79%. Among other regions with the lowest response rate there is Kvemo-Kartli region (82%). The highest response rate was in Kakheti region (89%).

- Attrition rate: Attrition between two waves did not exceed 17% - of which 3% were refusals; 0.6% were absence of individual (military service, prison, sailor etc.); 0.4% were illness of respondent that made impossible the interview; 4% were deaths of respondents between the two waves; 4% were temporary away respondents; 5% were new addresses of respondents that could not be obtained.

Information on Wave 2 is not complete. Further information is forthcoming.

#### **Weighting**

##### WAVE 1 WEIGHTING

Regional weights (for 11 administrative regions of Georgia) by gender and 2 aggregated age groups of respondents (18-44 and 45-79) have been built based on the results of implemented fieldwork. Interviewers in case of interview's failure were allowed to replace the potential respondent from the name-list of basic sample by the appropriate (same gender and age group) respondent from the reserve list in the frame of same PSU. But when no one was left anymore, the appropriate respondents in reserve list (the name list in some less populated areas was limited due to the small number of inhabitants in definite PSU) first respondents of other age group and next of opposite gender have been interviewed. Finally there is a slight under-representation of young (in age group 18-44), women (49.04% instead of 50.6 %), and men (53.7% instead of 54.7%) in the sample of interviewed respondents compared with the structure of the target population.

In the harmonised dataset the variables aweight is provided, which is a standardized weight based on the country specific population weight (recommended for use).

WAVE 2 WEIGHTING: metadata are forthcoming.

<b>Data Collection</b>	
<b>Data Collection Dates</b>	Wave 1: start 2006-03 Wave 1: end 2006-05 Wave 2: start 2009-04 Wave 2: end 2009-06
<b>Data Collection Mode</b>	Method: Face-to-Face (personal interview) Technique: Paper and pencil (PAPI)
<b>Data Collection Notes</b>	
<p>WAVE 1 DATA COLLECTION</p> <p>1. Interviewers</p> <p>1.1 Total number of interviewers: 131.</p> <p>1.2 Number of interviewers in the field: Each interviewer had a fixed number of interviews to carry out. Some of them could finish the work earlier than others.</p> <p>1.3 Network organization: Field coordinators - 10 regional coordinators in all administrative regions of Georgia, aside of Tbilisi, coordination of fieldwork in Tbilisi, capital city - by project team.</p> <p>1.4 Working arrangement of interviewers: Fully contracted for period of fieldwork people, mostly professional interviewers, some specially trained and fully employed.</p> <p>1.5 Payment of interviewers: Per interview, some additional benefits for those working in mountain areas and areas with poor transport communication.</p> <p>2. Interviewer training:</p> <p>2.1 General interviewing: No.</p> <p>2.2 Survey specific: Interviewers in Tbilisi, capital city, were mostly the experienced interviewers, so one-week of training in GGS-specific issues has been conducted for them with home works during the training course and exams at the end. In regions, two stages-training has been implemented. At the first stage, interviewers were trained by regional supervisors, then the project team visited each region with purpose of organizing of exams for regional interviewers, and for those successfully passed this exam additional two-day training with home works and experimental interviewing. All regional supervisors were trained in advance in Tbilisi, provided with instruction of procedure of training at place. Groups of interviewers were designed with taking into account their experience. People having the experience of dealing with the economic surveys, as interviewers of household surveys of Georgian statistical office were trained by distinctive program than those worked before mainly on sociological surveys.</p> <p>2.3 Length: Duration of each training session was one week, some interviewers who did not successfully pass exams were invited repeatedly to attend part of the training session on definite questionnaire chapters with the next group</p> <p>2.4 Control of performance: Yes, 3 respondents in each PSU consisted 25 interviewed households have been visited for control. In case of problems found all addresses were visited for control. All filled questionnaires before the data-entry passed the procedure of logical control by the special group of trained staff.</p> <p>2.5 Interviewer survey: Permanent discussions with interviewers and supervisors during fieldwork allowed us to adjust the operating procedures during the fieldwork.</p> <p>3. Contact protocols</p> <p>3.1 Advance letter: Household visit during micro-census of population in selected PSU several months before survey. Interviewers were required to mark any family members unable to be interviewed due to health conditions.</p> <p>3.2 Cold contacts: During micro-census of population in selected PSU several months prior to survey using face-to-face contact with any family member where respondent had chance to be chosen for survey.</p> <p>3.3 Scheduling / scattering: The scheduling procedure was up to interviewers and it was different in urban and rural areas and dependent on respondent's employment schedule and his/her personal preferences. Interviewers in big cities were advised not to call to potential respondents in advance, as pilot survey has shown that probability of refusal is higher in this case, while if potential respondents meet with interviewers they are more likely to do a favour and accept interviewing, or in case of time-limits for the respondent to make an appointment for another time.</p> <p>3.4 Contact history: No, as interviewers were allowed to replace the potential respondent. However, regional supervisors were responsible for monitoring of all cases of replacement and proper following the procedure of replacement.</p> <p>3.5 Min number of contacts: 3 visits.</p> <p>3.6 Max number of contacts: NA.</p>	

#### 4. Questionnaire localization

4.1 Validation: Re-translation was used.

4.2 Pre-test: A pre-test was carried out in September 2004 (150 respondents). The design effect characteristics and response rates found by the pilot study confirmed that proposed sampling design is sufficient to meet the GGP requirement. Furthermore, it was found that some questions in the Core Questionnaire needed to be modified and reformulated.

4.3 Length of interview: Average length of interview: 71.1 minutes.

#### WAVE 2 DATA COLLECTION

- Total number of interviewers: 165

- Network organization: 10 regional supervisors in all administrative regions of Georgia, aside of Tbilisi, coordination of fieldwork in Tbilisi, capital city - by project team.

- Control of performance: Three stages of control:

1) Controllers have visited 8 randomly chosen addresses in each of 400 PSU (Nmax=25) provided by GCPR staff – 3200 addresses in total.

2) Interviewers having at least one problem on at least one controlled address were additionally screened. In total the second stage of control have been implemented in 36 PSU.

3) In case of significant discrepancies in age of respondents between two waves GCPR staff was making comparison of personal information on respondent and his household composition by I and II wave.

#### Questionnaires

Structured questionnaire in Georgian and Russian.

#### **Data Collector(s)**

Georgian Centre of Population Research (GCPR) , Independent organisation

#### Supervision

##### WAVE 1 ACTIONS

1. Dealing with nonresponse

1.1 Screening: Yes, as a mini-census of population in selected PSU has been conducted.

1.2 Refusal conversion: Majority of the interviewers were working in the regions where they permanently live and were able to establish good contacts with people due to the knowledge of local peculiarities and attitudes between people. This knowledge made easier for them to convince potential respondents for interview.

1.3 Incentives: None.

2. Tracking of sampled units

2.1 Respondent contact information: Yes, contact details mainly fix and mobile telephone numbers of the respondent were collected for following contacts.

2.2 Other contact information: Yes, contact details of any person who we may apply later were collected.

2.3 Cards: Only a brochure with results of Wave 1 was sent.

2.4 Additional surveys: No.

2.5 Administrative records: No

WAVE 2 ACTIONS: metadata are forthcoming

## **Data Processing & Appraisal**

#### Data Editing

The datafile was cleaned (consistency checking, wildcode checking, ....) by SPSS specialist before being sent to data harmonization center.

## **Accessibility**

#### **Access Authority**

UNECE Population Unit - Palais des Nations - CH-1211 Geneva 10 - Switzerland. Tel: +41 22 917 24 77 - fax: +41 22 917 01 07 , <http://www.unece.org/pau/> , [ggp@unece.org](mailto:ggp@unece.org)

<p><b><u>Version</u></b> Harmonized dataset, GGS Wave2, version 1.3.</p> <p>IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.3 (August 2016) Correction of the following variables that were previously erroneous: b343_*, bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage.</p> <p>IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.2 (April 2015) The update from v1.1 to v1.2 does not include corrections of existing variables. The update only includes additional variables which are derived from the pre-existing datasets.</p> <p>- Variables derived from grid variables and variables which concern the respondents and his/her partner: bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage, bnumpartnerships, bnumpartnerships, bnrespartafterw1, blivingwithpartner, bchildprevp, bnchildprevp, bfemage, bmaleage, bfemeduc, , bmaleeduc, bfertint, bnumbiol, bnumnonres, bnumres, bnumstep, bnumallchild, bageoldest, bageyoungest, bcoreschild, bcoresgrandp, bcoresparen, bcoressibl, bhhtype.</p> <p>- Variables derived from month and year variable: b121AgeR, b150AgeR, bn152AgeR, b239aAgeR, b239bAgeR, b240AgeR, bn304AgeP, b311AgeR, b315AgeP, b316cAgeP, b371AgeR, b372bAgeR, b372bTdiff, b374cAgeP,</p>	

b5116AgeR, b5117bAgeR, b603AgeR, b608AgeP, b608AgeR, b610AgeP, b610AgeR, b621AgeP, b621AgeR, b871AgeR, b907Dur, b911Dur, b914AgeP, b914Dur, b941AgeP.

- Variables derived from hours and minutes variables: b324hour, b520hour, b540hour, b221hour\_x.
- Variables derived from frequency and unit variables: b203c\_xw, b204c\_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth.
- Occupation variables recoded into ISCO-88 1 digit: b828\_1dig, b832\_1dig, b861\_1dig, b917\_1dig, b921\_1dig, b933\_1dig.
- Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnumworkstatuses, bnumstudentstatuses, bnumemplstatuses, bnumselfemplstatuses, bnumhelpfamstatuses, bnumunemplstatuses, bnumretiredstatuses, bnummilitarystatuses, bnumhomestatuses, bnummatleavestatuses, bnumparleavestatuses, bnumdisabilitystatuses, bnumotherstatuses, bnum1401, bnum1501, bnum1801, bnum1301, bnumparttime, bnumfulltime, bnumboth, bnumparttime\_1801, bnumparttime\_1802, bnumpartfulltime\_1803, bnumfulltime\_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses, bndurselfemplstatuses, bndurhelpfamstatuses, bndurunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses, bndurhomestatuses, bndurmatleavestatuses, bndurparleavestatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876\_xAgeR, bn877\_xAgeR, bn878xAgeR, bn879\_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

#### IMPROVEMENTS INTRODUCED WITH V.1.1. (March 2013):

- Variables corrected: bage, b203\* (unit of frequency now available), b510, b530, b626, b904a, b905, b906a, bn871 (added a country specific response category)
- Changes in the variable/value labels: b309, b322, b380 (value labels correspond to ISCO codes); bfloor, b5106b\_s, b5106b\_b; b861, b917, b921, b933 (some values which were not ISCO have been recoded into user missings), bn884 (bn884\_1 to bn884\_3 now available)
- Variables dropped because not part of the GGS Core Questionnaire: bn1401u\_1
- Variables now available: b149 (ISCO codes)

#### IMPROVEMENTS INTRODUCED WITH V.1.1. in the derived variables calculated for Nesstar GGS micro data files (March 2013):

- Variables corrected: b203c\_\*w and b204c\_\*w (previously frequencies greater than 7 were put equal to system missing, now they are put as equal to seven).
- Variables previously dropped and now available: bint\_st and bint\_pr.

FIRST DATASET RELEASED: V. 1.0. (November 2012).

#### **Processing Checks**

WAVE 2 DATA HARMONISATION: see "Extent of Processing Checks" "WAVE 1 DATA HARMONISATION".

#### **Missing Data**

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

#### **Notes**

WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables

consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

#### WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

### GGG\_Wave1\_Georgia\_V.4.4

# Cases	10000
# Variable(s)	1443
File Structure	Type: relational Key(s): arid (R identification number)

#### File Content

GGG Wave 1

VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.

Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.

The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.

Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.

Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.

A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119\_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".

#### Version

Harmonized dataset, GGS Wave1, version 4.4

#### Improvements of GGS\_Wave1\_V.4.4

- The update from v4.3 to v4.4 includes corrections of existing variables.
- Belgium: Information previous partnership is updated. In previous versions, start of cohabitation was in fact start of relationship. This has been corrected.

For more information please read:

Marteau, Benjamin. Correction of Dates of Partnership Formation and Separation in the

Consolidated Wave 1 of the Generations and Gender Survey (GGS) Belgium. (2021) 39 pages

- Update a5114\_1dig for all countries but Sweden and Italy

variable	V.4.3	V.4.4
a5114_1dig	Wrong value	Corrected (not for Sweden and Italy)
a334m_* - a352b_*	Wrong value	Corrected (only for Belgium)

#### IMPROVEMENTS INTRODUCED WITH V.4.3. (August 2016):

Variables corrected with Version 4.3.

- fertintent (no more ambiguous labelling)
- a1101 (corrected error in coding)
- aweight (now available also for NLD CZE SWE POL)
- aregion (now available also for HUN)
- aplace (now available also for HUN)
- a5112 (corrected routing error for ROU)
- a5113 (corrected routing error for ROU)
- a5114 (corrected routing error for ROU)
- a5115 (corrected routing error i for ROU)
- a211b\_ (corrected error for POL & GEO)
- ankids (corrected error for POL & GEO)
- a1008mnth (corrected error for NGR & BEL)
- a108 (now available for SWE)
- a109\_1 (now available for SWE)
- a109\_2 (now available for SWE)
- a149 (now available for SWE)
- a309 (now available for SWE)
- aregion (now available for SWE)
- a620\_ (corrected error for DEU & CZE)
- a402 (corrected error for POL)
- a149 (corrected error routing error in NOR)
- a344 (corrected error routing error in NOR)
- a256\_ (corrected error for POL & GEO)

#### IMPROVEMENTS INTRODUCED WITH V.4.2. (February 2014):

The update from v4.1 to v4.2 does not include corrections of existing variables.

The update only includes additional variables which are derived from the pre-existing datasets

- Variables derived from grid variables and variables which concern the respondents and his/her partner: numdissol numdivorce nummarriage numpartners livingwithpartner childprevp femage maleage femeduc maleeduc fertintent numbiol numres numnonres numstep numallchild ageyoungest ageoldest numrespleave numotherparentleave coreschild coresparen coresgrandp coressibl.
- Variables derived from month and year variable:  
a808Dur a822Dur a907Dur a911Dur a914Dur; a303cAgeP a315AgeP a316cAgeP a374cAgeP a608AgeP a610AgeP a617bAgeP a621AgeP a914AgeP a941AgeP; a107AgeR a121AgeR a150AgeR a239aAgeR a239bAgeR a240AgeR a301AgeR a302bAgeR; a311AgeR a314bAgeR a314dAgeR a371AgeR a372bAgeR a603AgeR a608AgeR a610AgeR a613AgeR a614AgeR a619AgeR a621AgeR a816AgeR a822AgeR a871AgeR a5116AgeR a5117bAgeR; a302bTdiff a314bTdiff a314dTdiff a372bTdiff.
- Variables derived from hours and minutes variables: a324\_hour a520\_hour a540\_hour.
- Variables derived from frequency and unit variables:  
a205mnth,a241mnth,a325mnth,a355mnth,a359mnth,a363mnth,a367mnth,a521mnth,a541mnth,a1008mnth,a1102mnth;  
a203c\_?w a204c\_?w.
- Occupation variables recoded into ISCO-88 1 digit: a828\_1dig a832\_1dig a861\_1dig a917\_1dig a921\_1dig a933\_1dig a5112\_1dig a5114\_1dig.

#### IMPROVEMENTS INTRODUCED WITH V.4.1. (April 2012):

- Variables corrected: amarstat, ankids, aweight, a540t, a925\*

- Value labels defined: a5108\_2

#### IMPROVEMENTS INTRODUCED WITH V.4.0 (March 2012):

- New constructed variables: asex, aage, abyear, aeduc, aactstat, aparstat, amarstat, anpartner, ankids, ahhsz, ahhtype
- New consolidated variables on respondents' current activity: a870, a871m, a871y, a873, a874, a875
- New consolidated variables on respondents' partners current activity: a940, a941m, a941y, a943, a945
- Variables previously unavailable, now available: aweight
- Variables corrected: a602 (with consequences on subsequent variables), a611, a612, a623, a624, a625, a627\*, a628\*, a629\*, a631, a383 (age of current partner now rounded)
- Changes in the variable/value labels: a203b\_\* (country specific values "public nursery" and "private nursery" recoded into GGS values "nursery"; country specific value "person caring for children after school" recoded into GGS value "babysitter").

#### IMPROVEMENTS INTRODUCED WITH V.3.0 (August 2010):

- New consolidated variables: a370, a379, a383, a384
- Changes in the variable/value labels: a309, a322, a380 (missing labels have been added); a828, a832, a861, a917, a921, a5112, a5114, a828, a832 (all labels are now ISCO codes)
- Variables renamed: a203c\_1u...`i'u and a204c\_1u...`i'u renamed into respectively a204c\_1u...`i'u and a204cu\_1...`i'
- Variables corrected: a808m y (date of reaching educational degree (a150m y) implemented for those who have never worked), a822m y (date of reaching educational degree (a150m y) implemented for those who always have been a homemaker), a1003 and a1004 (previously was coded as first, second, third...mentioned; in the new version is coded per item as a yes/no question).

FIRST DATASET RELEASED: V.2.6. (March 2010).

### **Processing Checks**

#### **WAVE 1 DATA HARMONISATION**

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

##### 1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

##### 2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("\_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3\_# or bhg3\_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

##### 3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

##### 4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

##### 5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

##### 6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

**Missing Data**

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

# Variables List

Dataset contains 2828 variable(s)

<b>Statistics [NW/ W]</b>	[Valid=8292 /-] [Invalid=0 /-]
<b>Definition</b>	Q 001
<b>Pre-question</b>	Interviewer Instruction: Write in the time and date when the interview starts.
<b>Literal question</b>	Interview started at...on...
<b>Interviewer's instructions</b>	<p>Interviewer Instruction: Read the following text.</p> <p>This survey is a continuation of the Generations and Gender Survey in which you participated three years ago. It is part of an international programme co-ordinated by the UN Economic Commission for Europe. An interesting feature of our research is that it tries to follow the lives of people over a long period of time.</p> <p>The aim of this research is to learn more about the everyday life, circumstances, and opinions of people and families. We want to gather information about the factors that influence the formation of new families, childbearing and preparation for old age. We also want to gather information about the lives of the young, middle-aged and old generations. This survey will show how people's life and family circumstances have changed over time, which will improve understanding of impediments of family life and relations of generations and help to develop policies for the future.</p> <p>Each person's answer is very important to us, because each person who was visited and questioned represents a particular group of our society. Therefore, although they were randomly selected, the participants of this survey proportionally represent all of the inhabitants of this country. That is why it is important to question the same people again this time.</p> <p>We will hold the information you give us in the strictest confidence, and use it only for statistical processing. If possible, it would be better if we could have this interview without others being present.</p>

### # bnumpartnerships: Number of co-resident partners Respondent had since {wave 1} (including current (W2)

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

### # bnumpartnerships: Number of co-resident partners Respondent ever had (including current if one) (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-99] [Missing=*96]
<b>Statistics [NW/ W]</b>	[Valid=8292 /-] [Invalid=0 /-]
<b>Definition</b>	Derived variable
<b>Notes</b>	The total number of partnership dissolutions reported at wave 1 (variable numdissol at wave 1 ) PLUS the partnership dissolutions between the two waves (variable bnumdissol) PLUS the current partnership if one exists (partner is present in the Household grid at wave 2). Note that this variable only refers to resident partners, past and present.

Value	Label	Cases	Percentage
0		2222	26.8%
1		5916	71.3%
2		151	1.8%
3		3	0.0%
96	unknown	0	

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

### # bnchildprevp: Any children from parteships since {wave 1} (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*6]
<b>Statistics [NW/ W]</b>	[Valid=8292 /-] [Invalid=0 /-]
<b>Definition</b>	Derived variable
<b>Notes</b>	"Yes" if Respondent had children from any partner between wave 1 and wave 2 (question 314, "Partnership history" grid); "No" otherwise.

Value	Label	Cases	Percentage
1	Yes	204	2.5%
2	No	8088	97.5%
6	unknown	0	

*Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.*

### # bchildprevp: Any children from previous partnership (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 1-99] [Missing=*6]
<b>Statistics [NW/ W]</b>	[Valid=8292 /-] [Invalid=0 /-]
<b>Definition</b>	Derived variable
<b>Notes</b>	"Yes" if Respondent reported to have had children with any previous co-resident partner at wave 1 (variable childprev) AND/OR at wave 2 (variable bnchildprevp); "No" otherwise.

Value	Label	Cases	Percentage
1	yes	527	6.4%
2	no	7765	93.6%
6	unknown	0

### # bnnumworkstatuses: The number of non-empty slots in the Activity and Education History grid (W2)

Information [Type= discrete] [Format=numeric] [Range= 0-26] [Missing=\* /997/998/999]

## File : GGS\_Wave2\_Georgia\_V.1.3.

### # bnumworkstatuses: The number of non-empty slots in the Activity and Education History grid (W2)

<b>Statistics [NW/ W]</b>	[Valid=8292 /-] [Invalid=0 /-]
<b>Definition</b>	Derived variable from Q 801 (variables bn871_*).
<b>Pre-question</b>	Now, we are going to talk about your work and studies since your 16th birthday. We are only interested in activities that lasted at least 3 months. Please choose from the activities on the card. If more than one activity applies to a certain period of time, for example, you were working and studying at the same time, please choose the activity in which you spent most time! Card 104
<b>Literal question</b>	Which of the items on the card best describes what have you mainly been doing since age 16?
<b>Notes</b>	The number of non-empty slots in the Activity and Education History grid (Q 801, variable bn871_*).

Value	Label	Cases	Percentage
1		182	2.2%
2		1341	16.2%

**# bnduremplstatus: Total duration (in month) of Rs working statuses as employed since age 16 (W2)**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-780] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=6274 /-] [Invalid=2018 /-] [Mean=221.279 /-] [StdDev=163.937 /-]
<b>Definition</b>	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
<b>Literal question</b>	When did this period of [activity] start? When did this period of [activity] end?
<b>Notes</b>	Total duration (in month) of Rs working statuses as employed since age 16 (code 2 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

# **bn dursselfemplstatures: Total duration (in month) of Rs working statuses as self employed since age 16 (W2)**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-744] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=1816 /-] [Invalid=6476 /-] [Mean=144.916 /-] [StdDev=99.975 /-]
<b>Definition</b>	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
<b>Literal question</b>	When did this period of [activity] start? When did this period of [activity] end?
<b>Notes</b>	Total duration (in month) of Rs working statuses as self employed since age 16 (code 3 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

**# bndurretiredstatuses: Total duration (in month) of Rs working statuses as retired since age 16 (W2)**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-660] [Missing=*/997/998/999]
--------------------	--

# bndurretiredstatuses: Total duration (in month) of Rs working statuses as retired since age 16 (W2)	
Statistics [NW/ W]	[Valid=1696 /-] [Invalid=6596 /-] [Mean=135.34 /-] [StdDev=92.366 /-]
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
Literal question	When did this period of [activity] start? When did this period of [activity] end?
Notes	Total duration (in month) of Rs working statuses as retired since age 16 (code 6 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

<b># bndurmilitarystatuses: Total duration (in month) of Rs working statuses as in military or social servic (W2)</b>			
<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-487] [Missing=*/997/998/999]		
<b>Statistics [NW/ W]</b>	[Valid=1986 /-] [Invalid=6306 /-] [Mean=26.322 /-] [StdDev=14.622 /-]		
<b>Definition</b>	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
<b>Literal question</b>	When did this period of [activity] start? When did this period of [activity] end?		

# bndurmilitarystatuses: Total duration (in month) of Rs working statuses as in military or social servic (W2)

**Notes** Total duration (in month) of Rs working statuses as in military or social service since age 16 (code 7 on Q 801, variable bn871\_\*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years\*12) values have been put as equal to this difference.

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-588] [Missing=* /997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=8292 /-] [Invalid=0 /-] [Mean=0 /-] [StdDev=0 /-]
<b>Definition</b>	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
<b>Literal question</b>	When did this period of [activity] start? When did this period of [activity] end?
<b>Notes</b>	Total duration (in month) of Rs working statuses as in parental leave, care leave since age 16 (code 10 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-265] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=8292 /-] [Invalid=0 /-]
<b>Definition</b>	Derived variable from Q 805, Q 808 and Q 809 (variables bn875_*, bn878m_*, bn878y_*, bn879m_*, bn879y_*).
<b>Universe</b>	If code 3 on Q 805
<b>Literal question</b>	When did the last period of part time work start? When did the last period of part time work end?
<b>Notes</b>	Duration (in month) of Rs last part-time (code 3 on Q 805, variable bn875_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

# b150AgeR: R's age of achieving the current education level (W2)

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=5049 /-] [Invalid=3243 /-]
<b>Definition</b>	Derived variable from Q 114.
<b>Literal question</b>	In what month and year did you reach that level?
<b>Notes</b>	R's time of birth was deducted from HH grid. If information on the month of birth / month of achieving the current education level was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

**# bn152AgeR: R's age when starting first paid work or business (W2)**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=6739 /-] [Invalid=1553 /-]
<b>Definition</b>	Derived variables from Q 116.
<b>Universe</b>	If code 1 on Q 115.
<b>Literal question</b>	When did you start working at this first paid job or business?
<b>Notes</b>	R's time of birth was deducted from HH grid. If information on the month of birth / month of starting work or a business was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

**# b372bAgeR: R's age of marrying current spouse (W2)**

<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=4493 /-] [Invalid=3799 /-]
<b>Definition</b>	Derived variables from consolidated variables b372bm and b372by (variables obtained from Q 304 and 311: variables bn304m, b335bm_*, bn304y, b335by_*; if partner is the same then W1 the data is merged from W1, variables a302by and a302bm). It only refers to co-resident partner.
<b>Universe</b>	If R has a co-resident partner.
<b>Literal question</b>	In what month and year did you marry?
<b>Notes</b>	R's time of birth was deducted from HH grid. If information on the month of birth / month when married current spouse was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

# b374cAgeP: Partner's age of obtaining permanent residence (W2)	
<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=71 /-] [Invalid=8221 /-]
<b>Definition</b>	Derived variable from consolidated variables b374cm and b374cy (variables obtained from Q 322c and 331c: variables b303cm, b316cm, b303cy, b316cy; if partner is the same then W1 the data is merged from W1, variables a303cm and a303cy).
<b>Universe</b>	If R has a partner (co-resident or non-resident)
<b>Literal question</b>	In what month and year did he/she first start living permanently in [COUNTRY]?
<b>Notes</b>	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 330. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

<b># b608AgeP: Partner's age of starting to have support to get pregnant (W2)</b>	
<b>Information</b>	[Type= discrete] [Format=numeric] [Range= 17-9999] [Missing=*/997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=16 /-] [Invalid=8276 /-]
<b>Definition</b>	Derived variable from Q 608
<b>Universe</b>	If answer to Q 607 is NOT 0 "nothing"
<b>Literal question</b>	In what month and year did you first start doing something to help you (your partner/spouse) get pregnant this time?
<b>Notes</b>	Partner's time of birth was deducted from HH grid (co-resident partner) or Q 330 (non resident partner). If information on the month of birth / month when started to have support to get pregnant was missing, a 6 (june) was used in the calculation.

**# b608AgeP: Partner's age of starting to have support to get pregnant (W2)**

Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

<b>Pre-question</b>	Now, we are going to talk about your work and studies since your 16th birthday. We are only interested in activities that lasted at least 3 months. Please choose from the activities on the card. If more than one activity applies to a certain period of time, for example, you were working and studying at the same time, please choose the activity in which you spent most time!
