<b>Information</b>	[Type= discrete] [Format=numeric] [Range= -40-52] [Missing=*997/998/999]
<b>Statistics [NW/ W]</b>	[Valid=5223 /-] [Invalid=4777 /-] [Mean=0.816 /-] [StdDev=2.343 /-]
<b>Definition</b>	Derived variable from Q 302.b core questionnaire
<b>Universe</b>	If code 1 on question 302.a
<b>Literal question</b>	In what month and year did you marry?
<b>Notes</b>	The time of starting to live together was deducted from the answer to Q 301. If information on the month at start living together / month of marriage was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". If respondents got married before living together then the observation is excluded.

<b>Literal question</b>	In what month and year did he/she first start living permanently in [COUNTRY]?
<b>Notes</b>	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 311. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"
