Generations and Gender Survey Lithuania Wave 1 & Wave 2 (GGS Lithuania Wave 1 & Wave 2)

Kartu ir lyciu tyrimas

Overview	
Identification	GGS.W1.W2.25
Abstract	
<p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion".</p> <p>The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> - Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets. - A broad age range. It includes respondents between the ages of 18 and 80. - A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals. - A large sample size. It has an average of 9,000 respondents per country at Wave 1. - A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior. - Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts. 	
Kind of Data	Survey data
Unit of Analysis	Individuals

Scope & Coverage	
Keywords	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender relations, Intergenerational exchanges, Informal and formal care, Well-being and health, Grandparenthood, Economic activity, Retirement
Time Period(s)	2006-2009
Countries	Lithuania
Geographic Coverage	
Whole territory of the Republic of Lithuania.	
Universe	
WAVE 1	
Target population: permanent residents of Lithuania aged 18-79 years.	
WAVE 2	
Persons who took part at Wave 1 and agreed to be re-contacted for Wave 2 (5810 persons, i.e., 58% of the 10,036 persons interviewed at Wave 1).	
- SAMPLE REFRESHMENT: In addition to these persons, 12882 individuals were also contacted before Wave 2. These persons were NOT interviewed at Wave 1 and are NOT included in the harmonised Wave 2 file.

Sampling

Sampling Procedure

WAVE 1 SAMPLING PROCEDURE

1. Sampling frame

- 1.1 Type of frame: List of geographic units and population as of 1 January 2006, Statistics Lithuania.
- 1.2 Frame coverage: Individuals residing in Lithuania aged 18-79 years, excluding institutionalised persons (prisons, army, hospitals, etc.).
- 1.3 Frame size: 2,557,085 individuals
- 1.4 Level of units available: Settlements and districts within urban areas.

2. Sampling method

- 2.1 Sampling method type: Multistage random sample design had been used for the study. The first stage of the sampling procedure consists in defining administrative regions of Lithuania: 10 such regions are defined. In order to identify cluster of sampling, sampling points are selected according to the size of the settlements that are grouped into big, medium, small towns and villages. The number of the sampling points in each category depends on the percentage of population living in the settlements of this category.
- 2.2 Sampling stage definition
 - PSU: Administrative regions (counties).
 - SSU: Settlements.
 - TSU: Individuals aged 18-79.
- 2.3 Sampling stage size
 - PSU: 10.
 - SSU: 318.
 - TSU: 10,036.
- 2.4 Unit selection: Systematic random.
- 2.5 Final stage unit selection: SRS (Simple Random Sampling).
- 2.6 Within Household unit selection: Last birthday method.
- 2.7 Stratification: Implicit.
- 2.8 Sample size
 - Starting size sample: 912 PSU's (912 x 11 = 10,032)
 - Aimed total size at Wave 1: 10,036.
 - Aimed total size at Wave 3: None.
- 2.9 Estimated Non-response
 - Initial non-response: Not estimated.
 - Yearly attrition: Not estimated.
 - Non response measures: Not applicable for random route methodology.
 - Within household non-responses measures: Three call-backs were used in order to contact the household or eligible respondent. If after three call-backs there was no contact, no other measures were used and hence, the household was marked as non-response.

WAVE 2 SAMPLING PROCEDURE

Sampling: panel (wave 1 database of addresses). All the Wave 1 persons who had agreed to be recontacted for a second interview (i.e., 5810 respondents which is equal to 58 of Wave 1 respondents).

SAMPLE REFRESHMENT: In addition to these persons, 12882 individuals were also contacted before Wave 2. These persons were NOT interviewed at Wave 1 and they represent a new sample. This allowed to carry out 5748 additional completed interviews. These interviews are NOT included in the released harmonised Wave 2 file.

ESTIMATED NON-RESPONSE

- Initial non-response: 5810 respondents of the 1st wave agreed to be interviewed during the 2nd wave of GGS in 2009. After the 1st wave while collecting updated contact information about respondents we received following information:

272 respondents died/ were ill / not able to communicate;

449 respondents moved to other country;

691 respondents moved to other location, contact information not available;

443 respondents - no contact with them, no information about them available.

- Yearly attrition: None, the yearly attrition was not estimated

- Non response measures: Sending post cards after the fieldwork, Sending letters and address cards for checking the contact information in 2007 and 2008.

If no response received via ordinary mail, respondents were contacted via phone from address' data base. If telephone number was not available, interviewers visited addresses from data base and collected updated information. Respondents having e-mail addresses were sent e-mail letters with request for updated contact information.

- Within household non-responses measures: In wave 2, no specified number of visits in order to contact necessary person and conduct the interview. In ad hoc survey - three call-backs were used in order to contact the household or eligible respondent. If, after three call-backs there was no contact, no other measures were used - the household was marked as non-response

Response Rate

WAVE 1

Response rate - Final disposition codes:

I = complete interview: I = 10,036

P = partial interview: P = 0

NE = non-eligible : NE = 1,687

NC = non-contact : NC = 7,634

R = refusal: R = 7,685

O = other non-response: O = 2,842

UC = unknown eligibility, contacted: UC = DK

UC = unknown eligibility, non-contact: UC = DK

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: eC = DK

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: eN = DK

WAVE 2

Response rate - Final disposition codes:

I = Complete interview: I= Wave 2 - 2294 (total number of addresses used - 3176); In ad-hoc survey - 5748

P = Partial interview: P=0

NE = non-eligible: NE= Wave 2 - 0; In ad-hoc survey - 539"

NC = non-contact: NC= Wave 2 - 293 (total number of addresses used - 3176); In ad-hoc survey - 2427

R = refusal: R= Wave 2 - 376 (total number of addresses used - 3176); In ad-hoc survey - 2695

O = Other non-response: O= Wave 2 - 213 (total number of addresses used - 3176); In ad-hoc survey - 1147

UC = unknown eligibility, contacted: UC= dk

UC = unknown eligibility, non-contact: UC= dk

eC = estimated proportion of contacted cases of unknown eligibility that are eligible: eC= dk

eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: eN= dk

Weighting

WAVE 1

A weighting procedure was used in order to adjust the sample. Weight coefficient composes information about sex, age and type of settlement (rural-urban).

WAVE 2

Wave 2 - no.

Ad hoc survey - yes. A weighting procedure was used in order to adjust the sample. Weight coefficient composes information about sex, age and type of settlement (rural-urban).

Data Collection

Data Collection Dates	Wave 1: start 2006-04-01 Wave 1: end 2006-12-30 Wave 2: start 2009-06 Wave 2: end 2009-12
Data Collection Mode	Method: Face-to-Face (personal interview). Technique: Paper and Pencil.

Data Collection Notes

WAVE 1 DATA COLLECTION

1. Interviewers

1.1 Total number of interviewers: 191.

1.2 Number of interviewers in the field: Each interviewer had to conduct particular number of interviews during specific period. Some of them could finish the work earlier than others.

1.3 Network organization: Field coordinators: field manager in central office; three regional supervisors in central office; four regional supervisors in regions.

1.4 Working arrangement of interviewers: Contracted - other.

1.5 Payment of interviewers: Per interview.

2. Interviewer training

2.1 General interviewing: Interviewers are trained before each survey. They always are instructed on general interviewing techniques. Gallup has developed interviewers' manual including instructions how to behave in possible complicated situations, how to speak with potential respondent, how to persuade him/her to take part in the survey, how to ask questions, etc.

2.2 Survey specific: All interviewers were instructed before GGS survey. First step of training was performed with regional supervisors. They were informed about the purpose of the survey and about the necessity strictly to follow requirements. Regional supervisors were asked to read through whole questionnaire, noticing and commenting all the difficulties, and to ask questions if there were any unclear things. Regional supervisors were given prepared instruction for interviewers and they used it while reading the questionnaire. After that they had to make one interview each themselves and commented difficulties experienced. All their comments and difficult situations were discussed with project manager and field supervisor. Second step of training was performed by regional supervisors with interviewers in separate regions. The procedure was the same - they were informed about the purpose of the survey and about the necessity strictly to follow the requirements. Interviewers were asked to read through whole questionnaire, noticing and commenting all the difficulties, and to ask questions if there were any unclear things. Interviewers were given prepared instruction for interviewers and they used it while reading the questionnaire. After that they had to make interview themselves and to comment difficulties experienced. All their comments and difficult situations were discussed with regional supervisor. Interviewers were trained in persuading the respondents to participate in next wave of the survey also. After training each interviewer was given one questionnaire and was asked to interview one person. These questionnaires were brought to regional supervisors and checked. If everything was done well, questionnaires were filled correctly, interviewers were allowed to conduct GGS survey interviews. If questionnaires were filled not correctly, interviewer either had to repeat training course, or he/she was not allowed to do interviews in this survey.

2.3 Length: Trainings - 8 full working days. Training contained both general interviewing questions and survey specific issues. Approximately one third of time was devoted to general interviewing and two thirds of time to survey specific issues.

2.4 Control of performance: After the completed questionnaires were brought to the supervisor they are ranged according to number of interview on random route administration sheet. Demographic characteristics of the respondent in the questionnaire were compared with demographic characteristics in random route administration sheet.

Next step - to check if interviewers chose necessary person for interview according to the birthday rule.

On the third step of quality control - all questionnaires were checked by supervisors: accuracy of data recording and following skip rules was checked. If there were some inaccurate or not clear parts, interviewers had to re-contact respondent and clarify obscurities.

Randomly selected 10% of respondents of each interviewer were re-contacted in order to check if interview was really conducted and if interviewer presented respondent correct information about the survey. Respondents most often were re-contacted by phone. Regional supervisors followed description of random route by randomly selected interviewers and visited respondents at their home for interviewers work control. All respondents were asked about the willingness to take part in the next waves of GGS and if agreed, their names and addresses were recorded. After the fieldwork finished, they were re-contacted by mail, phone or in-person and their data checked on a regular base.

2.5 Interviewer survey: No.

3. Contact protocols

3.1 Advance letter: No.

3.2 Cold contacts: Face-to-face.

3.3 Scheduling / scattering: Yes. Contact attempts were scattered over different days of the week (week-days and week-ends) and different time of the day.

3.4 Contact history: Yes, in a regular contact sheet.

3.5 Min number of contacts: Number of interviews that should be conducted in PSU was prescribed (10-12 interviews per PSU, 3 call-backs per potential respondent).

2.6 Max number of contacts: Number of interviews that should be conducted in PSU was prescribed, not number of contacts.

4. Questionnaire localization

4.1 Validation: Yes, back-translation.

4.2 Pre-test: A pilot was carried out in March 2006 (150 respondents; 75 men + 75 women; 95 aged 18-49 + 55 aged 50-79; number of interviewers : 104; number of settlements: 67 ; mean length of the interview: 139 minutes, min 54 minutes, max 280 minutes, mode - 95 minutes, 25th percentile 105 minutes, median 130 minutes, 75th percentile 172 minutes). Major findings of the pilot: questionnaire is too long and too complicated. Two unacceptable themes: (1) possessions in household and inheritance, (2) partners and fertility (for older people). The majority of questionnaire adaptation was done in the Section 10 of the GGS Wave 1 Core questionnaire, namely some more general questions on the eagerness of respondent to answer the questions on possessions were added, while some questions were dropped (i.e. 1010-1018).

4.3 Length of interview: In the majority of cases respondents were co-operative. The average duration of interview was about 80 minutes depending on person interviewed - young or old, single or living with family, having several children or none, etc. In approximately one fifth of interviews other persons participated - children (most often small), parents or partner.

WAVE 2 DATA COLLECTION

1. Interviewers

1.1 Total number of interviewers: 179

1.2 Number of interviewers in the field: 118 for wave 2 and 151 in ad-hoc of new respondents.

1.3 Network organization: Field coordinators: field manager in central office, three regional supervisors in central office, four regional supervisors in regions.

1.4 Working arrangement of interviewers: Contracted - other

1.5 Payment of interviewers: Per interview

2. Interviewer training

2.1 General interviewing: Interviewers are trained before each survey. They always are instructed on general interviewing techniques. Gallup has developed interviewers' manual including instructions how behave in possible complicated situations, how to speak with potential respondent, how to persuade him to take part in the survey, how to ask questions, etc. Before the 2nd wave interviewers were instructed how to behave in situation if the person who agreed to participate in longitude refuses in the last moment.

2.2 Survey specific: same as for Wave 1

2.3 Length: same as for Wave 1

2.4 Control of performance: In wave 2, demographics of each completed interview was checked with demographics from personal card of the participant of the 1st wave.

Ad-hoc survey of new respondents : After the completed questionnaires were brought to the supervisor they are ranged according to number of interview on random route administration sheet. Demographic characteristics of the respondent in the questionnaire were compared with demographic characteristics in random route administration sheet. Next step – to check if interviewers chose necessary person for interview according to the birthday rule.

In wave 2 and in ad hoc survey all questionnaires were checked by supervisors - accuracy of data recording and following skip rules was checked. If there were some inaccurate or not clear parts, interviewers had to re-contact the respondent and clarify obscurities.

Randomly selected 10% of respondents of each interviewer were re-contacted in order to check if interview was really conducted and if interviewer presented respondent correct information about the survey. Respondents most often were re-contacted by phone. Regional supervisors followed description of random route by randomly selected interviewers and visited respondents at their home for interviewers work control. All respondents were asked about the willingness to take part in the next waves of GGS and if agreed, their names and addresses were recorded.

2.5 Interviewer survey: None

3. Contact protocols

3.1 Advance letter: Respondents who agreed to participate in wave 2 were contacted several times during the period between 1st and 2nd waves - after first wave post card was sent with thank for participation. After that - 2 letters reminding about the second wave and with request to update contact information via ordinary mail. If no response received via ordinary mail respondents were contacted via phone or via e-mail or face-to-face.

In af hoc survey of new respondents - letter informing introducing GGS survey, the subject and the aim of the survey, the agency conducting interviews in Lithuania, the use of data in the future, etc. and asking potential respondents to take part in it.

3.2 Cold contacts: Face-to-face

3.3 Scheduling / scattering: Yes. Contact attempts were scattered over different days of the week (week-days and week-ends) and different time of the day.

3.4 Contact history: In ad hoc survey - in a regular contact sheet

3.5 Min number of contacts: In wave 2 - no minimum number of contacts.

In ad hoc survey - number of nterviews that should be conducted in PSU was prescribed (10-12 interviews per PSU, 3 call-backs per potential respondent)

2.6 Max number of contacts: In wave 2 - no maximum number of contacts.

In ad hoc survey - number of interviews that should be conducted in PSU was prescribed, not number of contacts

4. Questionnaire localization

4.1 Validation: back-translation

4.2 Pre-test: DK

4.3 Length of interview: DK

Questionnaires

Structured questionnaire in Lithuanian and in Russian.

Data Collector(s)

Institute for Demographic Research, Lithuanian Social Research Centre (IDR LSRC)
Baltic Surveys Ltd. (Gullop)

Supervision

WAVE 1 & WAVE 2 ACTIONS

1. Dealing with nonresponse:

1.1 Screening: No.

1.2 Refusal conversion: Gallup (Baltic Surveys Ltd. is member of Gallup Inc.) has developed an Interviewers' Manual where possible complicated situations are described, most often asked questions by respondents and possible answers to them are listed. During interviewers' training this issue is usually widely discussed.

1.3 Incentives: No.

2. Tracking of sampled units

2.1 Respondent contact information: Yes, contact details of the respondent were collected.

2.2 Other contact information: Yes, contact details of a proxy (such as parents, friend) were collected.

2.3 Cards: A "thank-you-letter" and a "change-of-address-notification" card (with paid postage fee, included in all the mailings as a standard part of the letter) were sent to all the respondents in 2007 and in 2008. If there were e-mail addresses given, "change-of-address-notification" messages were sent to these addresses also. If there was no postal information, respondents were called by phone or visited.

2.4 Additional surveys: No.

2.5 Administrative records: No.

Data Processing & Appraisal

Data Editing

WAVE 1 & WAVE 2 OPERATIONS

Consistency of all questionnaires was checked by supervisors first. In data entry process skip rules were used in order to avoid mistakes. When data was entered, data file was cleaned by detecting errors and correcting them.

Files Description

Dataset contains 2 file(s)

GGG_Wave2_Lithuania_V1.3.	
# Cases	2292
# Variable(s)	1184
File Structure	Type: relational Key(s): arid (R identification number (W2))
<p><u>File Content</u> GGG Wave 2</p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p>	
<p><u>Version</u> Harmonized dataset, GGS Wave2, version 1.3.</p> <p>IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.3 (August 2016) Correction of the following variables that were previously erroneous: b343_*, bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage.</p> <p>IMPROVEMENTS INTRODUCED WITH GGS_Wave2_V.1.2 (April 2015) The update from v1.1 to v1.2 does not include corrections of existing variables. The update only includes additional variables which are derived from the pre-existing datasets.</p> <p>- Variables derived from grid variables and variables which concern the respondents and his/her partner: bnumdissol, bnumdissol, bnumdivorce, bnumdivorce, bnummarriage, bnummarriage, bnumpartnerships, bnumpartnerships, bnrespartafterw1, blivingwithpartner, bchildprevp, bnchildprevp, bfemage, bmaleage, bfemeduc, , bmaleeduc, bfertint, bnumbiol, bnumnonres, bnumres, bnumstep, bnumallchild, bageoldest, bageyoungest, bcoreschild, bcoresgrandp, bcoresparen, bcoressibl, bhhtype.</p> <p>- Variables derived from month and year variable: b121AgeR, b150AgeR, bn152AgeR, b239aAgeR, b239bAgeR, b240AgeR, bn304AgeP, bn303cAgeP, b311AgeR, b315AgeP, b316cAgeP, b371AgeR, b372bAgeR, b372bTdiff, b374cAgeP,</p>	

b5116AgeR, b5117bAgeR, b603AgeR, b608AgeP, b608AgeR, b610AgeP, b610AgeR, b621AgeP, b621AgeR, b871AgeR, b907Dur, b911Dur, b914AgeP, b914Dur, b941AgeP.

- Variables derived from hours and minutes variables: b324hour, b520hour, b540hour, b221hour_x.
- Variables derived from frequency and unit variables: b203c_xw, b204c_xw, b205mnth, b241mnth, b325mnth, b521mnth, b1008mnth.
- Occupation variables recoded into ISCO-88 1 digit: b828_1dig, b832_1dig, b861_1dig, b917_1dig, b921_1dig, b933_1dig.
- Three groups of variables derived from section no. 8 "Activity and Education History": 1) variables counting the total number of different activity and education situations Rs has had since age 16 (i.e., bnumworkstatuses, bnumstudentstatuses, bnumemplstatuses, bnumselfemplstatuses, bnumhelpfamstatuses, bnumunemplstatuses, bnumretiredstatuses, bnummilitarystatuses, bnumhomestatuses, bnummatleavestatuses, bnumparleavestatuses, bnumdisabilitystatuses, bnumotherstatuses, bnum1401, bnum1501, bnum1801, bnum1301, bnumparttime, bnumfulltime, bnumboth, bnumparttime_1801, bnumparttime_1802, bnumpartfulltime_1803, bnumfulltime_1804, 2) the total duration in month of each of the different situation (i.e., bndurstudentstatuses, bnduremplstatuses, bndurselfemplstatuses, bndurhelpfamstatuses, bndurunemplstatuses, bndurretiredstatuses, bndurmilitarystatuses, bndurhomestatuses, bndurmatleavestatuses, bndurparleavestatuses, bndurilldisabledstatuses, bndurotherstatusstatuses, bndur1501, bndur1401, bndur1301, bndurparttime, bndurlastparttime, bndurstudwhilework), 3) the age of R at the beginning and end of part-time employments (i.e., bn876_xAgeR, bn877_xAgeR, bn878xAgeR, bn879_xAgeR).

The availability of these variables in each different country-specific file depends on the availability of variables used for their calculation.

IMPROVEMENTS INTRODUCED WITH V.1.2. in Nesstar GGS micro data files (April 2015):

Publication of variables that were previously deleted before dataset release in Nesstar. The following variables are concerned: grid variables, month and year variables, hours and minutes variables, frequency and unit variables, and occupation variables.

FIRST DATASET RELEASED: V.1.1. (April 2014).

Processing Checks

WAVE 2 DATA HARMONISATION: see "Extent of Processing Checks" "WAVE 1 DATA HARMONISATION".

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

Notes

WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets

Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

# Cases	10036									
# Variable(s)	1399									
File Structure	Type: relational Key(s): arid (R identification number)									
<p><u>File Content</u> GGG Wave 1</p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a19_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p>

IMPROVEMENTS INTRODUCED WITH V.4.2. (February 2014):

The update from v4.1 to v4.2 does not include corrections of existing variables.

The update only includes additional variables which are derived from the pre-existing datasets

- Variables derived from grid variables and variables which concern the respondents and his/her partner: numdissol numdivorce nummarriage numpartners livingwithpartner childprevp femage maleage femeduc maleeduc fertintent numbiol numres numnonres numstep numallchild ageyoungest ageoldest numrespleave numotherparentleave coreschild coresparen coresgrandp coressibl.

- Variables derived from month and year variable:

a808Dur a822Dur a907Dur a911Dur a914Dur; a303cAgeP a315AgeP a316cAgeP a374cAgeP a608AgeP a610AgeP a617bAgeP a621AgeP a914AgeP a941AgeP; a107AgeR a121AgeR a150AgeR a239aAgeR a239bAgeR a240AgeR a301AgeR a302bAgeR; a311AgeR a314bAgeR a314dAgeR a371AgeR a372bAgeR a603AgeR a608AgeR a610AgeR a613AgeR a614AgeR a619AgeR a621AgeR a816AgeR a822AgeR a871AgeR a5116AgeR a5117bAgeR; a302bTdiff a314bTdiff a314dTdiff a372bTdiff.

- Variables derived from hours and minutes variables: a324_hour a520_hour a540_hour.

- Variables derived from frequency and unit variables:

a205mnth,a241mnth,a325mnth,a355mnth,a359mnth,a363mnth,a367mnth,a521mnth,a541mnth,a1008mnth,a1102mnth; a203c_?w a204c_?w.

- Occupation variables recoded into ISCO-88 1 digit: a828_1dig a832_1dig a861_1dig a917_1dig a921_1dig a933_1dig a5112_1dig a5114_1dig.

FIRST DATASET RELEASED: V. 4.1 (April 2012).

Processing Checks

WAVE 1 DATA HARMONISATION

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonised with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting.

Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

Variables List

Dataset contains 2583 variable(s)

Definition Q 001

Pre-question Interviewer Instruction: Write in the time and date when the interview starts.

Literal question Interview started at...on...

Interviewer's instructions Interviewer Instruction: Read the following text.

This survey is a continuation of the Generations and Gender Survey in which you participated three years ago. It is part of an international programme co-ordinated by the UN Economic Commission for Europe. An interesting feature of our research is that it tries to follow the lives of people over a long period of time.

The aim of this research is to learn more about the everyday life, circumstances, and opinions of people and families. We want to gather information about the factors that influence the formation of new families, childbearing and preparation for old age. We also want to gather information about the lives of the young, middle-aged and old generations. This survey will show how people's life and family circumstances have changed over time, which will improve understanding of impediments of family life and relations of generations and help to develop policies for the future.

Each person's answer is very important to us, because each person who was visited and questioned represents a particular group of our society. Therefore, although they were randomly selected, the participants of this survey proportionally represent all of the inhabitants of this country. That is why it is important to question the same people again this time.

We will hold the information you give us in the strictest confidence, and use it only for statistical processing. If possible, it would be better if we could have this interview without others being present.

bhhtype: Household type Respondent (W2)

Information	[Type= discrete] [Format=numeric] [Range= 1-96] [Missing=*/96]
Statistics [NW/ W]	[Valid=2292 /-] [Invalid=0 /-]
Definition	Consolidated variable.
Notes	Generated from household grid (variables bhg3_*). Respondents' households were classified into groups according to the criteria explicated below.

1 "living alone":
If the HH grid contains only R (hhsz=1).

2 "single parent":
If HH grid contains R, at least one child (codes 2-6), and no parent.

3 "living with parents":
If HH grid contains R, at least one parent (codes 7, 8), and no child.

4 "single parent living with parents":
If HH grid contains R, at least one child and one parent, but no partner.

5 "couple with no children":
If HH grid contains R, his/her partner (code 1); no child, nor parent.

6 "couple with children":
If HH grid contains R, his/her partner, at least one child, and no parent.

7 "couple with parents":
If HH grid contains R, his/her partner, at least one parent, and no child.

8 "couple with parents and children":
If HH grid contains R, his/her partner, at least one parent and one child.

9 "other types"
HH types different from 1-8, that may include codes 9-17 on bhg3_* (e.g., Rs living with no relatives).

Value	Label	Cases	Percentage
1	living alone	490	21.4%
2	single parent	190	8.3%
3	living with parents	148	6.5%
4	single parent living with parents	28	1.2%
5	couple with no children	565	24.7%
6	couple with children	782	34.1%
7	couple with parents	20	0.9%
8	couple with parents and children	47	2.1%

# bndurstudentstatuses: Total duration (in month) of Rs working statuses as student, in school, in vocat (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-768] [Missing=*997/998/999]		
Statistics [NW/ W]	[Valid=1999 /-] [Invalid=293 /-] [Mean=50.545 /-] [StdDev=30.406 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		

bndurstudentstatuses: Total duration (in month) of Rs working statuses as student, in school, in vocat (W2)

Literal question	When did this period of [activity] start? When did this period of [activity] end?
Notes	Total duration (in month) of Rs working statuses as student, in school, in vocational training since age 16 (code 1 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

bndurselfemplstatuses: Total duration (in month) of Rs working statuses as self employed since age 16 (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-744] [Missing=* /997/998/999]
Statistics [NW/ W]	[Valid=121 /-] [Invalid=2171 /-] [Mean=127.19 /-] [StdDev=89.583 /-]
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
Literal question	When did this period of [activity] start? When did this period of [activity] end?

bndurselfemplstatuses: Total duration (in month) of Rs working statuses as self employed since age 16 (W2)

Notes Total duration (in month) of Rs working statuses as self employed since age 16 (code 3 on Q 801, variable bn871_*) . If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

bndurhelpfamstatuses: Total duration (in month) of Rs working statuses as helping family member in a f (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-677] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=129 /-] [Invalid=2163 /-] [Mean=56.86 /-] [StdDev=72.199 /-]
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).
Literal question	When did this period of [activity] start? When did this period of [activity] end?
Notes	Total duration (in month) of Rs working statuses as helping family member in a family business or farm since age 16 (code 4 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

# bndurretiredstatuses: Total duration (in month) of Rs working statuses as retired since age 16 (W2)			
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
# bndurmilitarystatuses: Total duration (in month) of Rs working statuses as in military or social servic (W2)			
Information	[Type= discrete] [Format=numeric] [Range= 0-487] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=491 /-] [Invalid=1801 /-] [Mean=27.436 /-] [StdDev=13.371 /-]		
Definition	Derived variable from Q 801, Q 802 and Q 803 (variables bn871_*, bn872m_*, bn872y_*, bn873m_*, bn873y_*).		
Literal question	When did this period of [activity] start? When did this period of [activity] end?		
Notes	Total duration (in month) of Rs working statuses as in military or social service since age 16 (code 7 on Q 801, variable bn871_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

Information [Type= discrete] [Format=numeric] [Range= 0-265] [Missing=*/997/998/999]

Statistics [NW/ W] [Valid=2292 /-] [Invalid=0 /-]

Definition Derived variable from Q 805, Q 808 and Q 809 (variables bn875_*, bn878m_*, bn878y_*, bn879m_*, bn879y_*).

Universe If code 3 on Q 805

# bndurlastparttime: Duration (in month) of Rs last part-time (W2)			
Literal question	When did the last period of part time work start? When did the last period of part time work end?		
Notes	Duration (in month) of Rs last part-time (code 3 on Q 805, variable bn875_*). If information on the month of starting / month of ending the activity was missing, a 6 (june) was used in the calculation. Values smaller than 0 have been put equal to zero; values smaller than 1 have been rounded to 1/10 of a month; values exceeding 1 have been rounded to the nearest month. If the total duration was exceeding the difference between respondent's age at the interview (in months) and 192 months (i.e., 16 years*12) values have been put as equal to this difference.

b121AgeR: R's age of starting to live in current dwelling (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=167 /-] [Invalid=2125 /-]
Definition	Derived variable from Q 117.
Universe	If R's address has changed between the waves
Literal question	In what month and year did you start living in this [type of accommodation]?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the current dwelling was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

bn152AgeR: R's age when starting first paid work or business (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=2196 /-] [Invalid=96 /-]
Definition	Derived variables from Q 116.
Universe	If code 1 on Q 115.
Literal question	When did you start working at this first paid job or business?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month of starting work or a business was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

b239aAgeR: R's age at birth of oldest grandchild (W2)

Information	[Type= discrete] [Format=numeric] [Range= 21-9999] [Missing=*997/998/999]
Statistics [NW/ W]	[Valid=186 /-] [Invalid=2106 /-]
Definition	Q 234.a.
Universe	If R has 2 or more grandchildren AND if she/ he has had any grandchild since first wave.
Literal question	In what month and year was the oldest of your grandchildren born?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month at birth of oldest grandchild was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=3 /-] [Invalid=2289 /-]
Definition	Q 331.c.
Universe	If code 2 on Q 331.a
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?
Notes	Non Resident Partner's time of birth was deducted from the answer to Q 330. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

b371AgeR: R's age at start of living with current partner (W2)

Definition	Derived variables from consolidated variables b371m and b371y (variables obtained from Q 326: variables b311m, b334m_*, b311y, b334y_*; if partner is the same then W1 the data is merged from W1, variables a301m and a301y).
Universe	If R has a partner (co-resident or non-resident)
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month when started current relationship was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

b374cAgeP: Partner's age of obtaining permanent residence (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=76 /-] [Invalid=2216 /-]
Definition	Derived variable from consolidated variables b374cm and b374cy (variables obtained from Q 322c and 331c: variables b303cm, b316cm, b303cy, b316cy; if partner is the same then W1 the data is merged from W1, variables a303cm and a303cy).
Universe	If R has a partner (co-resident or non-resident)
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?
Notes	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 330. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

Definition	Derived variable from Q 617
Universe	If code 0 on Q 616
Literal question	In what month and year did you last use or do anything to prevent pregnancy?
Notes	Partner's time of birth was deducted from HH grid (co-resident partner) or Q 330 (non resident partner). If information on the month of birth / month at last use of anything to prevent pregnancy was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

b871AgeR: R's age at start of current activity status (W2)

Information	[Type= discrete] [Format=numeric] [Range= 0-9999] [Missing=*/997/998/999]
Statistics [NW/ W]	[Valid=2208 /-] [Invalid=84 /-]
Definition	Derived variable generated from consolidated variables a871m and a871y (obtained from Q 930, variables b833m and b833y)
Literal question	In what month and year did you start this job or business?
Notes	R's time of birth was deducted from HH grid. If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

Pre-question	Now, we are going to talk about your work and studies since your 16th birthday. We are only interested in activities that lasted at least 3 months. Please choose from the activities on the card. If more than one activity applies to a certain period of time, for example, you were working and studying at the same time, please choose the activity in which you spent most time!		
Literal question	Which of the items on the card best describes what you were mainly doing at age 16?

Definition Q 804

Country-specific additional values:
 - BGR: "1101 - secondary education level (all kinds)".
 - DEU: "1401 - still pupil", "1402 - still in training", "1403 - other education", "1404 - still pupil/still in training".

Only country-specific values:
 - FRA: "1501 - 0-iscsd97", "1502 - 1-2-iscsd97", "1503 - 3a- ISCED 97", "1504 - 3b-ISCED 97", "1505 - 3c- ISCED 97",
 "1506 - 5a-6-ISCED 97", "1507 - 5b-ISCED 97".

Universe If code 1 on Q 801 (variable bn871_1 ... bn871_*)

Pre-question Interviewer Check:
 - If R was employed (see 801, code 2-5) go to 805; if R was student (see 801, code 1) continue 804;
 - Other status: go to next spell (801)!

Literal question Which type of diploma or degree did you receive with these studies?

Interviewer's instructions Value from Card 112 [Country-specific list to be compatible with ISCED]

b917: Partner's last occupation (see code ISCO) (W2)

Information	[Type= discrete] [Format=numeric] [Range= 1-9993] [Missing=*9997/9998/9999]
--------------------	---

# b917: Partner's last occupation (see code ISCO) (W2)			
Statistics [NW/ W]	[Valid=469 /-] [Invalid=1823 /-]		
Definition	Q 1017		
Universe	R is partnered, partner is unemployed / student / retired / ill or permanently disabled / homemaker / in military or social service and had a job directly before this current status.		
Pre-question	I would now like to ask a few questions about your partner's/spouse's previous job or business. If he/she was engaged in two or more jobs or businesses, I would like you to tell me only about the one in which he/she spent most of his/her working hours.		
Literal question	What was his/her last occupation? Please describe the principal activity he/she performed.

Definition	Derived variable from consolidated variables b941m and b941y (variables obtained from Q 1003, 1007, 1009, 1011, 1014, variables b903m, b903y, b907m, b907y, b909m, b909y, b911m, b911y, b914m, b914y)
Universe	If R has a partner
Literal question	In what month and year did your partner/spouse start [current activity]?
Notes	Partner's time of birth was deducted from HH grid (co-resident partner) or Q 330 (non resident partner). If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".

b1008u: Time unit of income (W2)

Information	[Type= discrete] [Format=numeric] [Range= 1-1802] [Missing=*/7/8/9]
Statistics [NW/ W]	[Valid=1680 /-] [Invalid=612 /-]
Definition	Q 1108
Literal question	If you add up the income from all sources received during the last 12 months, what is your household's total net income from all members including yourself? Please state the net income, which means after deductions for taxes and social security.
Post-question	Write in. If R gave the answer per month, probe: Does this sum describe the average income of your household over the last 12 months? [If not] Please tell me the average value over the last 12 months.
