For a resident partner the age was copied from the Household grid (ahg5_; for a non resident partner the age was calculated as: year of interview MINUS question 311 (variable a315y). Rs with non-resident partners are coded with "999 - not applicable/no response", when variable a315y is not available in the dataset. Note that this variable does not have a value for same-sex partnerships.

If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".
