| <p><b>Abstract</b></p> <p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion". The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> <li>- Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets.</li> <li>- A broad age range. It includes respondents between the ages of 18 and 80.</li> <li>- A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals.</li> <li>- A large sample size. It has an average of 9,000 respondents per country at Wave 1.</li> <li>- A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior.</li> <li>- Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.</li> </ul> |             |
| <b>Kind of Data</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Survey data |
| <b>Unit of Analysis</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Individuals |

## Sampling

### Sampling Procedure

#### WAVE 1 SAMPLING PROCEDURE

##### 1. Sampling frame

- 1.1 Type of frame: Dwelling lists, developed by constructing a list of all addresses in SSU.
- 1.2 Frame coverage: Almost whole population of Russia (95.5% of the population, Chechnya was excluded).
- 1.3 Frame size: 139 mln people in 1,850 modified areas.
- 1.4 Level of units available: Dwellings.

##### 2. Sampling method

- 2.1 Sampling method type: Multistage probability sample.
- 2.2 Sampling stage definition
  - PSU: Administrative-territorial areas: self-representing areas (Moscow city, Moscow Oblast and St.Petersburg city) and other regions.
  - SSU: If PSU = self-representing areas -> SSU = polling districts; if PSU = other -> SSU = settlements (town or rural areas).
  - TSU: If SSU = polling districts -> TSU = individuals; if SSU = town -> TSU = polling districts and FSU = individuals; if SSU = rural area -> TSU = individuals.
- 2.3 Sampling stage size
  - PSU: 38 PSU, including 3 self-representing areas (=populous cities - Moscow city, Moscow Oblast and St.Petersburg city - with a total of 20,5 mln inhabitants).
  - SSU: 177 SSU.
  - TSU: NA.
- 2.4 Unit selection: All self-representing areas were selected as PSU, in each of the non self-representing areas one PSU was chosen randomly using probability proportional to size.
- 2.5 Final stage unit selection: Simple Random Sampling.
- 2.6 Within Household unit selection: Kish tables.
- 2.7 Stratification: None.
- 2.8 Sample size
  - Starting size sample: 27,089.
  - Aimed total size at Wave 1: 11,000.
  - Aimed total size at Wave 3: None.
- 2.9 Estimated Non-response
  - Initial non-response: 52.5%.
  - Yearly attrition: None.
  - Non response measures: Oversampling (27,089 -> 11,000 target).
  - Within household non-responses measures: None.

#### WAVE 2 SAMPLING PROCEDURE

Metadata are under preparation.

### Response Rate

#### WAVE 1

Response rate - Final disposition codes:

I = complete interview: 11,261

P = partial interview: NA, not included in the database

NE = non-eligible : 1,603

NC = non-contact : NA

R = refusal: 7,445

O = other non-response: 1,920

UC = unknown eligibility, contacted: NA  
 UC = unknown eligibility, non-contact: 4,859  
 eC = estimated proportion of contacted cases of unknown eligibility that are eligible: not applicable  
 eN = estimated proportion of non-contacted cases of unknown eligibility that are eligible: not applicable

## WAVE 2

Metadata are under preparation.

### **Weighting**

#### WAVE 1 WEIGHT VARIABLES

A sex-age weighting variable was constructed.

#### WAVE 2 WEIGHT VARIABLES

Metadata are under preparation.

### **Data Collection Notes**

#### WAVE 1 DATA COLLECTION

##### 1. Interviewers

1.1 Total number of interviewers: 525.

1.2 Number of interviewers in the field: Each interviewer had a fixed number of interviews to carry out. Some of them could finish the work earlier than others.

1.3 Network organization: Field coordinators from the interviewer's network of Demoscope Independent Research Center.

1.4 Working arrangement of interviewers: Contracted - other.

1.5 Payment of interviewers: Paid per interview + compensation for three-day training + compensation of travel costs.

##### 2. Interviewer training

2.1 General interviewing: Yes, the trainees learned about the face-to-face interview principles.

2.2 Survey specific: Yes, study of the questionnaire.

2.3 Length: General training: 1 day; Specific training: 2 days. On the whole 38 workshops.

2.4 Control of performance: Yes, checking the Kish procedure, the filled questionnaires (2-3 from each interviewer), visiting 10% of randomly selected dwellings.

2.5 Interviewer survey: None.

##### 3. Contact protocols

3.1 Advance letter: None.

3.2 Cold contacts: Face-to-face.

3.3 Scheduling / scattering: Yes, contact attempts were scattered over different days of the week and different parts of the day.

3.4 Contact history: Yes, for each contact attempt the interviewer had to report the date, the time and the outcome.

3.5 Min number of contacts: 3.

3.6 Max number of contacts: 18.

##### 4. Questionnaire localization

4.1 Validation: Yes, in 2002 a test of the 1st version of the questionnaire was carried out by interviewing 50 respondents to improve the translation. Russian translation was also checked by Russian-speaking experts from the Max Planck Institute (MPIDR).

4.2 Pre-test: Yes, pilot.

4.3 Length of interview and other information about the data collection situation: Average length of interview: 1h 51min. In 28% of the cases there were other persons (during any part of interview). The overall assessment of the willingness to answer and reliability of information is high. Questions on the potential breaking-up were perceived by most respondents as tactless. Questions on fertility and fecundity were difficult too.

#### WAVE 2 DATA COLLECTION

Metadata are under preparation.

#### Questionnaires

Structured questionnaire in Russian.

#### Supervision

##### WAVE 1 ACTIONS

1. Dealing with nonresponse

1.1 Screening: Up-date of the lists of dwellings

1.2 Refusal conversion: Usual techniques of refusal conversion.

1.3 Incentives: Yes, money: 100 rubles (in Moscow and St-Petersburg 500 rubles).

.

2. Tracking of sampled units

2.1 Respondent contact information: Yes, contact details (address phone number mobile and home; the respondent was not explicitly asked to provide an e-mail address) of the respondent were collected.

2.2 Other contact information: Yes, contact details (phone numbers; the person was not explicitly asked to provide an e-mail address) of a proxy (such as parents, friend) were collected.

2.3 Cards: Only a brochure with results of Wave 1 was sent.

2.4 Additional surveys: Education and Employment Survey (EES) in 2005. EES is based on the panel sample of the 1st wave of Russian GGS but includes people up to 55 years old only (N=6,654 respondents).

2.5 Administrative records: No.

##### WAVE 2 ACTIONS

Metadata are under preparation.

### Data Processing & Appraisal

#### Data Editing

##### WAVE 1 CLEANING OPERATIONS

Yes, consistency checking, wildcode checking.

##### WAVE 2 CLEANING OPERATIONS

Metadata are under preparation.

| <p><b><u>File Content</u></b></p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Activity and Education History, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p> |                                                                 |
| <p><b><u>Version</u></b></p> <p>Harmonized dataset, GGS Wave2, version 1.3.</p> <p>FIRST DATASET RELEASED: V. 1.3. (August 2016).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                 |

| <p><b><u>Notes</u></b></p> <p>Before publication in Nesstar GGS micro data files are further processed so as to ease online data browsing and analysing. We delete variables having all system missings.</p> <p>WAVE 2 DATASETS - Main differences compared to WAVE 1 datasets</p> <p>Wave 2 datasets include an additional new section that had not been implemented in the Wave 1 data collection. It is the section no. 8 "Activity and Education History". Respondents report comprehensively on their activity and education</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                 |

history since age 16. Two additional sections are also present at the end of wave 2 dataset: "Interviewer observations" and "Interviewer report" (respectively sections no. 13 and 14).

A set of constructed variables at the top of the data file increase the usability of the GGS data by summarizing key socio-demographic characteristics of the respondent (age, birth year, sex, level of educational attainment, activity status, partnership status, number of co-resident partners, number of children, household size, household type). An additional set of variables consolidates information on the current activity of the respondent and his/her partner that is otherwise spread over the questionnaire. Another set of consolidated variables concern respondents' parents and parental home.

#### WAVE 2 DATASETS - Variables names

Variables in the Wave 2 data sets that are consistent with variables implemented in the Wave 1 questionnaire are named identically. Wave 2 variable names start with the letter "b" compared to letter "a" in Wave 1. Variables that have not been implemented in Wave 1 but collected in Wave 2 begin with "bn".

In Wave 2 datasets published in Nesstar, the variable "brid - R identification number" has been renamed into "arid" (same variable name than Wave 2). This allows the user to merge Wave 1 and Wave 2 datasets in Nesstar.

In Wave 2 datasets published in Nesstar, variable labels have the indication "(W2)". This allows the user to distinguish Wave 2 variables from Wave 1 variables, on the basis of the variable labels.

#### File Content

VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.

Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.

The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.

Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.

Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.

A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119\_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".

#### Version

Harmonized dataset, GGS Wave1, version 4.4

#### Improvements of GGS\_Wave1\_V.4.4

- The update from v4.3 to v4.4 includes corrections of existing variables.
- Belgium: Information previous partnership is updated. In previous versions, start of cohabitation was in fact start of relationship. This has been corrected.

For more information please read:

Marteau, Benjamin. Correction of Dates of Partnership Formation and Separation in the Consolidated Wave 1 of the Generations and Gender Survey (GGS) Belgium. (2021) 39 pages

- Update a5114\_1dig for all countries but Sweden and Italy

| variable          | V4.3        | V.4.4                                |
|-------------------|-------------|--------------------------------------|
| a5114_1dig        | Wrong value | Corrected (not for Sweden and Italy) |
| a334m_* - a352b_* | Wrong value | Corrected (only for Belgium)         |

#### IMPROVEMENTS INTRODUCED WITH V.4.3. (August 2016):

Variables corrected with Version 4.3.

- fertintent (no more ambiguous labelling)
- a1101 (corrected error in coding)
- aweight (now available also for NLD CZE SWE POL)
- aregion (now available also for HUN)
- aplace (now available also for HUN)
- a5112 (corrected routing error for ROU)
- a5113 (corrected routing error for ROU)
- a5114 (corrected routing error for ROU)
- a5115 (corrected routing error i for ROU)
- a211b\_ (corrected error for POL & GEO)
- ankids (corrected error for POL & GEO)
- a1008mnth (corrected error for NGR & BEL)
- a108 (now available for SWE)
- a109\_1 (now available for SWE)
- a109\_2 (now available for SWE)
- a149 (now available for SWE)
- a309 (now available for SWE)
- aregion (now available for SWE)
- a620\_ (corrected error for DEU & CZE)
- a402 (corrected error for POL)
- a149 (corrected error routing error in NOR)
- a344 (corrected error routing error in NOR)
- a256\_ (corrected error for POL & GEO)

#### IMPROVEMENTS INTRODUCED WITH V.4.2. (February 2014):

The update from v4.1 to v4.2 does not include corrections of existing variables.

The update only includes additional variables which are derived from the pre-existing datasets

- Variables derived from grid variables and variables which concern the respondents and his/her partner: numdissol numdivorce nummarriage numpartners livingwithpartner childprevp femage maleage femeduc maleeduc fertintent numbiol numres numnonres numstep numallchild ageyoungest ageoldest numrespleave numotherparentleave corespchild corespren corespgrandp coressibl.

- Variables derived from month and year variable:

a808Dur a822Dur a907Dur a911Dur a914Dur; a303cAgeP a315AgeP a316cAgeP a374cAgeP a608AgeP a610AgeP a617bAgeP a621AgeP a914AgeP a941AgeP; a107AgeR a121AgeR a150AgeR a239aAgeR a239bAgeR a240AgeR a301AgeR a302bAgeR; a311AgeR a314bAgeR a314dAgeR a371AgeR a372bAgeR a603AgeR a608AgeR a610AgeR a613AgeR a614AgeR a619AgeR a621AgeR a816AgeR a822AgeR a871AgeR a5116AgeR a5117bAgeR; a302bTdiff a314bTdiff a314dTdiff a372bTdiff.

- Variables derived from hours and minutes variables: a324\_hour a520\_hour a540\_hour.

- Variables derived from frequency and unit variables:

a205mnth,a241mnth,a325mnth,a355mnth,a359mnth,a363mnth,a367mnth,a521mnth,a541mnth,a1008mnth,a1102mnth; a203c\_?w a204c\_?w.

- Occupation variables recoded into ISCO-88 1 digit: a828\_1dig a832\_1dig a861\_1dig a917\_1dig a921\_1dig a933\_1dig a5112\_1dig a5114\_1dig.

**IMPROVEMENTS INTRODUCED WITH V.4.1. (April 2012):**

- Variables corrected: aage, aactstat, amarstat, anpartner, ankids, a321, a324\*, a325\*, a540.
- Variables recoded: a5112, a5114, a861 (values that were not according to ISCO 88 now coded into missing).
- Variables corrected in version 4.0. that were not documented: a933, a1008U.

**IMPROVEMENTS INTRODUCED WITH V.4.0 (March 2012):**

- New constructed variables: asex aage abyear aeduc aactstat aparstat amarstat anpartner ankids ahhsz ahhtype.
- Variables which do not have country specific categories anymore: a149 a309 a322 a380 (coded using ISCED 97).
- Variables corrected: a601 and a602 (corrected, with consequences on the response rate of subsequent variables), a622, a623, a624, a625, a626, a627\*, a628\*, a629\*, a631\*, a383 (now rounded).
- New consolidated variables on respondents' current activity: a870, a871m, a871y, a873, a874, a875.
- New consolidated variables on respondents' partners current activity: a940, a941m, a941y, a943, a945.

**IMPROVEMENTS INTRODUCED WITH V.3.0 (August 2010):**

- For all variables: now values 7,8,9 have labels
- Variables for which codes are now corrected: a122 (now values are in four digits).
- Variables that do not have value labels in Cyrillic anymore: a149, a322, a5112, a828, a832, a861, a917, a921, a933, a5114
- Variables that do not have country specific values anymore: a149, a308, a321, a337\_\*, a5113, a5115.
- Variables renamed: a203c\_1u...`i'u and a204c\_1u...`i'u renamed respectively into a203cu\_1...`i' and a204cu\_1...`i'.
- Variables dropped because not in the codebook: a201b\_a2 - \_f2
- Variables dropped because empty: a378a, a535, a536
- Variables corrected: a550, a1101.
- Variables that now have value labels: a374b, a377, a707\_1, a843\*
- Variables for which labels have changed : a1003\_1 to \_6 (now 6 questions with category yes/no), a330 (value 5 useless and therefore deleted).
- New variables: a370, a383, a384.

**FIRST DATASET RELEASED: V. 1.8. (March 2010).****Processing Checks****DATA HARMONISATION**

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

**1. Label checks**

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

**2. Dealing with grids**

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("\_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3\_# or bhg3\_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

**3. Routing**

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

**4. Consolidation**

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

#### 5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

#### 6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.
- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

#### **Missing Data**

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

#### **Notes**

Before publication in Nesstar GGS micro data files are further processed so as to ease online data browsing and analysing. We delete variables having all system missings.

# Variables List

Dataset contains 2404 variable(s)

| File GGS_Wave2_Russia_V.1.3. |                             |                                                                                      |          |             |       |         |                                                 |

### # bmonth: Mnth of interview (W2)

**Information** [Type= discrete] [Format=numeric] [Range= 1-2401] [Missing=\*/97/98/99]

**Statistics [NW/ W]** [Valid=7783 /-] [Invalid=0 /-]

**Definition** Q 001

**Pre-question** Interviewer Instruction: Write in the time and date when the interview starts.

**Literal question** Interview started at...on...

**Interviewer's instructions** Interviewer Instruction: Read the following text.

This survey is a continuation of the Generations and Gender Survey in which you participated three years ago. It is part of an international programme co-ordinated by the UN Economic Commission for Europe. An interesting feature of our research is that it tries to follow the lives of people over a long period of time.

The aim of this research is to learn more about the everyday life, circumstances, and opinions of people and families. We want to gather information about the factors that influence the formation of new families, childbearing and preparation for old age. We also want to gather information about the lives of the young, middle-aged and old generations. This survey will show how people's life and family circumstances have changed over time, which will improve understanding of impediments of family life and relations of generations and help to develop policies for the future.

Each person's answer is very important to us, because each person who was visited and questioned represents a particular group of our society. Therefore, although they were randomly selected, the participants of this survey proportionally represent all of the inhabitants of this country. That is why it is important to question the same people again this time.

We will hold the information you give us in the strictest confidence, and use it only for statistical processing. If possible, it would be better if we could have this interview without others being present.

| Value | Label                                                          | Cases | Percentage |

| <b>Interviewer's instructions</b> | <p>Interviewer Instruction: Read the following text.</p> <p>This survey is a continuation of the Generations and Gender Survey in which you participated three years ago. It is part of an international programme co-ordinated by the UN Economic Commission for Europe. An interesting feature of our research is that it tries to follow the lives of people over a long period of time.</p> <p>The aim of this research is to learn more about the everyday life, circumstances, and opinions of people and families. We want to gather information about the factors that influence the formation of new families, childbearing and preparation for old age. We also want to gather information about the lives of the young, middle-aged and old generations. This survey will show how people's life and family circumstances have changed over time, which will improve understanding of impediments of family life and relations of generations and help to develop policies for the future.</p> <p>Each person's answer is very important to us, because each person who was visited and questioned represents a particular group of our society. Therefore, although they were randomly selected, the participants of this survey proportionally represent all of the inhabitants of this country. That is why it is important to question the same people again this time.</p> <p>We will hold the information you give us in the strictest confidence, and use it only for statistical processing. If possible, it would be better if we could have this interview without others being present.</p> |
