Generations and Gender Survey Sweden Wave 1 (GGSW1.29)

Svenska familjer i tiden

Overview

Identification	GGSW1.29
Abstract	<p>The Generations and Gender Survey (GGS) provides micro-level data with the aim of significantly improving the knowledge base for social science and policymaking in Europe and developed countries elsewhere.</p> <p>In Europe 2020, the European Union develops a strategy "to help us come out stronger from the crisis and turn the EU into a smart, sustainable and inclusive economy delivering high levels of employment, productivity and social cohesion". The economic crisis affects not only day-to-day decisions, but also fundamental choices at all stages of people's lives: marriage and childbearing, the combination of employment and caring responsibilities for the young and the old, retirement, housing, and ageing well. The GGS has been developed to provide scientists with high-quality data to contribute scientifically grounded answers to these key policy questions. Survey content focuses on intergenerational and gender relations between people, expressed in care arrangements and the organization of paid and unpaid work. Key feature of the survey are:</p> <ul style="list-style-type: none"> - Cross-national comparability. In each country data is collected on the basis of a common international questionnaire and guidelines about the methodology. Data processing includes central harmonization of national datasets. - A broad age range. It includes respondents between the ages of 18 and 80. - A longitudinal design. It has a panel design, collecting information on the same persons at three-year intervals. - A large sample size. It has an average of 9,000 respondents per country at Wave 1. - A theory-driven and multidisciplinary questionnaire. It provides data for policy relevant research by demographers, economists, sociologists, social policy researchers, social psychologists and epidemiologists. The questionnaire is inspired by the theory of planned behavior. - Possibility to combine the survey data with macro data provided by the GGP Contextual Database. This combination enables analyses of individuals and families in their cultural, economic, political, social and policy contexts.
Kind of Data	Survey data plus population register
Unit of Analysis	Individuals

Scope & Coverage

Keywords	Fertility, Partnership, Transition to adulthood, Work-family balance, Gender Relations, Intergenerational exchange, Informal and formal care, Well being and health, Grandparenthood, Economic activity, Retirement
Time Period(s)	2012-2013
Countries	Sweden
Geographic Coverage	The whole country.
Universe	Target Population: Individuals in Sweden age 18-79

Producers & Sponsors

Primary Investigator(s)	Elizabeth Thomson, Stockholm University Demography Unit (SUDA) Gunnar Andersson, Stockholm University Demography Unit (SUDA)
Other Producer(s)	Stockholm University Demography Unit (SUDA) , Development and management Linnaeus Center for Social Policy and Family Dynamics in Europe (SPaDE) , Development and management Statistics Sweden Survey Unit , Sampling, data collection and production

Funding Agency/ies	Swedish Research Council (VR) Riksbankens Jubileumsfond (RJ) Swedish Research Council (VR) Swedish Research Council (VR)
---------------------------	---

Sampling

Sampling Procedure

1. Sampling frame

1.1 Type of frame: Register of the Total Population (RTB)

1.2 Frame coverage: The Frame (RTB) covers all individuals in Sweden covered by the civil registration. Statistics Sweden's RTB receive daily updates from The Swedish Tax Agency.

1.3 Frame size: A subset of RTB, age 18-79 (7 128 847 individuals)

1.4 Level of units available: 7 128 847 individuals

2. Sampling method

2.1 Sampling method type: Proportional-to-size sampling with a simple random sampling (SI) within strata. (one-stage sampling; individual level)

2.2 Sampling stage definition

- PSU: individual

- SSU: NA

- TSU: NA

2.3 Sampling stage size

- PSU: individuals

- SSU: NA

- TSU: NA

2.4 Unit selection: individuals

2.5 Final stage unit selection: individuals

2.6 Within household unit selection: out of scope

2.7 Stratification: The frame is divided into 8 strata by sex (male, female), age (18-49, 50-79) and residence (three major cities, other).

2.8 Sample size

- Starting size sample: 18000 individuals

- Aimed total size at Wave 1: 18000 individuals

- Aimed total size at Wave 3: NA

2.9 Estimated Non-response

- Yearly attrition: NA

- Non response measures: The total non response rate for Wave 1 is 45,4 % (excluding overcoverage). The non response rate is calculated as follows: number of non-respondents / (the sample size-number of overcoverage units). The overcoverage is negligible in this survey.

- Within household non-responses measures: out of scope

Response Rate

WAVE 1

Frequency of final disposition codes:

I = Complete interview: 9688 interviews, response rate = $9688 / (18000-326) = 58,8 \%$

P = Partial interview: NA

NE = Not eligible: 326

NC = Non-contact: 3210, non-contact rate = $3210 / (18000-326) = 18,2 \%$

R = Refusal: 3939 (refusal rate = $3939 / (18000-326) = 22,3 \%$

O = Other non-response: 860, "other non-response rate" = $326 / (18000-326) = 4,9 \%$

UC = Unknown eligibility, contacted/: NA

UN = Unknown eligibility, non-contact: NA

eC = Estimated proportion of contacted cases of unknown eligibility that are eligible: NA

eN = Estimated proportion of non-contacted cases of unknown eligibility that are eligible: NA

Weighting

The estimation procedure generates calibration weights based on the inclusion probabilities and auxiliary information (mainly from RTB).

Data Collection

Data Collection Dates	Wave 1: start 2012-04 Wave 1: end 2013-04
Data Collection Mode	- Telephone interview (CATI WinDATI at Statistics Sweden) and Registers for information on: family of origin, current partner, children, partner history, fertility intentions, education, employment, occupation and income (respondent and current partner). - Self-administered postal questionnaire or online alternative for information on: household economy, household work, decision making, social and economic exchange, Health and Wellbeing, values, beliefs, Subjective norms, and intentions.

Data Collection Notes

1. Interviewers
 - 1.1 Total number of interviewers: 59
 - 1.2 Number of interviewers in the field: All interviewers were located in Stat Sweden's CATI-center
 - 1.3 Network organization: See 1.2
 - 1.4 Working arrangement of interviewers: Part-time (0.50-0.80 of full-time)
 - 1.5 Payment of interviewers: Monthly salary
2. Interviewer training:
 - 2.1 General interviewing: Each interviewer have an initial one-week basic course. After one year the interviewers has a continuation course.
 - 2.2 Survey specific: In this survey, all interviewers followed a theoretical study-specific training.
 - 2.3 Length: 12 hours (theory and practice)
 - 2.4 Control of performance: Monitoring (during the education phase) and control and feedback based on process data (paradata) from the CATI-system.
 - 2.5 Interviewer survey: NO
3. Contact protocols
 - 3.1 Advance letter: All sample units recieved an advance letter.
 - 3.2 Cold contacts: Telephone
 - 3.3 Scheduling / scattering: Yes. Call attempts were distributed over all weekdays, weekends (including Sundays) and during the days across morning, afternoon and evening (until 9 p.m.).
 - 3.4 Contact history: DK
 - 3.5 Min number of contacts: 1
 - 3.6 Max number of contacts: 12
4. Questionnaire localization
 - 4.1 Validation: Expert review of the questionnaire by Statistics Sweden's Cognitive Methods Unit
 - 4.2 Pre-test: Yes. Pilot study using a 400-person sampling frame with the same design as the full survey.
 - 4.3 Length of interview: The average time for the telephone interviews was 26 minutes and 28 seconds.

Questionnaires

Structured questionnaire in Swedish CATI-based.

Data Collector(s)	Statistics Sweden (SCB)
--------------------------	-------------------------

Supervision

1. Dealing with nonresponse
 - 1.1 Screening: DK
 - 1.2 Refusal conversion: Yes, in special follow-up processes.
 - 1.3 Incentives: No

2. Tracking of sampled units

2.1 Respondent contact information: Address, telephone numbers, Id-identification including family members.

2.2 Other contact information: Statistics Sweden is allowed to get contact information from several other authorities.

2.3 Cards: No

2.4 Additional surveys: No

2.5 Administrative records: Contact information from employers from Register of Statement of incomes.

<u>Access Conditions</u> In order to access, it is necessary to subscribe to the GGP Data User Space, and to follow the instructions available on the GGP data access webpage.	
<u>Citation Requirements</u> In any work emanating from research based on the Generations and Gender Survey micro-data, I will acknowledge that these data were obtained from the GGP Data Archive and refer to the publication that describes the model survey instruments: United Nations 2005. Generations & Gender Programme: Survey Instruments. New York and Geneva: UN, 2005	

Rights & Disclaimer
<u>Disclaimer</u> The authors and producers bear no responsibility for the uses of the GGS data, or for interpretations or inferences based on these uses. The producers accept no liability for indirect, consequential or incidental damages or losses arising from use of the data collection, or from the unavailability of, or break in access to the service for whatever reason.

Files Description

Dataset contains 1 file(s)

GGG_Wave1_Sweden_V.4.3.1.	
# Cases	9688
# Variable(s)	1121
<p><u>File Content</u></p> <p>VARIABLES HAVING ALL SYSTEM MISSING CASES ARE DROPPED BEFORE PUBLICATION IN NESSTAR. This is the reason why the total no. of variables in the Nesstar data file is smaller than the total number of variables in the SPSS and STATA files.</p> <p>Variables are ordered according to the sections of the GGS codebook: Household, Children, Partnerships, Household Organisation and Partnership Quality, Parents and Parental Home, Fertility, Health and Well-Being, Respondent's Activity and Income, Partner's Activity and Income, Household Possessions, Income and Transfers, Value Orientations and Attitudes, Interviewers' report.</p> <p>The variables begin with a letter designating the wave of data collection ("a" for the first wave likewise "b" for the second wave). We have attempted to keep the names of variables the same across the waves, and all the new variables would be identified as follows ["wave letter"]n e.g. bn301.</p> <p>Although we encourage the countries to strictly follow the GGS Questionnaire, countries might implement a question that differs to a considerable extent from the GGS Questionnaire. In this case either we add country specific response values, or we introduce a country specific variable.</p> <p>Country specific values are added when the question follows the model questionnaire, but the answers are not at all or partly compatible. They are at least 4 digits long (F4 format) and begin with the country code: e.g., Australia 2401. Hence, the country code, as an example, for Australia is 24.</p> <p>A country specific variable is introduced when the question differs from the model questionnaire albeit measuring the same concept. This kind of variables is identified with a suffix given by the country code plus a number, e.g., Australia a119_2401. In order to have an overview of GGS country code, please refer to the variable "acountry".</p>	
<p><u>Producer</u></p> <p>The file is produced centrally by the Netherlands Interdisciplinary Demographic Institute (NIDI, The Netherlands), in collaboration with the Survey Department of the "Institut national d'études démographiques" (INED, France).</p>	
<p><u>Version</u></p> <p>Harmonized dataset, GGS Sweden Wave1, version 4.3.1.</p> <p>Variables corrected with Version 4.3.1 (December 2017)</p> <ul style="list-style-type: none"> - aregion (correction for Sweden regions) - a206 (now available also for Sweden) <p>IMPROVEMENTS INTRODUCED WITH V.4.3. (August 2016):</p> <p>Variables corrected with Version 4.3.</p> <ul style="list-style-type: none"> - fertintent (no more ambiguous labelling) - a1101 (corrected error in coding) - aweight (now available also for NLD CZE SWE POL) - aregion (now available also for HUN) - aplace (now available also for HUN) - a5112 (corrected routing error for ROU) - a5113 (corrected routing error for ROU) - a5114 (corrected routing error for ROU) - a5115 (corrected routing error i for ROU) - a211b_ (corrected error for POL & GEO) - ankids (corrected error for POL & GEO)

- a344 (corrected error routing error in NOR)
- a256_ (corrected error for POL & GEO)

IMPROVEMENTS INTRODUCED on the 4th of November 2015 (V.4.2.2)

- a550: corrected

IMPROVEMENTS INTRODUCED on the 7th of July 2015 (V.4.2.1)

- aweight: now available
- a123 and a936_*: corrected
- aregion: addition of category labels.

FIRST DATASET RELEASED: V. 4.2. (June 2015).

Processing Checks

DATA HARMONISATION

The data is submitted in an already pre-harmonised form. It is prepared and organised according to the GGS standards. Harmonisation aims at achieving a clear and comparable format of the GGS micro-data files that would be adequate for cross-country comparison. The harmonisation procedure basically is composed of:

1. Label checks

This step makes sure that all the variables are named the same across the countries and refer to a particular question in the GGS Questionnaire. Also the value labels are checked. They should be the same across GGS datasets.

2. Dealing with grids

The GGS Questionnaire holds several grids of either event history information or members of the household. Such data needs to be harmonized with specific attention to order and logical consistency of grid-rows (be either household members or events such as births). In data sense each row of the grid is represented by variable name followed by a subscripted number ("_#"). Each subscript thus represents one household member or one event. Part of the grid harmonization is grid sorting. Grid rows are sorted according to pre-defined key. For example in the household grid, the household members are sorted according to their relationship to the respondent i.e. the relation to respondent variable (ahg3_# or bhg3_#). Respondents would appear, first, followed by their partners and children if any and then followed by other household members. As there may be more than one child (or other relative) living in the household they also would need to be sorted. In the case of the household grid, age is used as the secondary sorting key (starting with the oldest person to the youngest).

3. Routing

Routing check ensures that the structure of underlying data set matches the structure of the GGS questionnaire. Its main goal is to code any given variable in the dataset to either a valid response, nonresponse or skip as indicated in the questionnaire. Consequently, the indicated skip in the questionnaire is represented with a system missing code (. in STATA, sysmis in SPSS), while the missing information for other reasons is coded into non-applicable/no response (i.e. codes 7, 8, 9 in SPSS or .a, .b, .c in STATA).

4. Consolidation

The process consolidates the information scattered over several variables into a single one. The consolidation procedure is carried out in the Children Section, the Partnership Section and the Parents and Parental Home Section.

5. Imputation

Due to its sensitive nature, the respondents are reluctant to share income information with the interviewer. In order to be able to use income information in a cross country comparative study and not to lose too many observations in the process it is necessary to impute the approximately correct distribution of the income variable in each country.

6. Calculation of derived variables

We calculate derived variables out of the following variables:

- grid variables (i.e., household grid, children grid, and partnership history grid); the codebook starts with the constructed variables that sum the key socio-demographic characteristics of the respondent.

- month and year variables,
- hours and minutes variables,
- frequency and unit variables.

Occupation variables are recoded into ISCO-88 1 digit.

Explanations of the ways in which consolidated and derived variables are obtained, are available under the field "Note" of the "Variable Description" sections.

For a more detailed and technical procedure please refer to the Data Cleaning and Harmonisation Guidelines.

Missing Data

The following missing values have been assigned:

- 6, 96, 996, etc. = Unknown (only for consolidated variables in the group "administrative variables")
- 7, 97, 997, etc. = Don't know
- 8, 98, 998, etc. = Refusal
- 9, 99, 999, etc. = Not-applicable/no response

Notes

Before publication in Nesstar GGS micro data files are further processed so as to ease online data browsing and analysing.

We delete variables having all system missings.

Variables List

Dataset contains 1121 variable(s)

Definition Q 001

Pre-question Interviewer Instruction: Write in the time and date when the interview starts.

Literal question Interview started at...on...

Interviewer's instructions Interviewer Instruction: Read the following text.
This survey is called the Generations and Gender Survey. It is about topics related to children, partners, parents, work and everyday life. The aim is to study what factors influence family formation, having children, and relations between younger and older generations. The study is part of an international programme co-ordinated by the UN Economic Commission for Europe. Your participation is voluntary, but it is very important because you represent many other people. We will hold the information you give us in the strictest confidence and use it only for statistical processing. It would also be better if we could have this interview without others being present, if possible. If you have any questions, please let me know.

File : GGS_Wave1_Sweden_V.4.3.1.

nummarriage: Total number of marriages

Information	[Type= discrete] [Format=numeric] [Range= 0-3] [Missing=*]
Statistics [NW/ W]	[Valid=9688 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	The number of previous partners with whom Respondent was married (code 1 on question 327 "Partnership history" grid) PLUS the current marriage if one exists (code 1 on question 302 / variable a302a OR code 1 on question 310 / variable a314a).

Value	Label	Cases	Percentage
0		3906	40.3%
1		5101	52.7%
2		631	6.5%
3		45	0.5%
4		5	0.1%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

numpartnerships: Total number of partnerships

Information	[Type= discrete] [Format=numeric] [Range= 0-4] [Missing=*]
Statistics [NW/ W]	[Valid=9688 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	The total number of partnership dissolutions (see variable numdissol) PLUS the current partnership if one exists (partner is present in the Household grid). Note that this variable only refers to resident partners, past and present. Not available for Australia as partnership history grid differs in Australian survey

Value	Label	Cases	Percentage
0		1356	14.0%
1		5183	53.5%
2		2378	24.5%
3		621	6.4%

childprevp: any children from previous partnership

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=9688 /-] [Invalid=0 /-]
Definition	Derived variable
Notes	"Yes" if Respondent had children with any previous partner (question 332 (a345), "Partnership history" grid); "No" otherwise. Data not available for Australia, Hungary, Estonia or Italy.

Value	Label	Cases	Percentage
1	Yes	1989	20.5%

File : GGS_Wave1_Sweden_V.4.3.1.

childprevp: any children from previous partnership

Value	Label	Cases	Percentage
2	No	7699	79.5%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

femage: If partnered: age of female

Information	[Type= discrete] [Format=numeric] [Range= 14-85] [Missing=*]
Statistics [NW/ W]	[Valid=3870 /-] [Invalid=5818 /-]
Definition	Derived variable
Universe	If R has a partner
Notes	<p>This variable indicates the age of the female in the relationship if the respondent says that they are currently in a relationship. If the respondent is female then the respondents age is used (agee.)</p> <p>If the respondent is male and in a relationship with a female then their age is derived depending on the nature of the relationship. For a resident partner the age was copied from the Household grid (ahg5_); for a non resident partner the age was calculated as: year of interview MINUS question 311 (variable a315y).</p> <p>Rs with non-resident partners are coded with "999 - not applicable/no response", when variable a315y is not available in the dataset.</p> <p>Note that this variable does not have a value for same-sex partnerships.</p>

numbiol: Total number of biological children

Information	[Type= discrete] [Format=numeric] [Range= 0-12] [Missing=*]
Statistics [NW/ W]	[Valid=9688 /-] [Invalid=0 /-]
Definition	Derived variable
Literal question	The number of biological children of the respondent (with the current or with former partner).
Notes	For resident children, copied from the Household grid (code 2 or 3 on variable ahg3_*); for non-resident children, copied from question a213 (code 1 on variable a213_*). Note that this variable refers to biological children of the respondent, coresident and non-resident, with the current partner or with an other partner.

Value	Label	Cases	Percentage
0		6111	63.1%
1		1389	14.3%
2		1617	16.7%
3		465	4.8%
4		79	0.8%

# a107AgeR: R's age of starting to live in country of interview			
Information	[Type= discrete] [Format=numeric] [Range= 0-63] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=1123 /-] [Invalid=8565 /-]		
Definition	Derived variable from Q 107 core questionnaire		
Universe	If code 2 on Q 105		
Literal question	In what month and year did you first start living permanently in [country]?		
Notes	<p>R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the country of interview was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"</p> <p>Data is not available for Estonia.</p>

# a121AgeR: R's age of starting to live in current dwelling			
Information	[Type= discrete] [Format=numeric] [Range= 0-78] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=8993 /-] [Invalid=695 /-]		
Definition	Derived variable from Q 115 core questionnaire		
Literal question	In what month and year did you start living in this [type of accommodation]?		
Notes	<p>R's time of birth was deducted from HH grid. If information on the month of birth / month of starting to live in the current dwelling was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".</p> <p>Data is not available for Estonia.</p>

# a150AgeR: R's age of achieving the current education level			
Information	[Type= discrete] [Format=numeric] [Range= 0-69] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=8781 /-] [Invalid=907 /-]		
Definition	Derived variable from Q 122 core questionnaire		
Literal question	In what month and year did you reach that level?		
Notes	<p>R's time of birth was deducted from HH grid. If information on the month of birth / month of achieving the current education level was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December".</p> <p>Data is not available for Norway.</p>

Universe	If R does NOT have a co-resident partner		

# a310: Have relationship to somebody without cohabitation			
Literal question		Are you currently having an intimate (couple) relationship with someone you're not living with? This may also be your spouse if he/she does not live together with you. Our survey does not only cover heterosexual relationships, but also same-sex relationships. If you have a partner of the same sex, please answer the following questions as well.	
Value	Label	Cases	Percentage

# a374cAgeP: Partner's age of obtaining permanent residence			
Information	[Type= discrete] [Format=numeric] [Range= 0-54] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=733 /-] [Invalid=8955 /-]		
Definition	Consolidated variable from variables a303AgeP and a316cAgeP (derived variables from Q 304.c and Q 312.c core questionnaire).		
Universe	If R's partner not born in [country]		
Literal question	In what month and year did he/she first start living permanently in [COUNTRY]?		
Notes	Co-resident Partner's time of birth was deducted from HH grid. Non Resident Partner's time of birth was deducted from the answer to Q 311. If information on the month of birth / month of starting permanent residence was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

# a871AgeR: R's age at start of current activity status			
Information	[Type= discrete] [Format=numeric] [Range= 0-73] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=8688 /-] [Invalid=1000 /-]		
Definition	Generated from consolidated variables a871m and a871y.		
Literal question	In what month and year did you start this leave? In what month and year did you become unemployed? Since what month and year are you a student, studying at school, or in vocational training? In what month and year did you retire? Since what month and year are you a homemaker? In what month and year did you start this job or business?		

a871AgeR: R's age at start of current activity status

Notes

R's time of birth was deducted from HH grid. If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the followig way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December"

This variable is not available for Belgium.

# a907Dur: Duration of partner's unemployment	
Information	[Type= discrete] [Format=numeric] [Range= 0-91] [Missing=*/97/98/99]
Statistics [NW/ W]	[Valid=144 /-] [Invalid=9544 /-]
Definition	Derived variable from Q 907 core questionnaire
Universe	If code 3 on Q 901
Literal question	In what month and year did he/she become unemployed?
Notes	The duration was deducted from the time of interview (variables ayear and amonth). Values were rounded down to the duration in terms of whole years. For Australia, less than 2 years ago was taken as 1 year; 2-5 years was taken as 3 years; More than 5 years was taken as 5 years.

Definition	<p>Q 917 core questionnaire</p> <p>DEU: only country specific values "14001-farmer", "14002-highly skilled profession (medicin, lawyer etc.)", "14003-self-employed", "14004-civil servant, judge, officer", "14005-clerk", "14006-worker", "14007-still in training", "14008-paid family worker".</p>		
Universe	R is partnered, partner is unemployed / student / retired / ill or permanently disabled / homemaker / in military or social service and had a job directly before this current status.		
Pre-question	I would now like to ask a few questions about your partner's/spouse's previous job or business. If he/she was engaged in two or more jobs or businesses, I would like you to tell me only about the one in which he/she spent most of his/her working hours.		
Literal question	What was his/her last occupation? Please describe the principal activity he/she performed.		
Notes	ISCO '88 code must be regarded

# a941AgeP: Partner's age at start of current activity status			
Information	[Type= discrete] [Format=numeric] [Range= 0-72] [Missing=*/997/998/999]		
Statistics [NW/ W]	[Valid=1531 /-] [Invalid=8157 /-]		
Definition	Generated from consolidated variables a941m and a941y.		
Universe	If R has a partner.		
Literal question	In what month and year did your partner/spouse start this leave? In what month and year did he/she become unemployed? Since what month and year is your partner/spouse a student, in school, or in vocational training? In what month and year did your partner/spouse retire? Since what month and year is your partner/spouse a homemaker?		
Notes	Partner's time of birth was deducted from HH grid (co-resident partner) or Q 311 (non resident partner). If information on the month of birth / month at start of current activity status was missing, a 6 (june) was used in the calculation. Values 21-25 for month values are converted in the following way: "Beginning of the Year" = "January-February"; "Spring" = "May"; "Summer" = "August"; "Autumn" = "October"; "End of Year" = "December". In Belgium if the partner is still in education (a941y==2301) then the variable was coded as system missing.
